9:30 AM

Samuel Blackwood

Morning Review (α & β Strategy)

Good morning, community members!

I'm Samuel Blackwood, and yesterday was a truly historic day for all of us participating in the AlphaStream 5.0 "Millionaire Club"! Under the Helmsman's guidance, we secured a remarkable 150% profit in a single trade, achieving our 300% total asset return goal ahead of schedule. What an incredible feeling! In a market environment where stocks have been retreating after hitting highs, we've managed to deliver such results in the crypto market, this is the power of making the right choices!

Choice often outweighs effort. The creation of AlphaStream 5.0 was no accident, it came after two rigorous rounds of testing and a thorough analysis of survey feedback, leading the Helmsman to officially establish the "Millionaire Club." From choosing the crypto market as our primary battleground to launching the Million-Dollar Profit Challenge, every step has

showcased the Helmsman's precise strategic vision. Yesterday's success has also laid a solid foundation for the community's charitable fund donation plan set for March next year.

We all understand that helping more people make money attracts more subscribers to AlphaStream 5.0 and contributes to the community's charitable fund. This is not just the success of a trading system but also a reflection of our community's sense of responsibility. Many members of our community, like myself, can't wait to experience more victories like this. It's not just about the joy of trading, it's the fuel driving us toward our dreams.

Every successful trade is a step closer to achieving our dreams. Through the Helmsman's guidance and our collective effort, we're steadily moving toward our goals. What's even more inspiring is that our success isn't just for ourselves; it will also bring more positive impacts to the community and society.

Folks, let's maintain this passion and momentum and seize every opportunity! We're not only here to achieve market success but also to energize our community through these victories. This is our mission, and it's our honor. Let's give it our all, chase our dreams, and create a brilliant future that belongs to us!

Recently, in conversations with some friends, I've been deeply moved. Many have expressed a strong sense of recognition and belonging to the QTM community. Through these passionate trades, we've not only gained profits but also found the meaning of striving together. Our community is not just a trading platform, it's a family that supports, encourages, and grows together.

Every time we share the joy of success or exchange strategies and experiences, the strong sense of unity and teamwork deeply inspires me. This unique sense of belonging motivates each of us to keep moving forward, surpassing ourselves, and reaching even higher goals.

QTM community is the stage where we realize our dreams. Here, we're not just fighting for trades but also striving for a brighter future. Let's continue to work closely together, seize every opportunity, and strive for even greater success!

Let's go, folks! With every victorious trade, let's prove our strength and create even greater achievements with our passion and determination! We can do this because we have dreams, we have the drive, and we are turning it all into reality, step by step.

Rules:								
1. Challenge Period: 7 days								
2. Total Assets CAGR Goal: 80% or higher								
Date	Transaction Type	Direction	Number of trades	Success rate of trades	Profit Ratio	Cumulative Return Rate	Total Assets Growth	Account capital growth rate

12/12/2024	CBF/USDT-100X	Long	5%	100%	157%	1374.00%	\$21,669	333.38%

Guys, two weeks of real trading has already delivered extraordinary results! Passion December 300% Profit Challenge has been completed ahead of schedule. This means if you started with a \$5,000 investment and followed the trading signals strictly, you should now have approximately \$21,669 in profits.

This is the average return, those who traded skillfully might have even higher gains! We've seen some participants who started with \$50,000 surpass \$200,000 in returns, and others who began with \$500,000 have already achieved their million-dollar profit target. In just two short weeks, these participants have completed the AlphaStream 5.0 "Millionaire Club" Million-Dollar Profit Challenge.

But why is there such a significant difference in profits among participants executing the same trades? The key lies in the difference in investment capital. With the same profit rate, varying initial investments naturally yield vastly different outcomes. Some people are still approaching trading with a "let's try it out" mindset, and this attitude is bound to fall short of true success. When you identify an opportunity, you must commit wholeheartedly to achieve the victories you deserve. If you're always testing the waters, you'll never attain the results you truly want.

Currently, some participants have been asking: why is the fund allocation for each trade limited to 10% to 20%? This is a carefully considered decision by Helmsman, aimed at balancing the differences in capital size among community members and providing everyone with the most stable profit

strategy. To help everyone participate effectively and maximize returns, I believe the Helmsman is working on creating tailored strategies for different capital levels. This approach reflects not only a sense of responsibility but also our team spirit.

If you have any suggestions or ideas, feel free to share them with Helmsman or me at any time. We firmly believe that collective wisdom is the key to success. Only by combining everyone's insights can we find the best solutions and help every participant achieve their goals in this market.

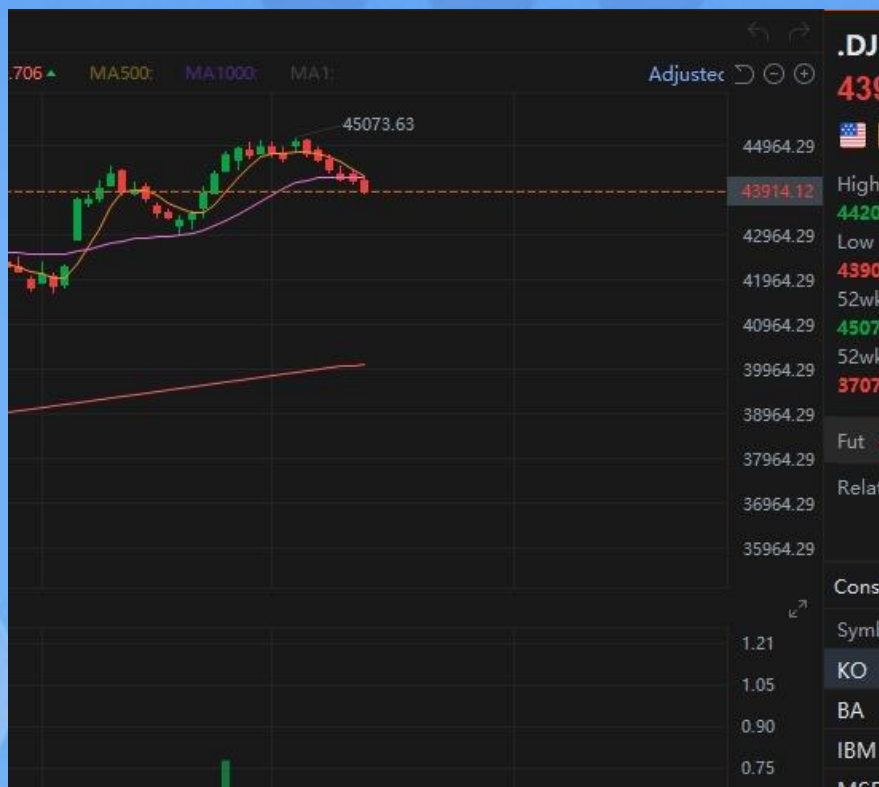

Folks, now is the time to show your determination and confidence. Increasing your investment appropriately is the key to truly achieving your profit goals. Opportunities like this don't come often, and this challenge plan might be your best chance to enter the crypto market and achieve financial freedom. Success isn't a solo battle, it's the result of all our collective efforts.

We're here not just for trading but for growing and progressing together. Helmsman's strategies are carefully designed to ensure that every participant, regardless of their capital size, can maximize their returns.

Act now! Opportunities are fleeting, especially since events like this may never happen again after AlphaStream 5.0 officially launches. Seize the current market opportunity, stay confident, and give it your all! Achieving a million-dollar profit target by March next year is not just a dream, it's a reality you can achieve through action and intelligence.

Remember, success belongs to those who dare to act and take risks. Don't hesitate, and don't keep waiting. Now is the best time to chase your dreams and create miracles! Let's prove ourselves with action and work together to build a brilliant future!

Through the daily candlestick charts of the Dow and S&P 500, we can clearly see that a significant correction signal has emerged. Particularly in the Dow's performance, it perfectly aligns with the α & β strategy's bearish pattern: the 5-day moving average (5MA) has crossed below the 20-day moving average (20MA), and the MACD has formed a death cross at a high level, clearly indicating that the downward adjustment is not yet over.

Don't overlook the combination of fundamental changes and technical patterns. We need to remember that every fundamental market fluctuation will eventually be reflected in the candlestick charts. Recently, announcements of interest rate cuts by several major central banks, combined with two consecutive days of economic data releases, have heightened market concerns and triggered profit-taking movements.

1. Labor Market Showing Signs of Weakness

Last week, U.S. initial jobless claims unexpectedly rose to 242,000, surpassing economists' expectations of 220,000. This data has shaken market confidence in the resilience of the labor market.

2. Producer Prices Exceed Expectations

The U.S. Producer Price Index (PPI) for November increased by 0.4% month-over-month, significantly higher than economists' forecast of 0.2%. While a slowdown in service costs suggests that deflationary trends may still persist, rising goods costs have undoubtedly added new pressure to inflation.

3. Bond Market Volatility

Following the data release, the yield on the U.S. 10-year Treasury rose to a two-week high, reflecting growing uncertainty over the future path of interest rates.

4. This PPI data comes on the heels of the CPI report, which aligned with expectations and reinforced market bets that the Federal Reserve will cut rates again at next week's policy meeting. According to the CME FedWatch Tool, traders now see a greater than 98% probability of a rate cut next week.

However, it's worth noting that the market's primary focus has shifted to the policy outlook for 2025. Inflationary pressures have not fully subsided, and some Federal Reserve officials have urged caution in easing monetary policy. This could mean an increased likelihood of a rate cut pause in January. Such expectations have undoubtedly heightened investor anxiety.

In my previous discussions, I mentioned a core investment principle: What defines a good investment? It's when you identify an opportunity and have the courage to go in heavily, even leveraging, to pursue returns. Now, I ask all of you to look at the current positions of the three major indices, do they truly offer good value? Would you dare to go all-in or use leverage at these high levels?

Let me be honest with you, I would never do that. This isn't about fear, it's about a deep respect for market risks. The golden rule of capital markets is simple: buy low, sell high. It's an unbreakable principle. History has repeatedly shown that operations leading to significant losses almost always result from going against the trend. I hope every member of our community recognizes this and avoids fighting the trend. Going against market trends not only wastes the cost of your capital but also unnecessarily puts your principal at risk.

So, what's the best choice right now? The crypto market is undoubtedly one of them. The current crypto market offers exceptional certainty and potential, exactly what we need. Investing in an upward-trending market not only makes your efforts meaningful but also maximizes your returns.

Guys, the key to investing is making the right choice! Choose the right direction, then act and commit fully to achieve the results you desire. As Helmsman always says: “Once you’ve identified the opportunity, go all in.” This is our winning formula in the market.

Now is the time to decide. Let go of high-risk, uncertain opportunities and focus your attention and resources on fields with more promise and greater certainty. With wisdom, action, and unwavering belief, secure a truly meaningful investment victory for yourself!

BTC’s current price action is in a standard consolidation pattern, with higher lows forming on the daily chart. We need to closely monitor the key support level at \$99,200. If it breaks, the price could test the next support around

\$97,800. On the upside, the \$104,100 resistance level is a critical point to watch. Should the MACD form another bullish crossover soon, the bulls might gain momentum and push prices to higher levels.

Recently, the correlation between the stock market and the crypto market has significantly increased, with the two becoming more interlinked. The good news is that AlphaStream 5.0 provides us with robust data support. As major data releases amplify market volatility, this creates expanded opportunities for profit growth. As you know, only through volatility can we achieve truly substantial returns.

Our approach is straightforward: leverage this volatility and use precise strategies to lock in profit targets. AlphaStream 5.0 not only offers us unprecedented market insights but also helps us identify clear opportunities within complex fluctuations. With data-driven support and intelligent analytical tools, we can easily identify market signals, act decisively, and capitalize on every wave of volatility triggered by data events.

Folks, every market movement could be a prime opportunity to generate profit. By following AlphaStream 5.0's guidance, let's continue to achieve greatness in this opportunity-rich market! Stay focused, move forward with courage, and remember, opportunity always favors those who are well-prepared.

Folks, just now, with our α & β long strategy, we successfully made a 53% profit once again! This means we not only reached Helmsman's goal of a 300% profit challenge, but we've also exceeded it. This week, this exciting goal has officially been achieved!

Achieving over 300% returns in just two weeks might seem like a routine for me, but for some friends, it might still feel like an unbelievable legend. However, I truly believe that many of our community members have already tasted this sweet fruit. The feeling of success is truly hard to put into words!

Surpassing a 300% profit isn't just a numerical breakthrough, but also a perfect combination of our team's execution and Helmsman's strategy. Every victory is the result of our collective effort, and the best proof of our belief and action.

That said, some friends haven't reached their expected returns. Where's the problem? The key lies in the size of your investment. The same strategy, the same profit rate, but different initial capital results in vastly different outcomes. If your investment is too small, it's naturally hard to see satisfying numbers. So, how do you change this situation?

My advice is simple: with the current increased difficulty of stock trading and a weakened profit effect, instead of locking large amounts of capital in the stock market, shift your focus to the crypto market, a battleground with greater potential. The crypto market is entering a golden era, and AlphaStream 5.0 provides us with unparalleled support and precise strategy signals. Reducing frequent trades in the stock market and allocating more funds to the crypto market will lead to higher returns. Remember, the key to success lies in decisive action and fully committing to opportunities.

Now is the perfect time to change your situation and boost your returns! Increase your investment, concentrate your resources, and focus on the crypto market, and you'll find substantial rewards waiting for you. This isn't just about growing your wealth, it's about embarking on a journey to financial freedom and achieving your life goals.

Folks, the market is our stage, and we are the stars of the show. Conquer this stage with wisdom and courage, give it your all and turn every opportunity into a victory. Remember, your future is in your hands. Stay determined, move forward boldly, and let nothing stand in your way.

These past two weeks have been an epic beginning for us. The 300% profit plan has proven what we're capable of, but don't forget, the real journey is just getting started. Ask yourself: Why are others earning such impressive returns while your profits fall short? What's holding you back, and how can you change it? The answer is clear, now is the time to act! Seize this opportunity, go all out, and push toward your goals, leaving a mark that's truly yours.

Now, join us and witness the miracle of the million-dollar profit journey! This is your chance, don't let it slip away. Take action, and let's go, guys! We've got this!

3:00 PM

Professor Quinlan Sutter (Helmsman)

Afternoon topics:

- 1. The newly appointed Chairman of the House Banking Committee fully supports Trump and is clearing obstacles for crypto investments!**
- 2. Passion December 300% Profit Plan successfully wraps up, creating brilliance once again!**

Good afternoon, my friends!

I'm Quinlan Sutter, your old friend. For those who love trading, time always flies by. A week passes in the blink of an eye, and this weekend is undoubtedly a moment worth celebrating for all those who have joined the AlphaStream 5.0 "Millionaire Club." Not only did our Passion December 300% Profit Plan successfully complete, but we also exceeded our goal! This morning, Samuel Blackwood once again brought us a remarkable return of around 50% on a single trade, and these achievements are a result of our collective effort.

Teamwork, making the right choices, unwavering belief, and decisive execution, these are the four key pillars of our success, and none of them can be overlooked. Behind every successful trade lies the combined efforts of everyone working together. This is not just a victory in terms of numbers; it is the best reflection of the strength and trust of our entire team.

Choosing the right direction, believing in our strategy, and executing decisively, these key factors are what led us to today's success. Every member's contribution is crucial, and it is our unity and effort that have created this brilliance. Friends, today's success is just an important milestone in our journey. There will still be new challenges and opportunities on the road ahead, but as long as we maintain this team spirit, stay firm in our belief, and move forward courageously, we will undoubtedly break through even higher goals and create more miracles.

Let's continue choosing the right direction, firmly believe in our team, and decisively execute our strategy. Together, shoulder to shoulder, we will face every challenge and opportunity in the future, moving toward a brighter and more hopeful future!

Back to the market, we observe that today the three major indices continue to show slight fluctuations and pullbacks, which aligns perfectly with our expectations. The buying power at high levels is clearly weakening, and major institutions are reducing their investment allocations, preparing for the upcoming opportunities in 2025. It's important to note that if the sideways

movement at high levels lasts too long, it could trigger a significant correction, directly filling the gap from November 6th.

Recently, I've repeatedly advised everyone to reduce their market exposure. Until the market completes its adjustment, you should absolutely avoid blindly increasing your stock positions. This not only wastes the time value of your capital but may also put you in a passive position. When the market's profit potential is low, the best option is to temporarily step back and patiently wait for the right opportunity. This is a crucial point in investment trading, you can only maximize your returns by participating in the market at the right time.

Especially in the stock market, the cyclical nature of time is vividly demonstrated. During favorable market conditions, we must be bold and leverage heavily; but when opportunities are scarce, we should decisively stay away. As Samuel Blackwood emphasized in this morning's session, when you identify a clear opportunity, you must have the courage to go in with full force. Opportunities that prevent you from going all-in are essentially unclear and unworthy of participation. Such trades not only fail to deliver the desired returns but may also waste your time and resources.

Friends, seizing certain opportunities and boldly going all-in is the decision-making and action required of a qualified investor. Don't waste energy on unclear opportunities. Keep pace with the market, and wait for your golden moment. By sticking to the right strategy, we will ultimately achieve even greater success!

The soon to be Chairman of the U.S. House Banking Committee announced exciting news this Friday (December 13): when the next Congress convenes in January, he will focus on establishing a new market structure for crypto, removing various obstacles from the regulatory framework. He clearly stated that this move will align perfectly with the policies of the incoming President, Donald Trump. This represents not only a disruptive reshaping of the traditional banking system but also signals the dawn of a new era for the crypto market.

Friends, what does the return of the Crypto President mean? It means the spring of the crypto market will officially arrive! This is a great era that will go down in history, and it's a certainty that no visionary investor can afford to miss. Just imagine, regulatory barriers for community and commercial banks will be removed, and the crypto market will enjoy greater freedom and room

for development. This will undoubtedly attract global capital and talent, sparking a new revolution of wealth.

For us, this isn't just an investment opportunity; it's a chance to change our destiny. The crypto market is at a historic turning point, and it will become the platform for countless individuals to achieve the American Dream. We are witnessing an unprecedented era, one where ordinary people can achieve financial freedom through wise choices and bold actions.

The question now is: Are you ready to seize this opportunity? History has repeatedly shown that great opportunities favor those who are prepared and ready to act. The future of the crypto market will be a feast, and the real winners will always be those who dare to believe and act immediately.

Friends, this is the call of our era! Don't let hesitation and waiting cause you to miss this opportunity that can change your destiny. Let's respond to the call of the times with action, join this great crypto revolution, and create our own legend in the flow of wealth. Believe in yourself, believe in this great era, and believe that the crypto market will open a door to wealth that leads to the future!

In this trading practical training camp, we were fortunate enough to strongly recommend buying Bitcoin around \$60,000, with a target price of \$100,000. At the same time, adding our community token to the investment portfolio significantly boosted overall returns. Since the launch of the AlphaStream 5.0 "Millionaire Club" Million Dollar Profit Plan, we have achieved over 300% total asset return in just two weeks! For many friends, this has been an unprecedented experience. In the past, it might have only been a legendary story heard in passing, but now, it's a real experience for each of us.

Please believe, this is all real, and you are not dreaming. However, compared to the more astounding legendary returns in the investment market, these results are just the beginning. Now, let's calm down and carefully review the profits in our accounts. Have you reached your expectations, or even exceeded your imagination? This morning, Samuel Blackwood also shared a profound truth: The size of your investment directly determines your final returns. The same rate of return with different principal amounts can lead to vastly different profit outcomes. The results of simple participation versus full commitment are worlds apart. Samuel Blackwood has achieved massive success in the investment market precisely because he has always treated every trade with full commitment.

Friends, remember, the opportunities in the market always belong to those who give their all. The goal of AlphaStream 5.0 "Millionaire Club" is to help each member achieve a million-dollar profit through practical experience. So far, some friends have successfully achieved this goal, while others, due to smaller investment amounts, have yet to reach it. This clearly illustrates the importance of the size of the investment principal in determining returns.

This event not only allowed us to achieve outstanding profits but also helped the AlphaStream 5.0 system gain a large number of loyal users ahead of schedule, far surpassing the results of traditional advertising expenditures. I want to thank every friend for your trust and support! In March next year, our community charity fund will officially launch, and I hope more friends will continue to support our AlphaStream 5.0 system and charitable endeavors.

For many friends, the million-dollar profit goal is within reach, however, for some, due to investment limitations, achieving this goal in the short term may require more time and effort. Therefore, I suggest that everyone take some time this weekend to offer valuable suggestions for our plan. We will incorporate your feedback to optimize and adjust the plan, ensuring that every member can benefit from the community.

Friends, our goal is far more than just profit; it is to use our efforts to spread love and hope to those in need. Every donation is like a light that brightens the lives of those who require care. Let's work together to create a better future.

Your participation is not only a commitment to your personal investment but also a responsibility and contribution to the entire community and society. Please actively join the discussion and provide your valuable opinions and suggestions. Your voice is crucial to our future. By brainstorming together, we can continuously improve and elevate our plan to make it even more outstanding.

This weekend, I will carefully organize everyone's feedback and present an optimized profit solution to all friends on Sunday, paving the way for the continued development of our community. I look forward to the active participation and enthusiastic feedback from each community member. With your support, our team can continue to reach new heights.

QTM COMMUNITY

Let's embrace more challenges and opportunities with confidence and determination. Believe in yourself, believe in the team, we are fully capable of achieving our goals and bringing hope and change to more people. I wish everyone a pleasant and fulfilling weekend!

AI 5.0
