Samuel Blackwood

Morning Review (α & β Strategy)

Good morning, members of the community!

I am Samuel Blackwood, and a new day has begun! Let's take a moment to reflect on yesterday's exciting moments. The total asset return of our Passionate December 300% Profit Challenge is now approaching 280%, just one step away from our 300% target! Take a look at your trading account—how are your profits looking? Have you reached your goal?

The AlphaStream 5.0 Millionaire Club is not just a challenge, it's an opportunity to change your destiny. For me, a million dollars is no longer my goal. I know that many in our community have already surpassed a million dollars in profits, and now we are aiming for even higher targets. For those of you who are still working with smaller investment amounts and haven't yet reached your expectations, remember this: as long as you continue to move forward with compound trading, you will ultimately achieve the dream in your heart.

The key to success is—seeing the opportunity and taking part in it. That was the right decision, and you'll never regret it!

Yesterday, the Helmsman once again mentioned the "American Dream," saying that everyone has the right to chase their dreams. This deeply resonated with me. In my memory, every meeting with the Helmsman is filled with passion and energy. His every word seems to ignite a fire within, and at the end of each conversation, he always firmly says, "Guys, now is the time for you to make your choice!"

I am fortunate to have met the Helmsman, a true guide in life. With his help, I have been gradually moving closer to my American Dream. Before joining the QTM community, I, like many others, participated in various investment training programs. However, most of these courses were superficial and didn't truly teach the core knowledge and skills. The results were, at best, mediocre.

Everything changed due to a serendipitous opportunity. I met the Helmsman at an event and was fortunate enough to join the QTM community. From that moment on, I truly found my mentor in the field of investment. He not only

helped me optimize my α & β strategies but also enabled me to make a quantum leap in my trading.

In the last trading session, my capital experienced significant growth. This was not only a technical improvement but also a shift in my mindset. I learned how to identify opportunities in the market and how to maximize returns through strategy. These skills are the result of the Helmsman's years of practical experience and wisdom.

The Helmsman is not only an outstanding investor but also a selfless mentor. His guidance has transformed me from an average investor into a trader who can independently analyze and make decisions. He taught me that success is not out of reach— as long as you have the right direction and the right methods, everything becomes possible.

Joining the QTM community has not only equipped me with investment skills but also introduced me to a team full of support and encouragement. Everyone here is chasing their dreams, sharing experiences and joys with one another. The power of this team is truly the key to helping us move forward.

Guys, on the road to chasing your dreams, finding the right mentor and team is crucial. The Helmsman often says, "The key to success is in the choices you make." Today, I want to tell you that if you're also hungry for success, stop wasting time on those hollow training programs. Join the QTM community, learn from a true mentor, and strive alongside like-minded friends. This will be your best choice on the path to your dreams!

At this point, I must mention the Helmsman. He is an exceptional mentor, someone who truly cares about your growth. He shares his years of investment experience and core strategies without reservation, helping countless people achieve their dreams. Yesterday, after seeing the content he shared, I was deeply moved.

The road to achieving dreams is always filled with obstacles. When you decide to invest in crypto, you'll find that banks, stock brokers, and even others will try to block you. They fear your breakthrough, worried that your success might threaten their vested interests. Society's rules often try to keep most people in place, while those who strive to break free through hard work are often met with skepticism and suppression.

On the path of investment, you'll also face various demonizing remarks. These voices will make you question your choices and even shake your faith. But guys, remember, it's precisely because of these obstacles that we must stay firm in our beliefs and move forward with determination.

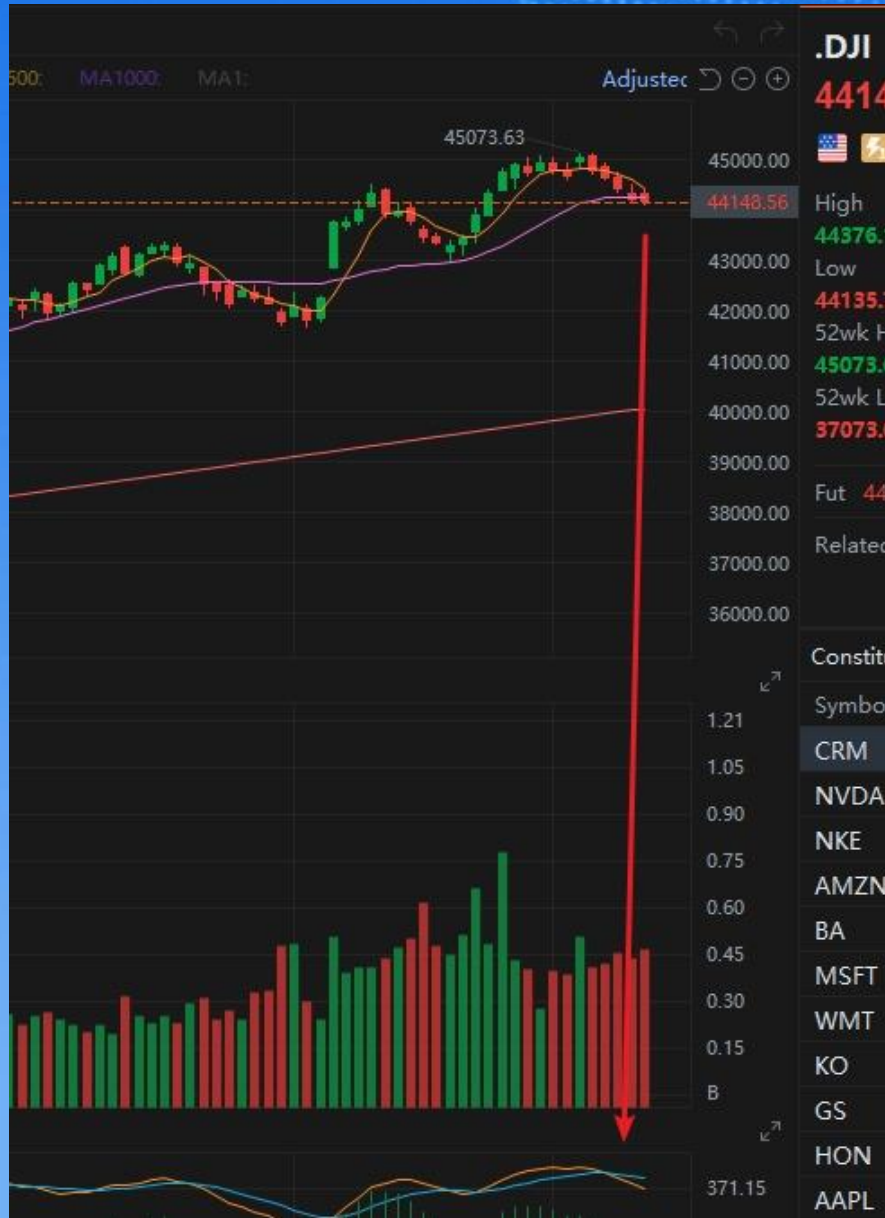

Bravely chasing your dreams is the greatest commitment you can make to yourself. When you decide to step out of your comfort zone, challenge your unknown potential, and pursue the life you truly desire, resistance and criticism are merely the scenery on your path forward. Don't let these voices destroy your will; instead, use your success to prove them wrong.

AI 5.0

QTM COMMUNITY

As shown in the chart above, the Dow Jones has formed a corrective pattern. On the daily candlestick chart, the 5MA has crossed below the 10MA, and the MACD has formed a death cross, suggesting further downside potential. The Nasdaq and S&P 500 are performing slightly better than the Dow, but after hitting new highs yesterday, a pullback today seems likely. U.S. stocks have

been edging higher amid inflation data meeting expectations and growing anticipation of interest rate cuts by the Federal Reserve. The strong performance of tech stocks has been the standout, driving the Nasdaq Composite Index to a historic breakthrough above the 20,000-point mark. This is the first time the index has closed above this level, marking the continued leadership of the tech sector. The S&P 500 ended its two-day decline. However, the weak performance of blue-chip stocks has put pressure on the Dow, indicating that some traditional sectors are still facing challenges.

The U.S. Consumer Price Index (CPI) for November, released on Wednesday, showed a month-over-month increase of 0.3% and a year-over-year rise of 2.7%. Core CPI rose by 3.3% year-over-year.

These figures were in line with market expectations, indicating that while inflation has seen a slight uptick, it remains within a manageable range. This has reinforced market expectations that the Federal Reserve will again cut interest rates at its meeting next week. According to the Chicago Mercantile Exchange's FedWatch tool, the probability of a rate cut has increased from 89% the previous day to 95%. The current rate-cutting cycle by the Federal Reserve began in September this year, with two rate reductions already

implemented to ease pressures from a slowing job market and weak economic growth. The latest inflation data supports further rate cuts by the Fed, and has sparked more lively discussions about a potential rate cut in January. Going forward, the market will closely monitor the upcoming December Federal Reserve meeting, as well as upcoming wholesale inflation data and corporate earnings reports, to assess whether the U.S. economy can regain growth momentum during this rate-cutting cycle.

Guys, when it comes to stock market trading strategies, we need to maintain a clear mind and strict discipline. With indexes surging continuously, blindly buying at high levels is far from a wise choice. If the current market environment lacks clear profit opportunities, you can't find high-value stocks with good risk-reward ratios, or you're unwilling to take the risk of using leverage, then the point of participating becomes minimal. My advice is simple: in the stock market, observe more and act less. Be patient and wait for better opportunities. After the market undergoes a significant correction, step in decisively and choose high-quality stocks with real growth potential. That's an efficient and responsible way to invest. At this stage, chasing stocks at high levels clearly means taking on high risks for limited returns, which not only puts unnecessary pressure on your capital but may also cause you to miss out on opportunities truly worth pursuing.

Remember, one of the core principles of investing is protecting your capital. When market risks outweigh potential returns, choosing to stay on the sidelines isn't a sign of weakness, it's a reflection of wisdom. The market will eventually return to its rightful position, and all we need is enough patience to wait for our moment of victory.

The benefits of investing in crypto are clear: it holds immense potential and exciting high returns, making it an excellent shortcut to achieving financial freedom and fulfilling our dreams. However, it is precisely because of its tremendous opportunities that so many people try to stop you. They fear your success because it means their interests will be redistributed. This is not just a simple investment; it is a battle against traditional forces and old rules.

Courage and faith are our weapons. When you hear those voices of doubt and denial, don't back down—move forward with even more determination. These challenges will only make your goals clearer and your path more defined. The road to success is never smooth, but each time we persevere, we get one step closer to our dreams.

The values of the QTM community are changing the game, disrupting the interests of banks, stockbrokers, and high-cost training institutions. They've set their sights on us, trying to diminish our influence. Guys, this is the moment to test your focus and determination. If your priority is profit, then you need to fully commit to improving your execution and closely following trading signals. But if you let the challenges along the way distract you, you'll fall into the traps they've set and lose your right to chase your dreams.

When you feel uncertain, just ask yourself one simple question: "In the Passion December 300% Profit Challenge, have I made a profit?"

If the answer is yes, it means you're on the right track. The next step is to make an even bolder choice, distance yourself from the voices and people holding you back. Those trying to influence or block you will only slow your progress and might even make you give up on your dreams. Guys, for success, for your dreams, these negative influences must be decisively eliminated!

Particularly for institutions that hinder our investments, like banks with their restrictive controls, I want to say: when the Crypto President fully returns, these issues will gradually fade away. But until then, we must have the courage to say “no.” This is our money, our future, and no one has the right to dictate how we manage our wealth. If we stay committed and act boldly, these obstacles will resolve themselves.

Guys, for our dreams, we must challenge these barriers head-on! They are the “disruptors” trying to shatter our dreams, the stumbling blocks on our path forward. What we must do is hold firm in our beliefs, push forward with determination, and overcome these obstacles. Everyone deserves to pursue their dreams, and we will be the warriors fighting for them.

For the sake of our dreams, we must see more clearly what is right and wrong and face challenges with greater strength. If we persevere and fight bravely, the future will undoubtedly be ours. Don’t let these difficulties weigh you down. Don’t let those who try to block you succeed. They’ll only make you miss out on more opportunities, opportunities that are the key to achieving financial freedom.

According to the signal indicators from AlphaStream 5.0, this afternoon, we will once again have a trading opportunity with a potential profit of over 180%. In my view, achieving the Passionate December 300% Profit Plan is absolutely within reach. Friends, this is an excellent opportunity that we cannot afford to miss. AlphaStream 5.0's signals have never let us down, providing us with accurate market insights and strong profit potential. This afternoon's opportunity will be another moment for us to showcase our strength. Looking back at our past achievements, each time, we have achieved remarkable returns by firmly executing our strategies. Now, this new signal is telling us that the opportunity is here again. What we need to do is seize it and take action without hesitation.

To those of you who are still on the sidelines, I want to tell you that success belongs to those who dare to seize the opportunity. Achieving the Passionate December 300% Profit Plan is not a dream, but a goal that we can easily reach through wisdom and effort. Let's all give our best, harnessing the powerful capabilities of AlphaStream 5.0, and once again push towards new heights. This afternoon, we will prove ourselves through action and create even more brilliance. Remember, the market is our stage, and success belongs to us!

QTM COMMUNITY

Everyone, get ready and follow the Helmsman's strategic guidance this afternoon! Let's go, guys—let's embrace this profit opportunity and create a brilliant chapter that belongs to us! We can do it!

Professor Quinlan Sutter (Helmsman)

Afternoon topic:

- 1. Elon Musk's Net Worth Surpasses \$400 Billion: Success Stems from Making the Right Choices**
- 2. Passion December 300% Profit Challenge: The Wealth Journey in Full Swing**

Good afternoon, my friends!

I'm Quinlan Sutter, your old friend. On our journey through life, we're often faced with pivotal choices, decisions whose significance far outweighs the effort we put in. What you choose and who you trust determine how far you can go. The key to success isn't about avoiding failure but about making the right choices and steadfastly believing in your decisions.

Whenever you stand at a crossroads in life, choosing to trust your intuition and beliefs is the first step toward success. A choice is not just a decision for the present, it's a commitment to the future. Believing in your ability to achieve your goals becomes the driving force that keeps you moving forward. As the Bible says, "What you believe will come to pass." Only when we choose to believe and take action will success reach out to us.

Of course, the journey to pursuing your dreams will inevitably come with setbacks and challenges, but it's these difficulties that make us stronger. Don't fear failure, and don't let obstacles in front of you bring you down. Every challenge is an opportunity to grow, and every moment of persistence brings you one step closer to your goal.

Friends, when you choose to believe in yourself, give it your all and move forward with determination. No matter how rough the road ahead may be, as long as you hold on to your faith, you will ultimately reach the shores of your dreams.

In our QTM community, this belief runs even deeper. This is a platform that supports every choice and effort you make, a place where dreams are realized. Here, we face challenges together and move toward success as one. Choose to believe in yourself, trust in our collective strength, and take bold action.

Let us seize every opportunity, embrace every challenge, and together create the brilliant future that belongs to us!

A heartfelt thanks to Samuel Blackwood for his outstanding presentation this morning. His in-depth analysis of the potential challenges we may face on our investment journey sparked many thoughts for me. In truth, each of us encounters various opportunities and temptations on our life's path. What ultimately determines our success is not the opportunities themselves but whether we have the perseverance to stick to our choices once they are made.

Friends, take a moment to reflect on your past: were there times when you had opportunities that could have changed your destiny? Yet, why didn't they yield the results you expected? Was it because you chose to give up when faced with difficulties or temptations along the way? If you had held firm in your beliefs and persevered to the end, wouldn't the outcome have been completely different?

Our journey through life lasts only a few decades. Striving for our dreams and fighting to pursue our American Dream carries an unparalleled sense of purpose. More importantly, it's not just about accumulating wealth but about creating a better life, one where we can enjoy the company of our loved ones and cherish every moment with those we hold dear.

One day, when we must inevitably say goodbye to this world, we won't carry regrets but instead a treasure trove of beautiful memories, the moments we fought for our dreams, the times spent with family, and the victories achieved through perseverance. Friends, let us cherish every opportunity we have now, whether in investment decisions or life choices. Brave the pursuit of your dreams and stay committed to your path. Living this way is what makes a life truly without regrets.

When it comes to the importance of choices, Elon Musk is undoubtedly one of the most successful examples this year. According to the Forbes Real-Time Billionaires List, Tesla CEO Elon Musk's net worth has surpassed the \$400 billion mark. This achievement is largely attributed to Tesla's stock price soaring nearly 71% this year and the significant valuation growth of SpaceX, the rocket company he founded.

As Tesla's largest shareholder, Musk holds approximately 13% of the company's shares. Tesla's stock has climbed steadily this year, reaching a record high of \$424.90 on Wednesday and continuing its upward trend since the November election. Meanwhile, Musk's wealth has also been boosted by an internal stock sale at SpaceX. According to Bloomberg, SpaceX and its investors agreed to repurchase \$1.25 billion in common stock at a valuation of up to \$350 billion. This not only further solidified SpaceX's leadership in the commercial space sector but also propelled Musk's net worth to new heights.

Additionally, the market is eagerly anticipating the relationship between Musk and President-elect Donald Trump. Investors hope that Musk's potential role in shaping the policy agenda of the new Republican administration could bring new benefits to Tesla, which has been a significant driver of the company's rising stock price.

Musk's success once again proves an essential truth: the choices made at critical moments often outweigh effort. He precisely seized two historic opportunities, new energy and commercial space exploration, and, with extraordinary decisiveness and execution, led Tesla and SpaceX to the pinnacle of their industries. Such achievements not only highlight Musk's exceptional vision but also showcase his fearless courage.

Recently, the investment community has been abuzz with discussions about the impact of the presidential election on business development, and Musk's bold gamble is undoubtedly a focal point. Tesla, as the only company among the U.S. stock market's Magnificent Seven without a clear competitive moat, is highly reliant on government policy support. This is precisely why Musk made this decisive "bet", to secure Tesla's future, leaving himself virtually no

fallback. This kind of fearless determination to fight for his beliefs is something we can all learn from and admire.

Friends, does this fearless spirit inspire you? When faced with important life choices, can we, like Musk, act with courage and decisiveness? For us ordinary people, investing might be the best way to change our destinies. Right now, the crypto market presents just such a clear opportunity. It not only offers the potential for financial freedom but also tests our belief and ability to take action.

What can we learn from Musk's story? Only through decisive choices and unwavering belief can we reach the shores of success. When an opportunity is right in front of you, will you go all in like Musk? This is a moment for everyone to reflect, and a golden chance to change your destiny.

Back to the market, the initial jobless claims for the week ending December 7 were reported at 242,000, higher than both the previous figure and the forecast, indicating that the current labor market still faces significant pressure. Meanwhile, the European Central Bank announced a further 25 basis point rate cut, which has heightened market expectations for a Federal Reserve rate cut later this month.

As shown in the chart, the Dow is still in a sideways consolidation phase, with the gap from November 6 needing to be filled. The timeframe for this is expected to take around two months. This suggests that a clear directional move may not emerge until after January next year. Until then, high-level fluctuations are likely to remain the market's dominant theme.

It's worth noting that after this gap is filled, the stock market may present a new opportunity for growth. However, until that happens, I strongly recommend adopting a wait and see approach, reducing your stock market holdings, and allocating more funds to markets with higher certainty to pursue more stable returns.

As we often say, "Money never sleeps." To maximize its value, funds must be kept in motion. By directing capital toward areas with clear profit opportunities and leveraging the power of compounding, we can achieve true investment success. Friends, wisely adjust your asset allocation and use scientific methods to make your money work for you, this is the best path toward financial freedom!

When it comes to opportunities with certainty, the crypto market is undoubtedly the most compelling field right now. Musk's bold gamble and his full support for Trump winning the presidency have firmly tied his business empire to this historic moment. As the first "Crypto President," Trump will inevitably fulfill his promises to drive the growth of the crypto market after taking office. For us as investors, this represents a once in four years golden opportunity that cannot be missed!

Against this backdrop, the crypto market is poised to create more millionaires and even multimillionaires, making this a true feast for investors. I hope our community members can seize this once-in-a-lifetime opportunity and ride the wave of this historic trend. If you miss it this time, it will be incredibly difficult to encounter such a clear opportunity again.

From a technical perspective, the daily chart of the crypto market has once again surpassed yesterday's high, with key resistance concentrated around the \$104,100 level. However, today's market appears somewhat hesitant, displaying a range-bound consolidation pattern. The real bullish momentum may not emerge until tomorrow, and in the short term, consolidation will likely be the prevailing trend. In such a market, "buy low, sell high" is undoubtedly the best trading strategy.

It's worth noting that the recently released economic data has further strengthened the market's expectation of an interest rate cut by the Federal Reserve this month, which is undoubtedly a boost for the bulls, injecting more positive factors into the market.

Meanwhile, AlphaStream 5.0 has issued a single-trade profit alert of up to 150%. Please be fully prepared, once a definitive trading signal appears, I will notify everyone immediately. Friends, the opportunity is right in front of us, so don't hesitate. Let's seize this historic investment opportunity and participate in the extraordinary returns the crypto market has to offer. Follow the community, follow AlphaStream 5.0, and together, we will achieve our own brilliance in this investment feast!

A warm congratulations to everyone who joined us on time for the “Passion December 300% Profit Journey”! Today, we not only secured substantial profits but also achieved another profoundly meaningful victory. Today’s trade was exhilarating, locking in an incredible 157% return, pushing the cumulative profit rate of our “Passion December 300% Profit Plan” past 1368%, with a total asset return of approximately 314.9%.

In the world of investing, every decision has the potential to change your future. Choosing to believe in yourself, our community, and proven methods and strategies, these are the keys to turning dreams into reality. Every success stems from sound decisions and unwavering execution. The market is full of volatility and uncertainty, but our task is to remain calm, follow the plan, and move forward steadily.

Don't let short-term setbacks or external noise shake your confidence. Remember, your choices determine your future. We must firmly believe that as long as we stick to the right strategies, our dreams will eventually become reality.

Friends, let us maintain this passion and determination, boldly embrace more challenges, and create even greater success! Today's extraordinary achievements underscore the importance of capital management and risk control. No matter how volatile the market may be, only through disciplined strategies and solid execution can we achieve steady victories in long-term investing.

QTM COMMUNITY

The opportunities ahead are endless, and what we must do is stay committed and keep moving forward. Let us join hands as we stride toward our next goal and witness even more victories and glory together! Believe in yourself, believe in our team, and trust in our strategies. The path to success is right at our feet, and together, we will create our own brilliant chapter!

AI 5.0
