Professor Quinlan Sutter (Helmsman)

Sharing Topics:

- 1. Dow's Seven Consecutive Declines—Will Bitcoin Break \$180K?**
- 2. Moving Forward Steadily—The New Era of Wealth Plans!**

Good morning, my friends!

I am Quinlan Sutter, your old friend. Yesterday was a truly significant day for every member of our QTM community! After successfully completing the 300% profit challenge for two consecutive weeks, we combined extensive feedback from many of our friends and officially launched the new Crypto Grammy (200-600%) Profit Challenge Plan. At the same time, we've also introduced VIP Partner Custom Services for all participants, ensuring that everyone can meet their goals according to plan. This not only proves our team's collaborative strength but also demonstrates our confident commitment to the future.

Friends, now is the critical moment to make decision! The opportunity is right in front of us, grab it firmly and do not hesitate. The market changes rapidly, and opportunities slip away in an instant. In the face of such an opportunity, decisive action and increased execution are essential to achieving our goals and moving toward success. Remember, this is not just a trading challenge. It's a moment to change our destiny.

Our challenge is clearly set: Leveraging the market fluctuations brought about by the Fed's interest rate decisions and next month's non-farm payroll data, we've tailored a 200% to 600% profit target for each participant. Based on your capital, risk tolerance, and return expectations, we've carefully designed personalized investment strategies to ensure that every participant finds their path to success.

Simply having confidence is not enough, real action brings change! Strictly following trading signals and acting on them will fully unlock the potential of AlphaStream 5.0. If you can do this, we promise: should you incur losses, we will take full responsibility. This is not just our promise to you but also a testament to the trust in our team and system.

To encourage more friends to actively participate, we have established a generous reward system:

- Outstanding participants will gain free access to the AlphaStream 5.0 system, helping them elevate their investment journey.
- Exceptional VIP partners will receive additional long-term support to make your investment journey even more stable.

More importantly, once the plan is successful, we will officially launch the community charity fund in March next year. Through online and offline charity events, we aim to bring change to more people in need. This is not only our mission but also our way of giving back to society. Success is not just for ourselves, it is about bringing hope and strength to many more people.

Risk management is a must-learn lesson for every investor. While pursuing high returns, we also need to learn how to balance risk. Through the "Wealth Matrix" strategy, we suggest allocating a portion of profits to fixed-income products to build a safety cushion. This is not only a safeguard for financial stability but also a key step toward achieving long-term goals.

Currently, we are in a rare market opportunity, that are Fed rate decisions and the upcoming non-farm payroll data bring unique volatility to crypto market. Seizing such opportunities requires not just wisdom but decisive action. The market won't wait, and opportunities are fleeting, my friends. Now is the time to act! Use your determination and power to make this moment the starting point for changing your destiny.

Many of our friends have already privately messaged us with personalized planning proposals, ready to fully embrace the challenge. This proactive attitude is truly inspiring. With the support of advanced technology (AlphaStream 5.0) and the power of the community, our goals have never been set lightly, they are based on full market insight and sound strategies. Every participant has the chance to find their own path to success in this plan while injecting strength into the community's collective growth.

I deeply understand that, no matter how great the opportunity, it requires everyone's joint effort. This is a new beginning, an opportunity that will change our future. At this moment, I feel incredibly fortunate to be with a group of talented and passionate friends, all chasing our dreams together. Success is not just about growing wealth, it is a reflection of each of our beliefs and efforts.

Friends, the future belongs to those who dare to pursue excellence and seize opportunities. Believe in yourself, trust the team, and believe in the glorious chapter we are writing together. It is time to rise, face the challenge, and move toward the goal! Prove your determination through action, and let's create unprecedented success on this hopeful road!

As shown in the chart, the three major indices show mixed movements. For example, after seven consecutive daily declines, Dow is likely to see a small rebound today but overall, it will continue with narrow-range consolidation. The gap below requires more time to fill, and the high-level sideways movement remains the prevailing trend, waiting for further clarification in market news.

This week, Fed is about to hold an important meeting, and the market widely expects this to be the third rate cut since September. These rates cut expectations have already pushed the S&P 500 index to a record 57 new highs this year. However, despite the strong market performance, we still need to be cautious of potential uncertainties.

From a macroeconomic perspective, inflation and high borrowing costs are still pressures, but the U.S. economy has shown strong resilience. Consumer spending and the job market remain healthy, but the slowdown in the job market also provides an opportunity for the Fed to reverse its policies. The November consumer price report showed inflation rising from 2.6% in October to 2.7%, indicating a slight uptick. This week's core data, Personal Consumption Expenditures (PCE) index is expected to rise further to 2.5%, higher than October's 2.3%. This will be an important reference for the Fed's decision.

While the economy remains robust in the short term, future uncertainties remain high, with factors such as regulatory policies, immigration issues, trade relations, and tax reforms potentially having a profound impact on the market.

In stark contrast to the stock market's high-level consolidation, the sentiment in the Bitcoin market continues to rise. As shown in the chart, Bitcoin broke through after a period of consolidation in the daily candlestick chart, reaching a new all-time high, showcasing strong bullish momentum.

Wall Street asset management giant VanEck, in its latest crypto outlook, noted that Bitcoin and Ethereum are likely to reach new all-time highs in 2025. VanEck made a rare prediction that Bitcoin will reach \$180,000 next year, while Ethereum will exceed \$6,000. According to its report, the first quarter of 2025 could be the first peak of the cryptocurrency bull market, and the entire bull market is expected to last until 2025.

VanEck also listed several key factors driving Bitcoin's price surge:

- 1. The U.S. embraces Bitcoin as part of strategic reserves.**
- 2. Changes in SEC regulation bring more lenient crypto policies.**
- 3. The potential value of tokenized securities could exceed \$50 billion.**

It's worth noting that VanEck's forecast is somewhat more conservative compared to Bitwise's recent prediction. Bitwise expects Bitcoin to reach \$200,000, with Ethereum reaching \$7,000. Regardless of which forecast, these numbers suggest that cryptocurrency prices could nearly double from current levels.

BlackRock suggests that investors adopt the "risk budgeting approach", allocating funds based on an asset's contribution to the overall portfolio risk. This approach, by evaluating asset volatility and correlations with other assets, provides investors with a scientific basis for optimizing portfolios.

In the face of current stock market uncertainties, both BlackRock and VanEck emphasize that increasing investment in crypto market is one of the best

strategies. The crypto market not only demonstrates strong profit potential but also offers significant diversification opportunities for investment portfolios.

Friends, in these three weeks, we stand at a crossroads full of opportunities. I will personally lead you all, ensuring that we achieve our 200-600% profit goals, while also helping each participant master valuable practical skills and improve trading abilities. We plan to execute at least 1-2 trades per day, covering contract trading and index trading in the crypto market, steadily progressing towards our profit goals based on a series of carefully designed strategies.

But how can we safely increase profits in trading? The answer lies in establishing a wealth matrix. This matrix is carefully designed, including a diversified investment portfolio ranging from stocks to the cryptocurrency market, spot trading, contracts, high-yield financial products, and the crypto composite index, with the goal of bringing us unexpected returns. This is not only a key strategy for increasing profits but also the core of our investment philosophy.

In execution, a risk balance strategy is crucial, especially by selecting high-yield financial products to build a solid "safety cushion" for our funds. The financial

products provided by COINIXIAI Trading Center are the perfect tool for this strategy. Through lending, trading, mining, and other diversified profit models, these products not only provide golden opportunities for capital appreciation but also allow us to participate in and share in the rapid development dividends of the crypto market.

Specifically, we recommend investing 20% of the total assets in 30-day financial products after completing the basic work for the profit plan to ensure steady growth of some funds. After each contract or crypto index trade, reinvest 50% of the profits into these financial products, which will not only accumulate wealth but also diversify risk, ensuring the steady development of our investments.

This method is not a simple suggestion, but a key strategy we have derived from long-term practice, it's an important reflection of our investment philosophy. After purchasing, please share screenshots for verification. This is not only a confirmation of the trading process but also allows us to guide everyone toward success with greater confidence.

Faced with such an opportunity, as a mature investor, will you choose to stand by or go all-in? With the wealth matrix already in place, I am ready to lead everyone confidently as we navigate the challenges ahead! This week's discussion goes beyond just AlphaStream 5.0's basics, while foundational knowledge is essential, what we already know is enough to handle 90% of the market's opportunities. The key is how to use it flexibly and maximize returns.

Starting this week, I will lead everyone through hands-on learning to deeply explore the core secrets of profit growth, including:

- How to leverage large capital to make more precise trades and maximize investment returns.**
- Two major safe methods to increase profits: Increasing short-term trading frequency and flexibly combining medium-to-short-term trading styles.**

At the same time, we will answer a key question: Why do the trading frequencies and profitability of the VIP partner groups differ? This not only reflects the adaptability of different capital accounts to trading cycles but also involves deep techniques for risk control and profit growth. These concepts will run through this week's practical operations, allowing everyone to learn the real core knowledge in trading.

Therefore, this week is not only a critical stage for rapid profit growth but also a fantastic opportunity to learn the essence of investing. Please manage your time wisely, stay in sync with us, and move toward higher goals together!

Friends, future investment experts, and loyal supporters of AlphaStream 5.0, the time of market volatility and soaring profits has arrived. I deeply feel your passion and excitement, this is the strongest affirmation of our decisions and beliefs! At this moment, we stand at a historic crossroads, and the AlphaStream 5.0 Crypto Grammy (200-600%) Profit Challenge has been launched in full swing. Our super-profit journey is smoothly taking off.

Do you, like me, feel this unstoppable excitement? Let me tell you, this is not just an ordinary profit plan, it's a gateway to financial freedom and a transformative change in destiny. Look at the results we've already achieved, the moment that will completely change our life trajectory is within reach!

Right now, we are like riding a spaceship toward the unknown, and the next stop could be the "Mars" of the investment world. This journey is not just about wealth, it's about exploring and embracing the infinite possibilities of the future.

QTM COMMUNITY

Therefore, I firmly believe that the AlphaStream 5.0 Crypto Grammy (200-600%) Profit Challenge Plan is a new starting point, the first step toward even greater achievements. At this moment, I am filled with passion and emotion because our shared beliefs and dreams are inspiring us to move forward relentlessly! Friends, let's go all out, seize opportunities, and write our investment legend!

- Total Asset Return Target: 800%-1500%

Trading Style: A combination of short term and mid term strategies, flexibly responding to market changes

Dear friends, explorers of AlphaStream 5.0! At this moment, we are presented with a clear and exciting wealth blueprint before us. It's not just about profit, but it's about changing our lives, enhancing our quality of life, and even completely reshaping our future.

VIP 1 Junior Partner Group: A Complete Upgrade of Lifestyle!

Imagine driving your dream car every day, wearing your favorite brands without hesitation on price, every trip is heart-driven, not limited by budget; social events become a part of life, no longer a burden. With AlphaStream 5.0, the stable income each year not only allows us to enjoy the present but also provides greater security for the future. Most importantly, it ensures the best education for our children, allowing them to grow up alongside future leaders, while also laying a solid foundation for our own retirement life. We start from the ordinary, but our goals are never ordinary.

VIP 2 Intermediate Partner Group: A Luxury Opportunity for Social Mobility!

In this competitive society, many are trapped by the pressures of life, but we have a complete opportunity to change our destiny. This year, our goal is a major wealth leap, from a million to ten million dollars, no longer an unattainable dream. With AlphaStream 5.0's support, we can retire early and improve our

lives entirely. This is not just about wealth accumulation, it's a leap in life. Imagine not just having financial freedom but also the freedom of time and choices, everything begins here.

VIP 3 Senior Partner Group: The Ultimate Dream of Luxury and Freedom!

Sea-view villas, business class travel, yacht vacations, these are no longer fantasies but attainable realities. Through precise investment strategies and the support of AlphaStream 5.0, we achieve financial freedom and completely transform our lifestyle. Financial freedom not only makes money our servant but also gives us time to pursue health, family, and charity. In the future, we will enjoy luxury living and become advocates of social responsibility, bringing hope and change to more people.

Now, it's time to act!

Friends, this is not just a strategy, it's a declaration of changing destiny! This afternoon, we will continue to search for new opportunities in the market, and Samuel Blackwood will lead everyone in the deep dive. Before that, I hope

everyone will act according to this morning's strategy: use 20% of your funds to purchase 30-day financial products to protect our profits and prepare funds for future investments. This step not only safeguards wealth but also sets the stage for future profits.

Let's look ahead together: After we succeed, how will we change our lives and our families' lives? Those once unattainable dreams, those lost beautiful lives, will be reignited by our efforts. AlphaStream 5.0 is not just a tool, but a mission for our generation. Now, let's welcome this wave that belongs to us and create the brilliant future for each of us!

I am with you, co-dreaming. Let's move forward toward a better future with firm belief and solid action!

Samuel Blackwood

Closing Commentary (α & β Strategy)

Good afternoon, members of the community!

I am Samuel Blackwood, and yesterday, Helmsman brought us an exciting piece of news: the AlphaStream 5.0 - Crypto Grammy (200%-600%) Profit Challenge has officially launched! This is not only a thrilling adventure but also a gateway to high-return opportunities.

Looking back at the previous 'Trading Practical Training Camp,' when Helmsman precisely identified the main upward waves of quality stocks like NVIDIA, SMCI, and MSTR, he decisively advised us to act boldly: buy call options or even use leverage to enter directly! At that time, some were still hesitating, while others had already gone all-in, seizing the opportunity without a second thought, myself included.

QTM COMMUNITY

This kind of all in investment requires not just courage but also a deep understanding of the market and absolute confidence. You have to admit, when a true opportunity presents itself, that unwavering belief in success is enough to overcome all doubts. It is precisely this steadfast conviction that allows us to stand out in the market and achieve remarkable returns.

Although the previous 'Trading Practical Training Camp' didn't utilize AlphaStream 5.0, many participants still achieved exceptional gains, with some even surpassing the million-dollar profit mark. Yet, surprisingly, these results didn't even make it into the top ten of the overall profit rankings! What does this tell us? In investing, choosing the right direction is undoubtedly important, but even more critical is knowing how to maximize your returns.

Take, for instance, the Passion December 80% Profit Challenge two weeks ago. Although we achieved a 300% return rate, some participants' actual profits were less than ideal. Why? Because of insufficient capital. For example, if your investment amount is \$5,000, even a 500% profit would only yield less than \$30,000. And opportunities like this don't come around often.

QTM COMMUNITY

So, folks, seizing the opportunity at hand is absolutely crucial! You need to go all in and participate without hesitation to ensure you have no regrets. The key to success lies in how you capitalize on every opportunity.

Once you've made the right choice, act decisively. Don't hesitate, don't waver. Only by putting your full effort into every trade can you truly achieve your goals and maximize your returns. Every trade is a step toward your dreams, every decisive, all in effort is a cornerstone of your success.

Now, Helmsman has prepared powerful tools and strategies for us. This is not just a challenge, it's a moment to prove our determination and courage. Folks, this is our battlefield. Let's seize the opportunity, dive into the AlphaStream 5.0 - Crypto Grammy Challenge, and charge toward our brilliance!

During the Passion December Profit Challenge, despite achieving an impressive 300% return rate, some friends didn't meet their expected targets. In response to this feedback, Helmsman quickly adjusted strategies and, based on the upcoming Federal Reserve interest rate decision and next month's Non-Farm Payroll data, developed an all-new three-week profit plan: AlphaStream 5.0 - Crypto Grammy (200%-600%) Profit Challenge!

What's even more exciting is that Helmsman has tailored personalized investment plans for everyone and specially created a VIP Partner Group to provide us with deeper support and guidance. So, here's the question, folks, How much profit are you aiming for over the next three weeks? Is it \$200,000? \$500,000? Or over \$1 million? I've already increased my investment amount and am fully committed to this challenge!

This opportunity is unprecedented, and AlphaStream 5.0, with its precise data support and profound market insights, will safeguard our investments. Helmsman's strategies and guidance not only enable us to navigate the market with ease but also help us achieve groundbreaking returns.

But remember, success has never belonged to those who hesitate. It belongs to the brave, decisive, and fully committed! Are you ready?

This morning, Helmsman shared his plan with great excitement, and I could feel his enthusiasm. He's not only proud of past victories but also filled with confidence about the brilliance we're about to create. This day, folks, isn't just an ordinary day, it's a turning point in changing our investment destiny!

If you haven't fully grasped Helmsman's grand plan yet, let me put it simply and directly: WEALTH MATRIX, this is our navigation chart! It's not just a strategy, it's a blueprint that helps you identify the best investment opportunities based on your risk preferences and market conditions. This is the key to wisely allocating resources and maximizing wealth.

The power of the WEALTH MATRIX lies in its precision and personalization. It is tailored for each participant, helping us identify the best entry points amid market fluctuations. Through it, we are not merely investing, we are building our own wealth empire.

Folks, let's take action! The WEALTH MATRIX is not just a concept, it's a revolution. With it, we can take the initiative in the market and achieve our goals of financial freedom. This is not just a strategy, it's our future.

Let's return to the stock market and carefully review the recent strategies. As the chart indicates, the Dow rebounded after seven consecutive trading sessions of decline, which aligns with our expectations. However, it's worth noting that, according to the α & β Strategy, the signal for this downward adjustment has not yet fully concluded. After a short-term fluctuation, it's likely to dip further to fill the lower gap.

The current rebound is primarily driven by sector rotation hotspots, but the overall market is still awaiting more clarity on rate cut policies. Until sustained

rate cuts are implemented, the market is expected to remain cautious. Additionally, the three major indices are still at elevated levels, leading to weak buying momentum, with most stocks struggling in a state of fluctuation. In such a market environment, locking in stock profits promptly becomes particularly important.

The five key points recently provided by Helmsman are worth our careful consideration and execution:

- **Key Point 1: Lock in Profits**

For stocks that have already generated profits, now is the time to decisively sell and secure those gains. In a fluctuating market, the best strategy is to buy low and sell high. If profits are not locked in promptly, profitable stocks could turn into losses with market volatility. Don't let hard-earned gains slip away.

- **Key Point 2: Streamline Positions**

For stocks with excessive gains, it's best to close positions and sell. The market is currently experiencing frequent shifts in hotspots, and the time lag between fading old hotspots and emerging new ones could leave positions in a passive

state. Maintaining lighter positions will make your funds more flexible and better prepared for upcoming market changes.

- **Key Point 3: Redeploy Funds**

Reinvest the funds from sold stocks into more certain opportunities. For example, allocate 20% of the funds into 30-day high-yield financial products, which form a critical part of our profit plan. This approach is akin to preparing ample supplies before an adventure, ensuring we can navigate market fluctuations with ease.

What's the next step? If you've already taken action according to this plan or are fully prepared, please inform Helmsman immediately. Next, he will lead us to face even greater challenges and opportunities, ensuring that we move forward in the best possible condition.

- **Key Point 4: Leverage the Power of Capital Advantage with Precision**

Folks, our goal is clear, utilize substantial capital for precise operations to maximize profits. So, what are the advantages of large-scale capital operations? First, substantial funds allow for more flexible position adjustments in the

market, enabling us to seize the best trading opportunities. Second, during market fluctuations, large capital can better diversify risks while amplifying the profit potential of individual trades. How can we harness these advantages? Don't worry. Helmsman will unveil these powerful winning strategies in detail this week. These strategies are not just techniques, they're the key to victory.

- **Key Point 5: Increase Short-Term Trading Frequency to Skyrocket Profits**

In this rapidly changing market, the frequency of short-term trades directly impacts our profit growth. Like a sports car accelerating, the precise combination of timing and execution can cause our returns to soar instantly. By frequently capturing opportunities in market fluctuations, we can quickly accumulate wealth in a short period. This process is not only exhilarating but also immensely rewarding. Now, with AlphaStream 5.0 and Helmsman's personal guidance, we have strong support. These two elements form the core of the perfect blend of fund management and strategy.

My α & β system is built on these principles: α focuses on long-term trends, while β captures short-term fluctuations. This dual-track strategy combines stability with explosive potential. Are you ready? I'm here not only to join this

treasure hunt but also to seize opportunities, increase my investment, and follow Helmsman's guidance to maximize the profit plan.

Talking about 200-600% returns? Folks, that's merely our starting line. This year has offered us a golden opportunity, one that propels us into the realm of success we've always dreamed of. When we speak of rising to the challenge, it's not just about ambition, it's the roadmap to our victory.

Let's give it our all and seize this golden opportunity. We have the strategy, the team, and Helmsman's wise guidance. Every step we take from here is a stepping stone toward our dreams. Folks, this isn't just an investment plan, it's a journey toward success. Are you ready to join me in uncovering this treasure? Let's prove with our actions that victory belongs to those who dare to fight for it!

Folks, the three month sprint plan has officially launched!

If everything progresses as expected, not only will we achieve our goals ahead of schedule, but we'll also have an epic celebration. And let me tell you, this won't be an ordinary celebration, I've already planned to retire early and start

truly living my dream. This isn't boasting, it's a reflection of confidence and determination.

We stand on the edge of success, with our dreams within reach. Just one final push, and we can reach the other side. This is not a journey for one person alone, it's the result of our collective effort. Helmsman's guidance, the support of AlphaStream 5.0, and our dedication are paving the way to greatness.

Three months is more than just a goal, it's a journey to pursue our dreams. During this time, we will give it our all, seizing every opportunity and achieving every target. Every investment we make is a battle fought for our dreams. When we succeed, what awaits us is not just wealth but freedom. At that moment, we'll celebrate not only our achievements but also the persistence, effort, and courage it took to change our destiny.

Early retirement and living your dream are no longer distant fantasies, they're becoming reality. Folks, this is a rare opportunity in our lives. Seizing just one such chance is enough to change your life forever. We're fortunate not to have endured the storms and setbacks Helmsman once faced, but for this very reason, we must treasure the opportunity before us.

For those who missed the Passion December 80% Profit Challenge, this time, you can't afford to let it slip by. The AlphaStream 5.0 Crypto Grammy 200-600% Profit Plan has already launched, and these three weeks will be a turning point in our investment journey. Missing this chance means losing the starting advantage to redefine your future.

Now is our new beginning! Folks, these three weeks are not just a challenge, they're a time to fight for your dreams. A 200-600% return is only the starting point, our goals are even greater and more brilliant. Every trade we make is a foundation for freedom and dreams.

Remember, success belongs to those who dare to act and give it their all! Let's fight for our dreams, strive for our goals, and turn every day into a moment of creating miracles! Folks, the future is in our hands. Let's go, success is right in front of us!

Alright, team, today's strategy is just the prelude, the real excitement is yet to come. Through our strict execution of the α & β bearish strategy, we've already secured considerable profits. But let me remind you, this is just the beginning, the main course hasn't been served yet. The upcoming Crypto Grammy 200-600%

Profit Plan will be the highlight of the next three weeks and the centerpiece of our grand feast.

The most critical thing now is for everyone to be fully prepared to face greater challenges. If you've already taken action based on today's strategy, make sure to inform Helmsman. He is currently allocating personalized VIP/1/2/3 Partner Groups, which will be an excellent opportunity for you to achieve higher profit targets. Remember, we are not just participating in a profit plan, we are chasing dreams and creating endless possibilities for the future.

Folks, tomorrow is our day. It's not just another day, it's our moment to seize opportunities and achieve new heights. The market is like our playground, where every rise and fall hides potential wealth. Success is never a coincidence, it is the result of every wise decision and decisive action. Today's strategy was just the foundation, tomorrow's challenges will be even more exciting.

Make sure you're fully prepared and in the right mindset to welcome new victories. If you can give it your all and seize every opportunity, you'll realize that this plan is not just about trading, it's a journey to change your destiny.
