Professor Quinlan Sutter (Helmsman)

Morning Review (α & β Strategy)

Good morning, my friends!

I'm Quinlan Sutter, your old friend. Once again, the morning sunlight awakens us, signaling a fresh start and a day full of possibilities. Today, I want to talk about the power of "PERSISTENCE."

Friends, success in life is never achieved in an instant. It is a long-term endeavor where persistence is the key to victory. When you encounter difficulties, remember: as long as you don't give up, the dawn will always break. Do you recall Edison's famous words? "Genius is 1% inspiration and 99% perspiration." It was this relentless effort and persistence that led him to invent the light bulb, illuminating the world. Similarly, in our own lives, there are moments when persistence determines our success or failure.

The world doesn't care how many times you've failed or how much sweat you've shed, but when you stand at the pinnacle of success, everyone will applaud your achievements. Imagine those moments of exhaustion during your struggles, those times when you almost gave up, when all of these become the foundation of your success, you'll understand the true meaning of persistence. This spirit is precisely what our QTM community advocates.

As Bible says, "If you abide in My word, you are truly My disciples. Then you will know the truth, and the truth will set you free." This reveals the profound essence of persistence. Whether in faith or in action, only persistence can lead to true freedom and success. In the world of investing, this is especially critical. Markets are filled with volatility and uncertainty, but those who persist in learning and optimizing their strategies are the ones who reap significant returns over time.

This is exactly what we do at QTM. By adhering to scientific investment methods and leveraging the powerful capabilities of AlphaStream 5.0, we steadily achieve our profit goals. In both life and investing, every step forward requires persistence. Like a marathon, ultimate victory belongs to those who believe in themselves and remain steadfast.

Theme 2: The Meaning of the "Battle of Kings"

Dear friends, as we face the challenge of the "Crypto Oscar" profit plan, I have never felt more driven by purpose. This critical moment is not just another investment challenge but a true "Battle of Kings." It tests our collective resolve, determination, and courage, providing an unparalleled opportunity to advance in our investment journey.

Goal 1: Complete the "Battle of Kings" before March

The goal of this battle is clear and resolute to help every one of you, driven by dreams, passion, and courage, ascend to your rightful throne. This is our time to rise, our opportunity to secure a place in investment history. The "Battle of Kings" is not just a testament to profitability but a reflection of our relentless pursuit of dreams. This is the era of collective endeavor, the time for you to write your legend.

Goal 2: Foster Potential AlphaStream 5.0 Subscribers

The significance of the “Battle of Kings” extends beyond immediate returns; it lays the groundwork for the future. Through this battle, we aim to cultivate more supporters for AlphaStream 5.0. It’s not just about enabling more people to benefit from its powerful features but about building a community of smart, supportive, and forward-thinking successful investors. Every supporter becomes a testament and co-creator of our success.

Goal 3: Establish Our Community Charity Fund

With AlphaStream 5.0’s launch, I will focus more on establishing our community charity fund. This isn’t just a result of our achievements but a way to give back to society, a manifestation of our love and responsibility for the world. The “Battle of Kings” is the beginning of this grand vision, a symbol of our united pursuit of financial success. It represents our steadfast commitment to finding a balance between wealth and goodwill.

Why call it the “Battle of Kings”?

The name “Battle of Kings” embodies our fearless pursuit of success and the courage and determination we hold as community members. You may currently

be experiencing a low point in life, burdened with exhaustion and challenges, but believe me, none of that matters. What matters is that you still carry dreams, still yearn for change, and still have the will to fight for your inner glory!

Friends, let us face this “Battle of Kings” with unwavering courage, seize the opportunities of our time, and claim the glory that is rightfully ours!

Theme 3: Requirements and Suggestions for Actions

Dear friends, to achieve this magnificent goal, we must set higher standards for ourselves. This is not just a challenge but a beacon guiding us toward our dreams. Here, I'd like to share three key points: requirements, commitments and rewards, and the true understanding of time and money.

Requirements, Commitments, and Rewards

Everyone participating in the "Crypto Oscar" profit challenge plan must strictly adhere to the "wealth matrix" I have designed. This is a critical step in building the most robust investment fortress. Let me reiterate: if you strictly follow our trading signals and encounter losses, I will take full responsibility. This is my promise and a principle I have upheld throughout my investment career.

However, for those who fail to strictly execute the plan, I cannot take responsibility. Investment requires discipline and full commitment. Only with complete trust and execution can we achieve our goals together.

To inspire action, I have prepared special rewards for those who excel:

- **Top 10 performers: One year of free access to AlphaStream 5.0 Institutional Edition (valued at \$2 million).**
- **Ranks 11–30: One year of free access to AlphaStream 5.0 Personal Edition (valued at \$150,000).**
- **All participants meeting the profit standards: 6 months of free access to AlphaStream 5.0 Personal Edition (valued at \$75,000).**

These rewards are not only recognition of your efforts but also significant support for your future investment journey.

Money Never Sleeps; Time is Money, Principal Determines Returns

Friends, now is the time to gather funds seriously and go all in for this “Battle of Kings.” Crypto market is presenting a massive and rare opportunity, the non-farm payroll data next week is expected to trigger 600% market volatility. This is a historic moment, and with the anticipated return of the crypto president, this market will see even more exciting changes.

A Special Reminder: The goals of the “Crypto Oscar” profit challenge plan will reset to zero, excluding previous gains. This means a fresh start and an

extraordinary opportunity. Those who have achieved millionaire status in earlier challenges are now at the threshold of becoming multi-millionaires. This success depends entirely on whether you are willing to give it your all.

Returning to the stock market, today's release of the December ISM Manufacturing PMI showed an actual value of 49.3, higher than both the previous figure and the forecast of 48.4. This is an encouraging report! While the Manufacturing PMI remains in contraction territory, its better-than-expected performance undoubtedly injects some positive sentiment into the market. Manufacturing is often seen as a barometer of economic health, and such data hints at signs of recovery.

For the stock market, this is undoubtedly a double-edged sword. On one hand, better-than-expected economic data could boost investor confidence, providing short-term support to the market. Technology and industrial sectors, in particular, stand to benefit as a manufacturing recovery could drive demand in these areas. On the other hand, this performance may raise concerns about the Federal Reserve's monetary policy. Investors might begin to question whether the Fed will maintain its hawkish stance due to the improving economic data, potentially delaying future rate cuts.

Currently, the greatest concern for the stock market stems from elevated valuations, with many stocks offering increasingly unattractive risk-reward profiles. If the upcoming Q4 earnings reports fail to meet market expectations

or show signs of slowing growth, a market correction or downturn will almost be inevitable. As shown in Figure 1, the daily candlestick chart of the S&P 500 indicates that the gap from the November 6 opening will eventually need to be filled. Meanwhile, Figure 2 reveals that after more than a year of consistent upward movement, the monthly candlestick chart of the S&P 500 appears to be setting up for a monthly-level correction.

Even though the market is filled with anticipation for the return of Crypto President Trump, it will be difficult to replicate the significant index surge seen in 2024. The global economy is facing downward pressure, and the U.S. stock market will likely require a major correction before it can regain upward momentum. For Trump, this will be one of the key challenges of his early administration.

However, the return of the Crypto President has a vastly different impact on the crypto market. With the United States leading the way by incorporating Bitcoin into its national strategic reserves, more sovereign nations are expected to follow suit. The rise of crypto capitals will drive a global investment frenzy. This highlights a crucial point we need to understand, compared to the stock market, significantly less capital is required to drive substantial gains in the crypto

market. In contrast, sustained stock market rallies rely on the performance growth of quality publicly traded companies rather than being driven solely by news sentiment.

Helmsman repeatedly emphasizes that successful investors must learn to focus. Concentrating on markets with higher certainty yields greater returns. Right now, the crypto market is at such a pivotal moment. Once this market fully matures, it will likely transition into a cyclical investment phase similar to the stock market. For now, however, its profit opportunities and potential are unquestionably superior.

Folks, this is a generational wave of wealth transfer! Focusing on the crypto market and seizing this golden opportunity is not just an investment, it's the foundation for our future financial freedom. Trust Helmsman's strategic vision, and trust your own ability to take action. In this market of certainty, give it your all and make your dreams a reality!

Folks, do you remember each of our profit challenges? From the initial 80% Profit Challenge to the current Crypto Grammys Profit Challenge (200-800%), we've forged ahead together, achieving these goals through action under

Helmsman's guidance. This journey is not just about accumulating numbers, it's a testament to our growth and transformation.

Now, it's time to take a moment to reflect, how much profit have you made so far? I understand that everyone's profit amount may differ, as it's closely tied to your initial capital. But remember, as long as you've achieved your target profit percentage, you are successful! By being part of this remarkable journey and seizing every opportunity, you've accomplished something truly worth celebrating.

To those who participated in the 80% Profit Challenge, have you already felt the magic of compounding? And to the partners who joined the Crypto Grammys Profit Challenge, I'm confident that your account balances are growing at an astonishing pace. Regardless of the size of your initial capital, as long as you steadfastly follow Helmsman's guidance and consistently execute the strategies, you have already laid a solid foundation for your future.

Investing is not just about immediate returns, it's about achieving long-term financial freedom. Every share, every strategy from the Helmsman is designed

to help us pave the way to the future. These plans not only deliver substantial short-term gains but also reveal greater goals and possibilities on the horizon.

The journey of investing is bound to be filled with challenges, but it's these very challenges that make us stronger and wiser. Remember, market fluctuations are never our enemy, they are our allies in seizing opportunities. Let's continue to follow Helmsman's lead, maintain a high level of execution, and stay firm in our beliefs. Regardless of how the market evolves, we must stick to our strategies and seize every profitable moment.

Folks, from past data comparisons, it's clear that achieving our next profit target has become even simpler. Do you feel the same confidence? This time, Helmsman has set a clear timeline for our "Battle of Kings" profit plan, aiming to complete it within 6 to 8 weeks. Importantly, once the target is reached ahead of schedule, the plan will conclude immediately. This might be the last profit challenge before the official launch of AlphaStream 5.0, making it an opportunity you simply cannot afford to miss!

For all participants, this is not just a chance to earn profits, it's also a test of action and execution. Success will only favor those who seize the moment and

give it their all. At the same time, our community's charity fund is set to launch in March, and this profit activity lays the foundation for donations to the fund. Through our efforts, we'll attract more attention and involvement in charitable causes, continuing the power of love. This is not only Helmsman's vision but also a shared mission for each of us.

In addition, AlphaStream 5.0 is set to officially launch in March. You may have already noticed the impressive surge in the community's QTM token prices recently. This positive news has driven its value higher, and many have doubled their assets by purchasing the token. While these returns may not yet compare to our contract trading results, they have already significantly outperformed the recent stock market yields.

This is the perfect example of how choice outweighs effort. As Helmsman often says, choosing the right opportunity is the key to success. Right now, we stand at a pivotal moment of choice. Seize the opportunity to maximize your efforts and contribute more to our goals and charitable endeavors.

Folks, Helmsman is about to have an incredibly busy schedule! With AlphaStream 5.0 stepping onto the global stage, it's introducing new strategic partners, including Japan's SoftBank Group. This isn't just a major step toward globalization, it's a moment for AlphaStream 5.0 to showcase its strength to the world. At the same time, our community's charity fund is about to be established, a milestone of pride for every member of our QTM community. Helmsman will focus on these critical tasks, and without a doubt, this battle calls for the full commitment of each and every one of us.

Our goal is clear, profits of 300%, 600%, 1000%, and beyond! Reflecting on our previous profit plan, we achieved 200%-800% returns in less than three weeks, which has already proven the effectiveness of our strategies and our capability. I am confident that with the same level of execution and determination, we can achieve this new goal by March.

Time is tight, but with full commitment, this is absolutely achievable. This is not just a test of our execution but also a challenge to our teamwork and resolve. We need every member to invest in this battle with unwavering confidence, turning our efforts into even greater achievements.

Folks, I've said it before: seizing time is like chasing feathers in the wind, every day of delay is a missed opportunity. The power of compounding works the same way, it grows your wealth like a snowball rolling downhill. Imagine starting with \$1 million, aiming for \$10 million. On the first day, you might only earn \$200,000, but by the second day, it could grow to \$500,000, and eventually, in the final days, you could see astonishing returns of \$2 million! This is the magic of compounding, the real loss isn't the small gains at the start but the massive rewards at the peak of the curve after time has worked its magic.

Do you see it now? It's like collecting seashells on the shore. At first, you might only find small, ordinary ones, but if you keep going, you'll eventually discover the rarest treasures. The essence of compounding lies in persistence, continuously investing time and effort to let your returns grow exponentially.

Folks, now is the time to act! Let's hold firm in our belief, follow Helmsman's lead, and give our all to meet this challenge head-on. Together, through our execution and team spirit, we'll create even greater brilliance! This isn't just about numbers growing, it's about our shared commitment to dreams and success.

Imagine your investments steadily growing month by month, with returns compounding like a snowball, ultimately reaching a number that seems almost unbelievable. This isn't a fantasy, it's the tangible magic of compounding! Every effort you put in today lays a solid foundation for massive rewards tomorrow. Don't underestimate those small gains, they'll transform into extraordinary results in the future.

Now is the time to seize the opportunity and harness the magic of compounding as an accelerator for your wealth growth. Time is money, and every second matters. By committing your time, energy, and capital, you can one day stand at the pinnacle of wealth, enjoying the abundant rewards compounding has to offer.

Helmsman once shared a strategy: the mid-term trading approach of "large capital, small positions, low risk, high returns." In leveraged markets, this strategy is almost regarded as "diamond-level", simple, comfortable, low-error, yet capable of delivering high win rates and extraordinary profits. Isn't this the ultimate technique for chasing the big fish in the market? Reaping both the fish and the net, what a deeply satisfying experience!

Imagine claiming our throne in the crypto market through Helmsman's "Battle of Kings" plan. His ace strategies are our most powerful weapons, whether navigating short-term fluctuations or capturing long-term trends. Once you've mastered these strategies, every trade will be executed with confidence, and every profit will be a thrilling achievement.

Large capital, small positions, low risk, and high returns, this is not just a simple slogan but the broad avenue to financial freedom. Imagine being able to calmly seize opportunities in a volatile market without being plagued by fear and anxiety, what a sense of victory that would be! This is the ultimate learning opportunity and your golden ticket to building a perpetual profit machine.

Folks, didn't that last trade just fill everyone with confidence? In less than 30 minutes, we secured a substantial profit. This brings me to an important topic: position allocation and why the strategies for VIP1 and VIP2/3 Partner Groups differ.

For friends in the VIP1 Partner Group, I recommend using 20% of your position size. This approach may involve a small degree of risk, but it remains well within a manageable range. For those in the VIP2/3 Partner Groups, given the larger

capital involved, adopting a 10% position size is the most prudent choice, offering an almost zero-risk, effortless investment experience. History has shown that, whether VIP1 or VIP2/3, our strategies are exceptionally precise, and in the end, everyone walked away with a smile. This is the essence of steady investment.

As Helmsman often emphasizes, large capital with small positions is the most comfortable way to navigate the market. This method not only effectively reduces risk but also helps us maintain a calm mindset amidst market fluctuations, allowing us to achieve higher returns with steady progress. That's why proper position management is crucial for every investor. What do you all think?

Starting next week, in response to Helmsman's call and to share some of his responsibilities, I'll be providing more strategies and insights to help everyone seize the tremendous opportunities in the crypto market. We'll dive deep into index strategies and trading, leveraging α & β strategies to pinpoint contract trading opportunities with precision. My focus will be on high-profit, stable strategies to ensure every participant can maximize their returns.

Right now, many friends are ready and eagerly awaiting the start of this investment feast. The starting gun for the Battle of Champions has officially fired! Let's take the lead, stand at the forefront of the market, and embrace the brilliant victory that belongs to us.
