**Professor Quinlan Sutter (Helmsman)**

**Morning Review**

**Good morning, my friends!**

**I'm Quinlan Sutter, your old friend. A new week has officially begun. Are you ready to embrace the thrilling challenge of this week's Non-Farm Payroll 600% profit opportunity? Last week was undoubtedly monumental for every member of our QTM community. We proudly launched the much-anticipated AlphaStream 5.0 Crypto Oscars (300-900%) Profit Challenge Plan. This is not just a new investment plan but a milestone in our journey toward excellence and realizing our dreams.**

**The significance of this plan is self-evident. The AlphaStream 5.0 Crypto Oscars Challenge aims not only to help every participant achieve unprecedented market returns but also to cultivate a loyal base of supporters ahead of AlphaStream**

**5.0's global launch. This isn't just about wealth growth, it's a testament to our abilities and a comprehensive display of wisdom and courage.**

**Why should we participate in this plan? Because it embodies our unwavering pursuit of success and infinite hope for the future. Each participant comes with dreams, seeking to find their own path to victory in this market filled with opportunities. As the Bible says, "I can do all things through Him who strengthens me." With steadfast faith and relentless effort, we can overcome challenges and achieve our goals.**

**Even more crucially, this challenge is not just an economic feast but a transformative experience in our investment journey. Through this challenge, you'll have access to cutting-edge market analysis, precise trading signals, and the most systematic strategic guidance. This isn't just about trading, it's about expanding our perspectives, strengthening our mindset, and elevating our abilities.**

**Joining this plan is not just about profits, it's about breaking through personal limitations and achieving growth. Together, we will face the market's ups and downs, overcome investment challenges, and welcome the dawn of victory. The**

**opportunity is right before us, don't hesitate, and don't retreat. Let us fully commit to this "Battle of Kings," using our wisdom, courage, and determination to create miracles together.**

**Believe in yourself, believe in the team, hold firm to your faith, and persevere. Through this plan, we are sure to write a more brilliant chapter in this market brimming with opportunities. Over the past few days, I've received countless messages from many of you, and seeing your enthusiasm and preparation fills me with immense pride. Many are ready to charge ahead, and I, too, am fully prepared to lead everyone toward this unprecedented profit goal.**

**Yesterday afternoon, I once again emphasized the importance of swift action in the face of certain opportunities. Friends, let us not repeat the regrets of those who missed out during the stock market surge in the first half of 2024! Starting today, I will lead everyone in an all-out sprint, striving together for our shared goals. If we succeed in achieving this target, it will mark a monumental milestone in QTM community history, a victory worthy of the record books.**

So, how will I guide everyone to better achieve these goals? What key areas must we focus on, and how should we execute with precision? Today, I'd like to delve into these questions with you, so we can march toward success with passion and confidence into this new chapter of triumph.

From Chart 1, we can clearly see that the Dow Jones daily candlestick chart remains in an adjustment phase, with the Bollinger Bands' midline showing a distinct downward slope at a 45-degree angle and the MACD operating below the zero axis. This pattern is particularly noteworthy at this juncture. Reflecting on the adjustment period between August and October 2023, we observe that the Dow underwent nearly three months of decline before stabilizing. Chart 2 reveals that the Dow only found its footing after a three-wave downward trend during that period. Whether a similar three-wave correction will be necessary this time remains to be closely monitored.

Currently, the market's profit-making effect is limited to a few localized swing opportunities, with no substantial overall profit potential evident. During this period of uncertainty before Trump's return to the White House, a strategy of "observing more and acting less" might be the most prudent approach. A new wave of opportunities may only emerge when market sentiment significantly improves, and investor optimism returns.

Moreover, it's worth noting that this year did not continue the typical "Santa Claus rally," which refers to gains in the last five trading days of the year and

**the first two trading days of the new year. This reflects investors' cautious stance regarding high valuations and economic prospects.**

**So I once again recommend the following asset allocation strategy: retain 20% of your capital in the stock market and allocate 80% to the cryptocurrency market. This distribution is not only rational but also enables us to navigate effectively across different markets while achieving higher returns.**

**By continuously refining our wealth matrix and allocating half of each profit to 30-day short-term investment products, we can gradually see rapid growth in the funds within our investment accounts, soon surpassing our initial capital. This is the essence of making profits work for us. Once these investment funds multiply, we can take bolder steps in crypto futures trading, pursuing the kind of high returns that once seemed unimaginable.**

From Bitcoin's daily candlestick chart, we can identify a key trend: after stabilizing earlier than the stock market during its decline, Bitcoin has begun to rebound. This undoubtedly injects new vitality into the market. However, a cautious analysis is essential. Current technical indicators show that while Bitcoin's MACD has formed a bullish golden cross, previous signs of a bearish divergence at the top indicate that the likelihood of a substantial short-term surge remains limited.

Before the return of the "crypto president," Bitcoin's price movement is likely to favor high-level consolidation. This signals that the market is awaiting clearer catalysts. Under such circumstances, our primary strategy should be

**adaptability, focusing on buying low and selling high to capture profits amidst short-term fluctuations.**

**The current market structure still requires consolidation to correct indicators, providing us with ideal conditions for short-term contract trading. Whether going long or short, as long as the market volatility is sufficient, there will be room for profit. This unique aspect of the cryptocurrency market enables it to create astounding profit opportunities within a short period.**

**It is worth noting that this Friday's non-farm payroll data will be released, marking a highly anticipated market event. According to our analysis, this data could trigger a profit wave of up to 600%! Such volatility is rare, and the high-frequency fluctuations in crypto market offer us ample operational space. This is an opportunity no investor should miss.**

**From Wall Street whales to national governments, Bitcoin is transitioning from a personal investment tool to a critical component of global economic strategy. As more countries focus on Bitcoin and integrate it into their reserves, the global economic landscape will undergo significant transformations in the future.**

**As investors, this trend sends a clear message: Bitcoin is no longer just a short-term investment opportunity, it is a core asset for the future global economy. As Grover Norquist aptly put it, “Bitcoin is slowly but surely becoming the focal point of government discussions, with businesses and nations worldwide gravitating toward a Bitcoin standard.”**

**Friends, history is being written before our eyes. The era of the cryptocurrency market is here. Let us seize this opportunity, stand at the forefront of this transformation, and play an active role in reshaping the global economic order! Now is the time to demonstrate our commitment to action. With AlphaStream 5.0's precise data analysis and strategic support, we are fully equipped to achieve substantial returns in the upcoming non-farm payroll-driven market volatility. Let's stay focused, capitalize on every fluctuation, and embrace the rewards the market offers!**

**Despite my busy schedule, I have decided to prioritize our ambitious “Battle of the Kings” mission. This means temporarily reassigning some tasks to secondary importance, ensuring that we can go all out at critical moments and seize the most valuable opportunities in the market.**

Critical market data is often released during the early trading hours. Starting today, I will focus on these pivotal moments, sharing my insights and strategies with you. This not only lays a strong foundation for the day's trading but also provides invaluable guidance for every decision we make in our mid-term trading plans. This strategic adjustment reflects our sharp market acumen and positions us to take advantage of high-volatility scenarios.

Particularly, we will focus on the CBF/USDT trading pair. During prior public tests, CBF/USDT demonstrated extraordinary volatility, surpassing that of BTC. This potential has been fully validated and is expected to continue offering high-return opportunities. In essence, CBF/USDT is a "blue ocean" in contract trading today. With the support of AlphaStream 5.0, we will navigate this familiar territory confidently, capturing every wave of profit.

**THE MOST  
MOTIVATIONAL POSTER EVER**

$$1.01^{365} = 37.8$$

$$0.99^{365} = 0.03$$

In our journey toward financial freedom, understanding the power of compound interest is crucial. It is not only a core principle of wealth growth but also a profound reflection of life's wisdom. Recently, I have had exchanges with several friends and noticed varied reactions, some expressed regret over missing key trading opportunities due to busy schedules, while others were surprised by the ambitious 300%, 600%, and 1000% targets set by the "Battle of the Kings" plan. Regardless, the shared solution is clear: seize the moment and commit to action.

Let's use a simple assumption: a 60% return on 10% of our funds translates to a 6% total asset increase. Initially, this might seem modest, but repeating this process 10 or 20 times yields 79% and 220% growth, respectively. A \$100,000 principal would grow to \$179,000 or even \$320,000. That's the power of compound interest, each small victory lays the foundation for a prosperous future.

However, realizing the miracles of compound interest requires time, something not all of us can afford. For many, the key to wealth growth is not only leveraging compound interest but also seizing definitive opportunities to quickly grow our principal.

**Warren Buffett's incredible wealth growth through compounding was achievable because his initial capital base was in the tens of billions. For those with smaller current asset bases, growing from millions to tens of millions purely through compounding can be painstakingly slow, even unrealistic. But the market has now presented us with an extraordinary opportunity, this week's non-farm payroll data event, with a single expected return of 600%, could become the critical turning point to rapidly expand our capital!**

**I hope everyone recognizes that the current opportunity in crypto market represents a rare chance for wealth acceleration. By fully committing to this opportunity, we can achieve significant short-term capital growth and lay a solid foundation for subsequent compounding returns.**

**In our "Battle of Kings" plan, we will utilize scientific strategies, disciplined execution, and unwavering confidence to turn every trade into a stepping stone toward financial peaks. The volatility of crypto market, combined with the robust support of AlphaStream 5.0, provides us with a clear direction. This isn't just about generating profit, it's about personal breakthroughs and growth.**

**While our journey has been illuminated by the brilliance of consecutive victories, it's essential to remember that every triumph is hard-earned, forged through patience, strategy, and relentless pursuit of excellence. As we progress, cherish each victory, because these cumulative successes pave the road to monumental wealth.**

**For those who may face setbacks along the way, don't fear or retreat. Our community remains your strongest support system. We will stand by you, guide you, and work together to recover losses and amplify gains. As Bible says, "I can do all things through Him who gives me strength." Challenges are temporary, and your faith and actions will lead you toward success.**

**If you need personalized strategies to overcome your current obstacles or to surpass your targets, feel free to message me any time. I will design a plan tailored specifically for you along with my team, helping you overcome challenges and achieve your dreams. Each setback is a valuable learning experience, and every fall is an opportunity to start again.**

**Let's consider some scenarios:**

- **Achieving a 10% total return on each trade can lead to a 405% total return after 17 trades, hitting the VIP1 group's 300% profit target.**
- **With 22 trades, total returns could reach 714%, meeting the 600% profit target.**
- **After 26 trades, total returns may hit 900%, and this is just a conservative estimate!**

**Such goals are not far-fetched. With our low-risk, high-yield, high-win-rate model, scientific fund management, and disciplined execution, we can amplify the power of compounding exponentially.**

**The power of compounding lies not only in numerical growth but also in the size of the principal. The difference between \$1 million and \$2 million in profits is evident. This is why going all-in is critical to achieving our goals. Every trade and every step forward represents a vital building block toward immense wealth. Time and patience are success's best allies, and AlphaStream 5.0 serves as the critical tool to identify the best market opportunities.**

**Friends, don't let hesitation hold you back. Opportunities are here, and only action can transform potential into reality. Let's unite and leverage the strength**

**of AlphaStream 5.0, seizing every market fluctuation to achieve our ambitious goals steadily.**

**I would like to especially thank Samuel for his hard work during this period. He took time off from work to join our community and share his trading experience and valuable experience with everyone. This spirit of selfless dedication and highly professional attitude has deeply influenced each of us.**

**Samuel's success is not only due to his excellent trading skills and deep insight into the market, but more importantly, his unlimited enthusiasm for investment and unremitting efforts. He never backed down because of market fluctuations, but faced the challenges head-on, leading every step with firm belief.**

**Every sharing is an opportunity to ignite our enthusiasm. Samuel helps us to absorb the essence from his experience, so that we can avoid detours on the investment road and go more steadily and further. His efforts and achievements tell us that success is never accidental, but the result of all-out efforts and continuous persistence.**

**A warm congratulations to our VIP3/2 partner groups! In a recently executed short-term chart trade, we swiftly achieved profits of approximately 130% and 60%! This is yet another perfect demonstration of the synergy between our team's intelligence and execution. Now, I recommend allocating half of this trade's profit into a 30-day wealth management product to further solidify our Wealth Matrix as a robust foundation for long-term growth and financial stability.**

**This victory is not merely about numerical success but marks a significant milestone in our "Battle of Kings." It represents a new starting point toward market dominance, where understanding and applying the power of compounding propel our wealth to exponential growth. Every profit builds the foundation for our future, and every step forward paves the path to our dreams.**

**Special reminder for everyone. Later this afternoon, Samuel will be delivering another brilliant session, sharing his market insights and professional expertise. This will offer deeper investment perspectives and help us seize the next wave of opportunities in the market. These sessions are invaluable assets on our journey to success, don't miss out!**

**Since the trading signals provided by AlphaStream 5.0 vary in strength, in order to ensure that every friend in the VIP partner group can maximize their opportunities, we will notify everyone as soon as possible even if important signals appear at a time that is not publicly shared.**

**If you have ample trading time or wish to engage in more trades tailored to your schedule, please contact me or my assistant directly. We will design a customized trading plan that aligns with your specific circumstances. This initiative is not only a strategy to enhance returns but also a testament to our special support for all VIP partner group members.**

**Dear friends, this is an exceptional benefit and a reflection of our team's dedication to helping every member achieve their goals. Don't miss this chance! Success in trading often stems from timely action and precise planning. Together, let's fully harness the immense power of AlphaStream 5.0 to achieve remarkable success in this promising market.**

**The market always belongs to those who dare to act and relentlessly pursue excellence. Let's move forward together with scientific strategies and steadfast execution, scaling new heights of wealth and success! Believe in yourself, trust**

**QTM COMMUNITY**

**the team, and stay committed to your dreams. Regardless of market fluctuations, we will stand in the light of victory and create new triumphs!**

**Wishing everyone continued success in the upcoming trades, let's achieve greatness together! ✨**

**3:30 PM**

**Samuel Blackwood**

**Countdown to the Non-Farm Payroll 600% Profit Challenge: Final 4 Days!**

**Closing Commentary ( $\alpha$  &  $\beta$  Strategy)**

**Good afternoon, members of the community!**

**I'm Samuel Blackwood, and this morning, Helmsman placed special emphasis on the importance of compounding. This is no coincidence, it's because the power of compounding is the key to achieving exponential wealth growth. Friends, there's one thing you must firmly remember: compounded returns are closely tied to the size of your principal investment. If you aim for significant returns, your investment principal must grow accordingly. This is why, when faced with opportunities of certainty, we must give it our all. Only by quickly**

growing your principal can you seize even greater opportunities ahead. Otherwise, while others are enjoying financial freedom and living life to the fullest, you might still be struggling to chase your goals.

Compounding is not just a numbers game; it's our most powerful wealth-building tool. If you know how to leverage it, your capital will grow like a snowball, getting larger and larger, bringing us closer to the goals of the Battle of King Profit Plan, returns of 300%, 600%, or even 1000%.

Looking back at the past 30+ trades, our win rate has been astounding, and all the credit goes to the exceptional AlphaStream 5.0 profit system. Its precise analysis and real-time trading signals have given us confidence with every move. Through AlphaStream 5.0, we're not just trading; we're systematically building a solid foundation for wealth and steadily advancing toward financial freedom.

Folks, let's unleash the full potential of compounding! This is the secret weapon to skyrocketing your returns to new heights. Imagine this: starting from the second test, we've already secured a 60% return. Then, the Passion December 80% Profit Challenge hit the accelerator, propelling returns to nearly 300%.

**Following that, during the AlphaStream 5.0 Crypto Grammy (200-1500%) Profit Challenge, our VIP1, VIP2, and VIP3 partners achieved staggering returns of 141.61%, 487.06%, and 888.54%, respectively, like hitting the bullseye at every market turning point!**

**Imagine this: if your starting capital was \$500,000, through this series of meticulously designed plans, your profits could now exceed \$7 million in pure returns! That's the astonishing power of compounding when it's fully unleashed. So why haven't some people reached this level yet? The reasons are simple: hesitation, missing the rhythm, lack of sufficient funds, or being tied up with work. If you're not satisfied with your current returns, the Battle of King will be your golden opportunity.**

**This time, we've all had ample preparation, and the Battle of King is just getting started. Sprinting to join now is undoubtedly the best choice. As I often say, "Compounding is like planting a tree. What you lose isn't just the day you didn't plant it, but the day you ultimately miss out on its abundant fruits."**

**Seizing the opportunity is not just a smart decision; it's the true way to take control of your destiny.**

**So, friends, stop hesitating! Market opportunities are fleeting, and decisive action is the key to success. Prepare your funds now, lock in your targets, give it your all, and join us as we sprint toward this iconic Battle of King. This is our chance to create miracles together and your best opportunity to achieve your wealth dreams.**

**Now is the moment to decide your future. Don't let this opportunity slip through your fingers. Join us and let's write a brilliant legacy together through action!**

Today, the three major indices primarily exhibited a pattern of choppy rebounds and recovery. Taking the S&P 500 (SPX) weekly candlestick chart as an example, the market is gradually moving toward a short-term accelerated topping phase, with signs of weekly-level corrections becoming increasingly apparent. At this stage, trading is particularly challenging, even minor rebounds in a few heavyweight stocks can push the indices higher, but the profitability effect for individual stocks remains difficult to sustain.

There are two key aspects of the current market fundamentals that warrant close attention:

#### 1. The Federal Reserve's Hawkish Stance and Fiscal Concerns

Last December, the Federal Reserve's hawkish meeting, combined with concerns over the U.S. fiscal situation, further intensified upward pressure on interest rates. At the same time, a political battle over the U.S. debt ceiling is looming. The Treasury Department has already begun preparing to use special accounting measures to avert a potential default crisis starting in mid-January. However, if the Trump administration, as some in the market expect, pushes to raise or eliminate the debt ceiling, fiscal policy may face a prolonged standoff in the future, which would undoubtedly heighten market anxiety.

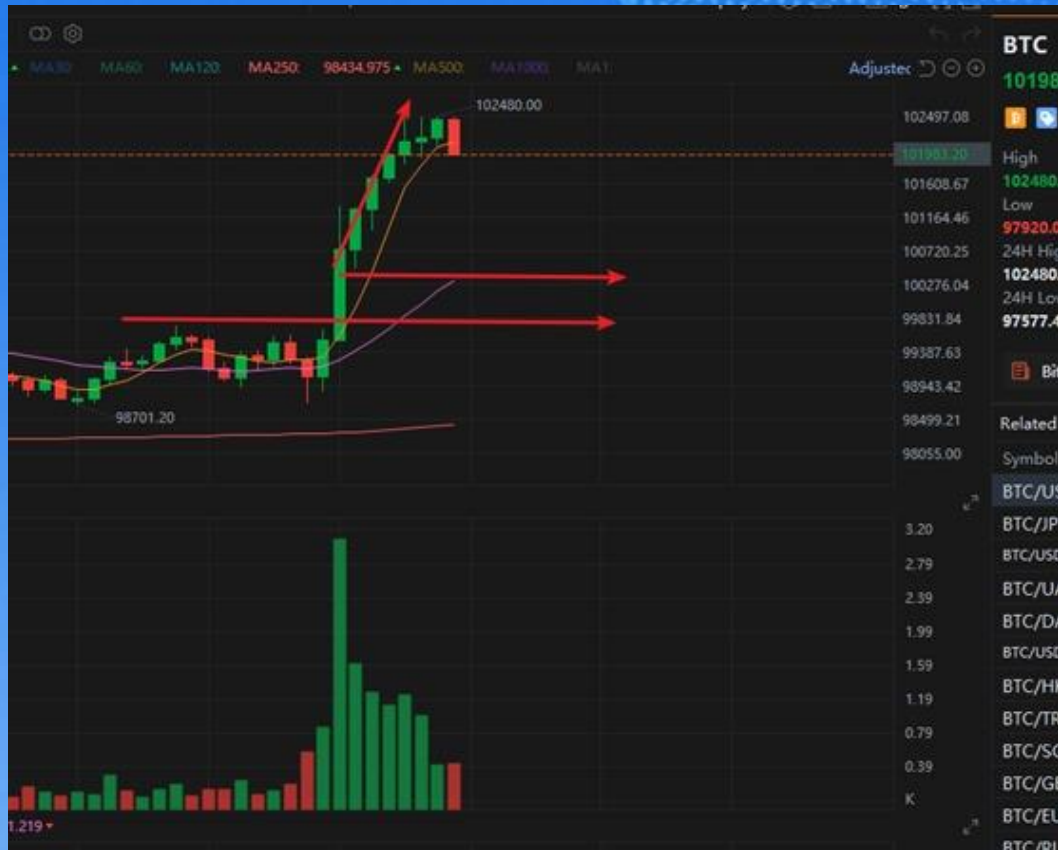

## **2. Uncertainty Around Trump 2.0 Policies**

**While the market holds high expectations for the Trump administration's deregulation agenda, related rulings from the Supreme Court could complicate the process and hinder policy implementation. This potential uncertainty could dampen market optimism, leading to greater risk exposure for U.S. equities.**

**In summary, the current recovery rebound in the market may only be a short-term phenomenon, as underlying "gray rhino" risks are gradually emerging. For investors, this is a time to remain vigilant, prioritize risk management, and flexibly adjust investment strategies to navigate the upcoming volatility. As Helmsman often says, "The more complex the market, the more important it is to respond with simple and steady strategies." Folks, focusing on the balance between risk and reward is the wisest choice at this stage!**

As Helmsman previously mentioned, the recent movements of the U.S. stock market and Bitcoin have shown a high degree of synchronization. Notably, Bitcoin had already stabilized ahead of the stock market and initiated a rebound upward. While U.S. equities saw a modest bounce today, the profits from our long positions in the VIP3/2 partner groups this morning were quite substantial. Looking at the 15min candlestick chart, it's evident that after breaking out of the consolidation zone, the market entered a slight upward trend. However, the daily

**candlestick chart reveals that the upper band of the BBands is a clear resistance level, which warrants close attention.**

**Every trading day this week is critical, especially the upcoming Non-Farm Payroll (NFP) data release on Friday, which could present a single profit opportunity of up to 600%. This is an unprecedented challenge and a feast full of potential. To seize this exceptional opportunity, we must start preparing now and approach this battle in our best form.**

**Get ready for the excitement and challenges ahead, folks! During the calm phases of the market, we might take a moment to rest, but when a powerful trend surges like a tsunami, that's the moment for us to go all-in and showcase the full potential of contract trading! In times of gradual market fluctuations, we are like sharks in the deep sea, patiently waiting for the perfect opportunity. This is our golden chance to execute meticulously crafted strategies with precision. This isn't just an ordinary opportunity, it's the rallying cry that ignites our passion and determination!**

**I can clearly sense that the Crypto Oscars 300%-900% Profit Plan is rapidly approaching us. This opportunity will be as spectacular as a volcanic eruption, igniting our passion and hope.**

**Everyone, this is our golden moment, show your strength and take action to write a brilliant future for yourself!**

**Helmsman's strategic planning has paved the way for us, and every step ahead is crucial. Now is the time to seize this unprecedented opportunity and embrace the victory that belongs to us. Let's work together to make every trade a cornerstone of our success, building a solid path toward achieving our dreams.**

**Are you ready? Let's sprint forward with unwavering determination and embrace the dawn of victory! Folks, this battle is ours!**
