Samuel Blackwood

Morning Review (α & β Strategy)

Good morning, community members!

I'm Samuel Blackwood, and the new week has begun. Are you ready? As Helmsman said, today's Non-Farm Payroll (NFP) showdown will be the true test of our "Battle of Kings." I know many of you are fully prepared, and we've spent more than two weeks getting ready for this day. If you haven't stocked up on enough ammunition, this is your last chance, act now!

It's truly exciting to face this momentous day together! NFP data has been released, what kind of market volatility will it trigger? How much profit can we extract from the crypto market? The answers are right before us. The long-awaited moment is finally here.

The AlphaStream 5.0 trading signals are currently being finalized and could be released at any moment. When an opportunity arises, we must act decisively and take the lead. The large volatility cycle has begun. This is not only an excellent opportunity for wealth growth but also a moment to showcase our execution and teamwork. Don't hesitate. Don't just watch! As Helmsman says, "Action is what separates winners from spectators." Now is our time to prove ourselves. Go all out and participate in this exciting large volatility cycle to achieve new profit peaks!

Yesterday, Helmsman gave us an inspiring NFP showdown mobilization, guiding us to adjust our mindset and fully commit to this critical battle. His actions and wisdom showed us that the power of compounding is the core of asset growth. Every step is solid, and every profit brings us closer to our goals. One million dollars in profit, it's not just a number, it's the baseline target we must all achieve by March.

Today's NFP data is not just a trading opportunity, it's a chance to stand at a new starting point for profitability. It's a springboard to higher peaks and a new key to unlocking wealth. Let's give it our all, seize every opportunity brought by market fluctuations, and use precise strategies and decisive actions to capture

this once-in-a-lifetime NFP battle. Friends, today is not an ordinary day, it's a day to write legends together!

Folks, today's Non-Farm Payroll data has indeed caused a stir! The newly released figures show that 256,000 jobs were added, exceeding both the previous value and forecasts, while the unemployment rate came in lower than expected. These two indicators are undoubtedly bullish for the U.S. dollar, signaling that the resilience of the U.S. economy remains strong. The market reacted quickly, with the dollar index experiencing a short-term surge following the release.

**What impact might this have on the stock and crypto markets?
Let's break it down:**

- **Stock Market Reaction:**

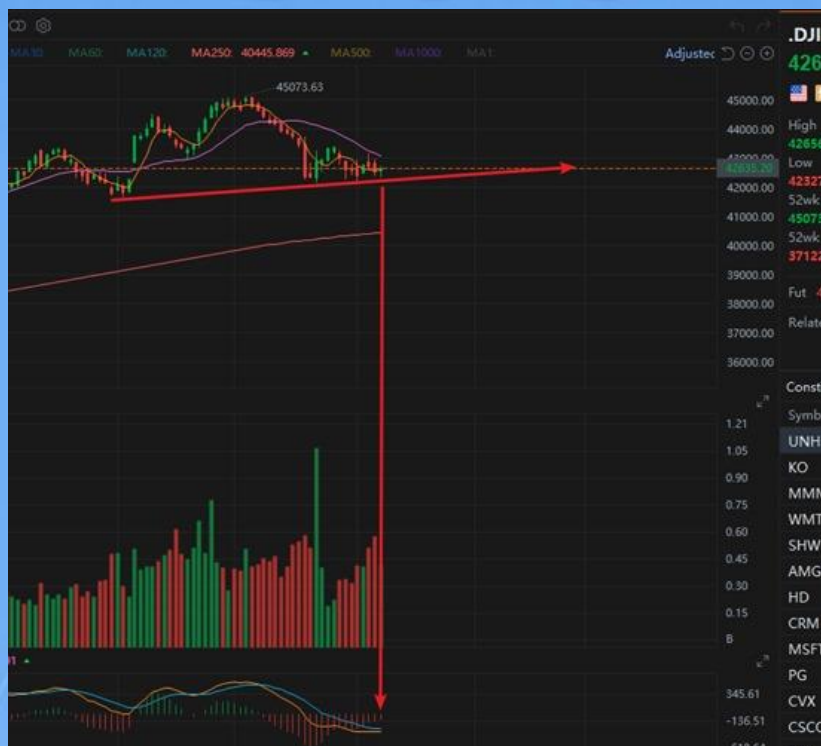

The strong Non-Farm Payroll data suggests that the labor market remains robust, but it also heightens expectations that the Federal Reserve might continue its tight monetary policy. In the short term, the stock market may face pressure due to concerns over rising interest rates. High-valuation tech stocks, in particular, will require stronger fundamental support to offset the impact of higher rates.

- **Dollar Movement:**

The strong employment data provides support for the dollar, driving the dollar index higher. This could put pressure on international investors, as a strong dollar tends to attract more safe-haven capital into U.S. assets.

- **Crypto Market Opportunity:**

While a stronger dollar might create short-term pressure on crypto assets like Bitcoin, the independent and cyclical nature of the crypto market could turn this dip into an excellent opportunity to go long. With Bitcoin currently finding strong support around \$90,000, the volatility triggered by the Non-Farm Payroll data might act as a catalyst for a breakout.

Recently, we've observed a high correlation between the stock market and the crypto market. Taking the Dow Jones as an example, the daily candlestick chart shows signs of slight stabilization, with a potential short-term rebound. The MACD is about to form a golden cross upward, but it's worth noting that this cross is below the zero line, indicating that the rebound's strength may be relatively limited.

For stock market strategies, Helmsman has long pointed us in the right direction: every rebound is an excellent opportunity to sell at a high. From a technical perspective, the daily candlestick chart could form a three-wave decline, requiring extra caution. At least until February, expecting a comprehensive stock market rally seems unlikely. The mainstream expectation remains a volatile adjustment, and only when individual stocks regain cost-effectiveness will it be the best time to buy into a new upward trend.

So this raises a key question for everyone to ponder: if both the stock market and crypto market rebound today, which market will you choose to participate in to seize the more certain opportunity?

Friends, let's speak with data and facts. In the current market environment, the crypto market's volatility and profit potential far exceed that of the traditional stock market. Through AlphaStream 5.0's precise signals, we've repeatedly validated the crypto market's ability to generate high short-term returns, opportunities that arise almost daily. In contrast, the stock market's cyclical nature and current technical limitations make its short-term profits relatively constrained.

One critical logical point to understand is that stock market profits typically rely on cycles, often taking days or even longer to materialize. Small wave profits are usually quite limited. More importantly, once the stock market enters a downtrend, risks tend to grow exponentially, making it difficult to balance returns and risks. In contrast, the crypto market offers greater flexibility and potential, which the stock market cannot match.

We must adopt a strategic mindset: abandon small opportunities and fully pursue big ones. This is the secret to all successful investors. Under the same market conditions, some people only earn scattered small profits, while others make substantial gains. This entirely depends on whether the choices are correct. The essence of investment is not blind participation but wise selection.

Today, crypto market anticipates a 600% single-wave volatility opportunity, a golden opportunity that cannot be missed. Once captured, it will yield returns far exceeding those of traditional markets. This is not just a chance for profit but a moment to reshape the investment landscape.

As Helmsman says, in the face of certain big opportunities, we must go all out. Such opportunities don't come every day; they are gifts from the times and a chance to change our financial destiny. Are you ready? Let's move forward with confidence and decisiveness, embrace this extraordinary investment feast, and seize the brilliant future that belongs to us!

Friends, the impact of the NFP data will extend into the next one to two weeks, and the market's volatility cycle is gradually unfolding. From now on, please closely follow the VIP Partners group's trading strategies. Be sure to keep up with the trading pace and seize every profit opportunity!

By analyzing Bitcoin's daily candlestick chart, we can clearly see that the market is currently operating within a consolidation range. However, the likelihood of breaking out of this range today is very high! According to Helmsman's box theory and the strong support around \$90,000, we observe a significant amount

of buy orders accumulating in this area, making it a golden opportunity for long positions.

Over the past 3 days, Bitcoin has experienced consecutive declines. With the precise trading signals provided by AlphaStream 5.0, we successfully captured the profits from this bearish movement. If you review your account and find that your returns are below the average, it's time to reflect on your strategy and execution. The market is fair, but opportunities are always reserved for those who are well-prepared and act decisively.

This recent decline has once again perfectly validated Helmsman's perspective: the MACD bearish divergence is a highly reliable indicator. Despite Bitcoin's earlier attempt to break higher, it failed to surpass critical resistance and instead entered three consecutive days of adjustments. The alignment of technical and fundamental analysis allowed us to navigate these market fluctuations with confidence.

It's worth emphasizing Helmsman's key investment philosophy: Technical analysis reflects fundamental realities, and candlestick charts are the ultimate representation of market sentiment. Whether it's positive or negative news, it

will always manifest in the price movements on candlestick charts. Understanding and respecting these technical patterns is not merely about following rules, it's about gaining deep insight into market logic.

So, friends, as you face market fluctuations, remember this: Rises and decline in prices are naturally revealed by the market. Mastering technical patterns and following market logic will enable you to capture opportunities with precision and avoid unnecessary risks.

The latest market dynamics are undoubtedly making the future of cryptocurrencies even more exciting! Based on AlphaStream 5.0's big data analysis, a remarkable operation is unfolding in the Bitcoin market. Just before news broke that the U.S. government had approved the sale of \$6.5 billion worth of Bitcoin, a whale deposited 300 Wrapped Bitcoin (WBTC) on Binance, valued at approximately \$28.5 million. Shortly after the news surfaced, Bitcoin prices dipped to a low of \$93,299, and the whale swiftly reaped \$9.98 million in profits, demonstrating extraordinary market insight.

Even more noteworthy is the news that the U.S. government has been authorized to liquidate 69,000 Bitcoins (worth \$6.5 billion) seized from the Silk

Road. This injects significant uncertainty into the market while also creating new opportunities for investors. However, AlphaStream 5.0 indicates that in 2024, the market absorbed approximately \$379 billion in liquidity, averaging \$1 billion daily. This suggests that even a government Bitcoin sale can be quickly absorbed by the market.

And following Bitcoin's record highs at the end of 2024 and subsequent adjustments, a new wave of accumulation is quietly underway. Increasingly, nation-states, central banks, sovereign wealth funds, and government treasuries are seeking to establish strategic positions in the Bitcoin market. This is a global financial game where everyone is preparing for future price surges.

So what will the future price of Bitcoin look like? The worst-case scenario, U.S. Bitcoin reserve sell-off could push prices to \$150,000. While the best-case scenario, we could see crypto prices break past \$400,000!

Friends, we are at a critical juncture in the crypto market. Opportunities are reserved for the prepared. Have you devised your strategy to claim your position in this market? Remember, whales demonstrate the importance of seizing volatility and momentum. Through AlphaStream 5.0's precise trading signals,

we too can become the next winners. Let's go all in and embrace this moment of brilliance together!

Friends, just imagine, how did you earn your first million dollars? In the crypto market, we've already witnessed its immense profitability. Particularly for those who invested significant capital and joined VIP3 and VIP2 Partners, some have surpassed \$1 million in profits, while others have made hundreds of thousands of dollars. Even among VIP1 Partners, many have achieved impressive results. This confirms that your choices were correct!

However, let me ask you this: why do some friends, despite limited capabilities, go all in and achieve returns beyond expectations, while others, with all the potential, merely dabble and fall short? The answer lies in attitude. The difference between fully committing and casually participating results in vastly different outcomes.

Friends, which type are you?

If you're still hesitating or just casually participating, take a moment to think.

Why not treat this opportunity as a pivotal moment to change your destiny?

Only by giving your full effort, seizing every trading signal, and fully utilizing market fluctuations can you achieve the returns you've always envisioned.

Of course, I understand that some of you may be unable to keep up with every trading rhythm due to time constraints. For such situations, the only solution is to wait for the launch of AlphaStream 5.0. Imagine owning the personal or institutional version of AlphaStream 5.0, enabling fully automated copy trading to capture the most accurate signals, wouldn't your million-dollar profit target suddenly feel much more attainable?

In the world of investment, success always favors those who are optimistic and action-oriented. While we admire Helmsman's broad vision and positive attitude, it's crucial to start with ourselves, turning optimism into a driving force. Follow Helmsman's lead, fully leverage the powerful tool that is AlphaStream 5.0, and seize every opportunity to profit.

Now is the time to act, friends! The goal is right in front of you, don't let hesitation become your obstacle. With optimism and unwavering belief, take that decisive step toward your goal of a million dollars, or even ten million.

Remember, this is not just an investment journey, it's a game for those who dare to dream big.

Friends, I have to say, after experiencing this exciting investment journey, I have come to deeply realize, achieving great success in any field requires more than just luck or hard work. The true key is finding a mentor who can illuminate your path forward. Such a mentor can help you avoid unnecessary detours and quickly guide you to the track of success.

For me, Helmsman has been that critical mentor. His teachings extend beyond making money through investments, they're about achieving success while giving back to society. He often reminds us: when you earn a significant profit, remember to set aside a portion for good causes and add warmth to society. Investing isn't just about growing your account balance, it's an opportunity to make the world a better place.

This philosophy has changed my perspective on investment. It's helped me realize that true success is not merely about accumulating wealth but about using that wealth to help others. Giving back to society not only makes our

investment journey more meaningful, but it also fills us with a sense of inner fulfillment, making us more complete individuals.

Friends, let's continue to follow the Helmsman's lead, not only striving to seize every investment opportunity but also learning to share our success. Let's transform investing into a means of changing our destiny while positively impacting the lives of others. Through wisdom and hard work, we can achieve financial freedom and make the world a better place because of our actions.

Important Reminder:

Friends, please note that closing signals have just been shared in the VIP1/2/3 groups. Be sure to execute them. Congratulations to VIP1/2/3 group members for achieving outstanding profits of over 90%, 210%, and an astonishing 510%, respectively! What incredible results!

Investment is a lifelong journey. Only by truly loving it can you continuously receive positive feedback from it. One of the most powerful tools is the magic of steady compound interest, it allows wealth to grow quietly but steadily. So how can you better harness the power of compounding? Hey, by joining VIP

Partners, you'll find that investing isn't just a journey, it's an exciting marathon of wealth growth.

In VIP Partners circle, we not only learn to refine capital management techniques but also master following long-term market trends to maximize capital while pursuing low-risk, high-reward strategies. This isn't just about simple investment, it's a deeper exploration of financial wisdom.

Today's trade was a perfect example. Many members in the VIP Partners group achieved returns exceeding 80%, and some even reached an astonishing 500%! Such results are not coincidental but the result of precise trading signals combined with collaborative teamwork. These results are not just numbers, they are the best rewards for persistence and effort.

In VIP Partners group, trading is no longer just cold numbers, it's an experience filled with fun and a sense of accomplishment. You'll find that our goal is to discover simple yet efficient trading methods that maximize every investment's potential while ensuring the safety of funds. That's the unique value VIP Partners bring.

So, friends, do you want your investment journey to not only generate profits but also be filled with achievement and joy? Join us. Let's explore, grow, and reap together. On this investment road, seize every opportunity and enjoy every step of the journey.

Although the market fluctuation following today's non-farm payroll data was limited, we still steadily seized the opportunity and achieved solid returns. The Helmsman has repeatedly emphasized a key principle: the market will always present various conditions, but only by focusing on opportunities with certainty can you achieve long-term, stable profitability. This is not just a concept, it's our guiding light in actual operations.

Today's performance once again proves the value of this principle. Despite the non-farm payroll data not triggering the expected massive volatility, we still secured profits through precise strategies. This is the power of focusing on certainty, it keeps us ahead in a complex market.

Friends, don't forget Helmsman's advice, allocate half of today's profits into a 30-day high fixed-income product. This step isn't just about growing wealth, it's an essential part of building an unshakable Wealth Matrix. Through this strategy,

we can continuously increase our wealth while enjoying a sense of stable happiness.

The road ahead is long, but as long as we continue to stick to the right strategies and refine our plans, each success will lay an even stronger foundation for our financial journey. So, keep pushing forward! With confidence and determination, let's progress steadily on this investment journey and achieve our financial dreams step by step!

Professor Quinlan Sutter (Helmsman)

Closing Commentary

Good afternoon, my friends!

I'm Quinlan Sutter, your old friend. Thank you to Samuel for this morning's excellent insights. He worked with everyone to precisely capitalize on the Non-Farm Payroll movement, successfully launching the VIP partners' contract trading. This is undoubtedly a significant milestone victory, not only validating my judgment from last week but also allowing everyone to enjoy a luxurious investment feast.

This moment once again proves the strength of our teamwork and strategies, showcasing how the combination of learning and action drives wealth creation.

The essence of investing lies in continuous learning, constant reflection, and ultimately forming your own investment philosophy. Learning to let go and seize opportunities is at the core of investment success. Letting go is not about retreating but making decisive and wise choices. When faced with uncertainty or high-risk market conditions, we must remain clear-headed, identify hidden risks, and exit decisively to protect our capital. As the Bible says, "The prudent see danger and take refuge, but the simple keep going and pay the penalty." Letting go of unclear opportunities does not signify failure; instead, it creates room for a more certain future. This is wisdom, and it is also maturity.

Opportunities are fleeting, and only those who are always prepared can truly seize them. Times of market panic often harbor high-potential investment opportunities, making them the perfect moment for decisive action. As Warren Buffett famously said, "Be fearful when others are greedy, and greedy when others are fearful." We must have sharp insight and the courage to act, locking in profits at the optimal points in the market.

The essence of investing is "making the right choice at the right time": stepping back decisively when necessary and going all in when the moment calls for it. This is not only about understanding the market's rhythm but also about

mastering your emotions and judgment. Only through continuous learning and accumulating wisdom can we navigate the journey of investing with confidence and precision.

Friends, today's victory is the result of our collective efforts and a testament to the wisdom of our team. But this is only the beginning. The market remains volatile, with opportunities and risks coexisting. Let's continue learning, keep taking action, and seize every opportunity worth pursuing while also remembering to avoid risks and protect our capital. Through unwavering dedication and effort, we will undoubtedly reach new heights in our investment journey and write our own brilliant chapters.

As everyone knows, in the investment market, achieving success requires seizing the opportunities that the times present. This is the key. Take the current stock market, for example. Volatile adjustments are the dominant trend. If you continue to approach it with the mindset of a primary upward wave and fail to lock in profits in time, your profitable stocks could quickly turn into losses. On the other hand, the crypto market, despite its recent high volatility and seemingly abundant opportunities, poses another challenge, can you truly capture every single trading opportunity? Clearly, that's impossible.

Investing in the crypto market is the right choice, it is one of the most attractive investment fields today. However, we must clearly understand that focusing solely on certain trading opportunities is the key to remaining undefeated in this highly volatile market. Precisely because of its high volatility, we need to be more cautious in selecting the highest-quality trading signals. Only by acting decisively when clear and accurate signals appear can we truly enhance success rates, control risks, and ensure long-term profitability.

I have always advocated for joyful investing. The goal of investing is not just to chase profits but to create a balanced and fulfilling lifestyle for yourself. While we pursue wealth, we must also value our physical and mental well-being. Don't let investing become a burden; instead, let it be an enjoyable part of your life experience.

In this regard, AlphaStream 5.0 provides us with powerful support. Built on the foundation of capital balance, it automates split-position trading according to the investment target, completely streamlining the investment process. Whether you are a beginner or an experienced investor, AlphaStream 5.0's intelligent copy-trading mode allows you to easily achieve your investment goals. It simplifies complex market operations, making them efficient and

straightforward, enabling you to effortlessly take control of your wealth growth trajectory.

I sincerely hope that all friends participating in the AlphaStream “Millionaire Club” can attend the grand event in March celebrating the establishment of our community charity fund. It will be a moment to remember, where everyone will witness the extraordinary performance of AlphaStream 5.0 in the field of investment. There will be even more surprises waiting for you at the event, everything is worth looking forward to!

The strong Non-Farm Payroll data dealt a heavy blow to the U.S. stock market today, just as Bill mentioned in his morning analysis. While employment figures remain robust, they have also heightened concerns that the Federal Reserve may continue its tightening policies. Market expectations for higher interest rates have intensified once again, putting pressure on U.S. equities, with major tech stocks like NVIDIA leading the ongoing pullback.

As shown in the chart above, the Dow Jones Industrial Average is currently in the process of a potential second wave of decline, which aligns perfectly with our earlier analysis. Once this adjustment cycle begins, it may continue until the third wave of decline stabilizes. Of course, this will require further alignment with fundamental factors. Candlestick charts are the most intuitive representation of price movement. Until there is a significant change in the bearish pattern, it is unlikely we will see a strong bullish rebound signal in the market.

The next bullish cycle in the stock market is unlikely to emerge before February. At this stage, our recommendation is to closely monitor market dynamics and minimize unnecessary trades. When the market trend remains unclear, making the wrong choices will only lead to greater losses. In such a market environment,

it is wise to focus on the historic opportunities presented by the times. And that opportunity lies in the crypto market.

The crypto market is currently highly volatile, but it also offers us unprecedented investment opportunities. Compared to the adjustment period in the stock market, the crypto market is better suited as an investment focus, especially with the support of a powerful tool like AlphaStream 5.0. With it, we can accurately capture trading opportunities, minimize risks, and achieve higher returns.

Compared to the stock market's performance, this week's gains in the crypto market have been truly exhilarating. This is not just a numerical victory but also the result of our team's wisdom and collaboration. A special shoutout goes to the partners in the VIP3 group, who have already achieved a total asset return of over 124%! This achievement is not only a testament to your individual efforts but also the best reflection of our team's cohesion and execution. It is a portrait of our shared pursuit of excellence and the best reward for our unwavering belief.

But friends, this is only the beginning. Our profit plan has even greater goals waiting to be achieved. For those who couldn't participate in time due to fund allocation issues, don't be discouraged. Our journey is far from over, and the market ahead is filled with potential opportunities and even greater possibilities.

Now is the time for us to regroup and press forward. Stay firm in your beliefs, give it your all, and seize every opportunity that market fluctuations bring. No matter where you are right now, believe in yourself and in the team. Every step of success in the market will become a cornerstone of our future greatness.

Dear friends, this afternoon's round of trading has once again brought us substantial profits. I want to especially remind everyone to allocate half of the profits from this trade into a 30-day high-yield fixed-income product. This is not only a crucial step in solidifying our gains but also a key strategy for continuously building our "WEALTH MATRIX" secret weapon. By doing so, we can ensure steady wealth growth while enjoying a sense of secure happiness.

Remember, our goal has never been just short-term gains; it is to achieve our grander long-term dreams through stable and continuous compounding growth. Every prudent investment decision is a step toward paving the way for our future

success. As the weekend approaches, we must interpret the opportunities revealed by recent economic data with a cooler and sharper perspective. The discrepancy between the unemployment rate and Non-Farm Payroll figures adds complexity to the market, reflecting potential trends within the volatility and signaling a critical investment juncture.

What's particularly noteworthy is the remarkable continuity in this round of Non-Farm Payroll data, with the market's full reaction still unfolding gradually. This indicates that the market volatility in the coming days will present us with more distinct and actionable profit opportunities. It is foreseeable that the market will continue to digest this economic data next week, and its impact will become clearer. This will, in turn, provide us with the next wave of definite profit opportunities.

Starting now, from this weekend onward, we need to build the foundation for our compounding growth step by step. Under the guidance of AlphaStream 5.0, let our wealth growth unleash exponential momentum! The facts have already proven that AlphaStream 5.0's stability and efficiency are unparalleled. It empowers each of us with the vision to uncover opportunities deep within the

market. No matter how the market evolves, it continues to guide us in the right direction.

Friends, the foundational profit goal of \$1 million is no longer an unattainable dream but an accomplished reality. So far, many partners have reached this milestone and are now advancing toward even greater profits in the tens of millions. The journey of the "AlphaStream 5.0 Millionaire Club" is destined to write a brilliant chapter that belongs to us. And now, this is the starting point of our new journey.

Let us, together with the support of AlphaStream 5.0, not only seize this weekend's trading opportunities but also dare to dream big, set higher goals, and pursue them boldly. The future belongs to those who are always prepared and act decisively! No matter where you are in your journey, now is the best time to start. Direct message me or my assistant, and let's plan and capture this weekend's trading opportunities together.

Stay confident and move forward steadily. Believe in the power of AlphaStream 5.0, and trust in the wisdom and efforts of our team. We are fully capable of achieving even greater success and creating more remarkable

QTM COMMUNITY

accomplishments on this path to wealth. The future belongs to those who dare to pursue and act decisively. Friends, let us move forward together and embrace an even brighter tomorrow!

Wishing you a wonderful day and a weekend filled with opportunities and achievements!
