9:30 AM

Professor Quinlan Sutter (Helmsman)

Morning Review

Good morning, my friends!

I'm Quinlan Sutter, your old friend. Yesterday marked another milestone for every member of our community. Once again, I urged everyone to seize the unparalleled opportunity in crypto market: Don't miss this golden chance that akin to the stock market rally of 2024!

We reiterated the importance of the "Battle of Kings 1000% Profit Challenge Plan" and set its completion target for the end of Nonfarm Payroll Week on February 7th. To ensure that every friend in need can participate, our assistance program will remain active. This is not just a new starting point for investment but a crucial milestone in our shared pursuit of excellence and realization of dreams.

Friends, this plan goes far beyond being just an investment opportunity. It aims to help every participant achieve unprecedented high returns in the market. This is not only about growing wealth but about proving our wisdom and courage and giving real value to our dreams.

You know, the driving force behind this plan is our relentless pursuit of success and our boundless hope for the future. Each participant harbors dreams and aspires to find their success in this market brimming with opportunities. As the Bible says, “I can do all things through Him who strengthens me.” We firmly believe that as long as we have faith and work tirelessly, the goals we set will eventually be achieved.

This challenge plan offers not only substantial financial rewards but also invaluable experiences for your investment journey. You’ll gain access to cutting-edge market analysis, precise trading signals, and comprehensive strategic guidance. Throughout this process, you’ll learn how to seize opportunities with precision amid market volatility and turn your actions into extraordinary profits. This is not just a challenge but a journey of growth.

Joining this plan is not only about profit but about self-improvement. Together, we will face market uncertainties, overcome every investment challenge, and welcome the dawn of victory. Every warrior who perseveres to the end will reap their own glory!

Friends, the opportunity is right in front of you. Don't hesitate, don't retreat! Let us fully commit ourselves to this "Battle of Kings" and create miracles with our wisdom, faith, and courage. Believe in yourself, believe in the team. Through relentless effort, we will undoubtedly achieve greater accomplishments in this market full of opportunities!

Yesterday, I was deeply touched by the many messages you guys left. Your trust and support are my greatest motivation. What excites me even more is that many of you are ready, and some have successfully advanced to higher levels of VIP partners through the assistance program. From today onward, I will give my all to lead us toward this unprecedented profit goal!

If we succeed, this will become a significant milestone in the history of our QTM community. Every step will be meaningful, and every decision will write a new chapter for us. So how will I lead you to better achieve this goal?

What key points should we focus on during the process? And how should we take action?

These are the themes I want to explore deeply with you today. Let us embark on a new chapter for our QTM community with passion and dreams, climb new peaks together, and redefine the essence of success!

Let's first take a look at the two key data points released today:

- 1. Initial jobless claims for the week came in at 217,000, higher than both the previous value and expectations. This suggests a subtle slowdown in the labor market, though it remains at a healthy level overall.**
- 2. December retail sales grew by 0.4% month-over-month, falling short of both the previous value and forecasts. This indicates a slowdown in consumer spending growth, potentially reflecting waning consumer confidence in the economic outlook.**

These data releases had a mixed impact on the stock market. On one hand, slightly higher jobless claims may heighten concerns about an economic slowdown. On the other hand, weaker retail sales data has strengthened market

expectations that the Federal Reserve might slow the pace of rate hikes. Overall, these data points add to market uncertainty, which could lead to short-term volatility in equities.

In contrast, the crypto market often shows greater resilience to such economic data. As traditional market sentiment wavers, some capital may flow into the crypto market, seeking higher returns and hedging opportunities. Additionally, weaker economic data could amplify expectations of a shift toward looser monetary policy, potentially providing fresh momentum for mainstream crypto assets like Bitcoin.

As shown in the chart, the Nasdaq's daily candlestick chart still has an unfilled gap from November 6th, while the Dow and S&P 500 have already effectively closed this technical gap. Yesterday's rebound was largely driven by technical oversold conditions, combined with inflation data and strong earnings reports. At present, as long as the data aligns with expectations, market sentiment should remain stable. Recent trends have validated this observation.

Yesterday, three major U.S. stock indexes saw a significant rebound, fueled primarily by moderate inflation data and strong performance in the banking sector. According to Wednesday's December Consumer Price Index (CPI) report from the U.S. Bureau of Labor Statistics, core inflation rose 3.2% year-over-year, below economists' expectations of 3.3%. Overall inflation grew 2.9% year-over-year, in line with market expectations. This moderate inflation data eased concerns about further Federal Reserve rate hikes while bolstering confidence in economic prospects.

The banking sector shone, setting a strong tone for earnings season. JPMorgan Chase exceeded expectations in fixed-income trading and investment banking revenue, driving its stock up nearly 2%. Wells Fargo's stock soared 6.7%, as it forecasted a 1%-3% increase in net interest income by 2025. Citigroup and

Goldman Sachs also jumped 6.53% and 6%, respectively, on stronger-than-expected earnings performance.

Yesterday's market rebound provided investors with another golden opportunity to reduce stock holdings at higher levels. Especially in rebound markets following overselling, such opportunities become even more valuable. Once the rebound ends and market fluctuations stabilize, further declines are highly likely. In today's volatile stock market, achieving significant profits has become increasingly challenging.

That's why I once again suggest a wiser asset allocation strategy: keep 10% of your funds in the stock market while allocating 90% to crypto market. This strategy is not only rational but also allows us to navigate various markets effectively, maximizing our profit potential.

Also, by continuously building our wealth matrix, we can reinvest half of our profits into 30-day financial products after every successful trade. Over time, you'll find that funds in financial products will grow substantially, eventually surpassing your initial investment capital. This is the strategy of letting your profits work for you.

When funds in financial products far exceed your principal, you can confidently pursue higher returns in crypto market through contract trading and similar operations. This approach enables steady growth while opening doors to extraordinary returns under controlled risks.

Friends, does this strategy excite you? Now is the perfect time to act. Let us, through scientific allocation, firm execution, and keen market insights, carve out our path to success in diverse markets.

By analyzing the BTC/USDT daily candlestick chart, we can see a strong correlation between crypto market and the stock market. Bitcoin, after stabilizing ahead of the stock market, experienced a wave of oscillation and correction. As I've emphasized repeatedly, \$90,000 was an excellent entry point for mid-term buying. Now, with Bitcoin securely above \$100,000, congratulations to those who boldly bought near \$90,000! Opportunities always favor those who are prepared and willing to act, and your decisive efforts have been rewarded.

Currently, Bitcoin's pattern still requires oscillation to adjust indicators and market sentiment. From the MACD on the daily candlestick chart, the "2" trend is highly likely to replicate the "1" pattern, reducing the likelihood of a continuous surge. But for us, this isn't a problem!

As contract traders, we thrive on market volatility, whether bullish or bearish. Our strategy doesn't rely on a unilateral market movement. Instead, we align with market rhythms, seizing every wave to generate profits.

More importantly, next week, the Crypto President returns! This will mark a significant opportunity, particularly for the crypto market. We'll dive into specific

details and strategies next week. One thing is certain: next week heralds the start of a new investment journey.

Friends, are you ready? The opportunity is here, and the future is in your hands. Let us move forward with passion and conviction, embracing this new adventure! Believe in yourself, believe in the team, and together, we'll create new brilliance in this opportunity-filled market!

Our journey to profitability in the crypto market continues to shine brightly with a record of consecutive victories. But remember, each success is hard-earned, built on patience, precise strategies, and our relentless pursuit of excellence. Every win is a treasure, and the accumulation of these achievements is paving a pathway to greatness.

To those who may face setbacks along the way, I want to tell you this: do not fear, and do not give up. Our community is always here for you, offering support and guidance. No matter what difficulties you encounter, we will help you recover lost opportunities and multiply your returns. In the face of adversity, hold steadfast to your beliefs and move forward bravely, this is the spirit we share.

If you need a more personalized strategy to accelerate your progress or even surpass others, please feel free to message me. Together, we will craft a plan that suits you best, helping you overcome challenges and achieve your goals. Every setback is a chance to learn, and every stumble is an opportunity to start anew. The road to becoming a billionaire is never achieved overnight but is paved step by step through steady compounding growth.

Consider Warren Buffett, this legendary investor who secured his place in financial history with a 20% annualized return. With the support of the AlphaStream 5.0 system, we are leveraging the power of compounding to pursue extraordinary returns within a defined timeframe.

Let's imagine the miracle of compounding:

- A 10% increase in total asset return for each trade, repeated 17 times, results in a 405% total asset return, achieving the 300% profit goal for VIP1 partners.**
- With 22 consecutive trades, the total return reaches 714%, accomplishing the 600% profit goal.**
- At 26 trades, the total return hits 900%, the ultimate goal of this challenge!**

Most importantly, the scale of your capital determines the final outcome. A \$100,000 investment and a \$1.5 million investment may achieve the same return rate, but the final profit will be worlds apart. If we completed the 900% profit challenge plan by February 7th during Nonfarm Payroll Week, it will mark the conclusion of this journey, opportunities are fleeting.

Friends, I remind you again that seizing the present opportunity with all your might is crucial! Even if better opportunities arise in the future, only with sufficient capital can you seize them. Do not let this crypto market opportunity become a regret. I hope every member of the community will participate with firm belief and decisive action.

Our Core Arsenal: Low Positions, High Returns, High Success Rates, and the Power of Compounding!

Through scientific fund management and disciplined execution, we are able to identify the best investment opportunities amidst market fluctuations and steadily achieve our ambitious goals. Every small victory lays a solid foundation for the future, every single investment contributes to the growth of our wealth.

Congratulations to all VIP partners! We have just achieved approximately 70% profit in a single trade based on a shorter-cycle chart. This is a perfect demonstration of the team's wisdom and precise strategy, a significant step forward in our journey toward excellence!

Now, let's take the next step:

Invest half of these trade profits into a 30-day financial product. This is not only a prudent fund management strategy but also a crucial step in expanding our wealth matrix. Our wealth matrix is gradually becoming an indestructible investment fortress, paving the way to financial freedom.

"Battle of Kings" is a new starting point, it symbolizes our journey to becoming market king. By understanding and embracing the exponential growth driven by compounding, our wealth will grow at an incredible pace. Every small success lays a solid foundation for the future, and every minor progress adds to the value of our wealth.

Please make sure to tune in this afternoon for Samuel's insightful session. His guidance and experience will provide valuable perspectives for our trading

endeavors, enabling us to seize real-time market opportunities with greater precision and achieve even greater success. Sessions like this are an essential asset to our team and a driving force for our ongoing progress.

Dear friends, let us join hands and stride together on the path to wealth and success, reaching new heights. Through scientific strategies and steadfast execution, we are bound to create even greater achievements in this market full of opportunities!

3:30 PM

Samuel Blackwood

Closing Commentary (α & β Strategy)

Good afternoon, members of the community!

I'm Samuel Blackwood, and today I want to ask you a question: In both investing and life, which do you regret more, making a mistake or missing out?

Think about it: every choice you make, if it turns out to be wrong, what's the worst that can happen? You can learn from it and adjust your direction. But if you spot an opportunity, feel ready to act, and for some reason don't, only to see that opportunity succeed, would you regret it?

For example, imagine that yesterday you discovered a great set of lucky numbers and planned to buy a Powerball ticket for a chance at luck. But because

of a phone call, you forgot about it, and those numbers turned out to be the winning ones! Wouldn't that regret linger for a long time? Stories like this are not fictional, they really happen. These examples clearly show that making a mistake can often be corrected, but missing out is a regret that can last a lifetime.

This is just like the current crypto market. Folks, if you go all in and participate, your efforts will undoubtedly bring returns. Even if some strategies don't fully work out, the worst outcome is a valuable learning experience. However, if you've already recognized the tremendous opportunity in the crypto market but hesitate or delay and choose not to participate, that's a completely different story. You'll have to watch others seize the opportunity while you let it slip through your fingers. This isn't just ordinary regret, it's an unforgivable missed chance!

Why is this opportunity too good to miss? Because the current crypto market is one of the most certain investment opportunities available. It's filled with unprecedented potential and room for growth, this isn't something you come across every day. If you miss out, it may take you a long time to catch up or even make up for the lost opportunity, whereas the cost of making a mistake is insignificant in comparison.

Folks, now is your time to act! Stop hesitating, stop watching from the sidelines. Seize the opportunity before you and step into this market brimming with possibilities. The cost of missing out is enormous, while the cost of making a mistake is manageable. Instead of regretting it for a lifetime, start taking action now. With your conviction and effort, pave the way for your future!

This morning, Helmsman emphasized a crucial point, the power of compounding. If you haven't fully grasped the impact of compounding, you might be missing out on the greatest secret to accelerating wealth growth. Compounding is the key tool that allows capital to grow rapidly, making wealth snowball bigger and bigger over time. When we combine the power of compounding with the "Battle of King" Profit Plan, targets of 300%, 600%, or even 1000% no longer seem out of reach!

Over the past 40+ trades, we've achieved victory every single time. This isn't luck, it's the absolute power of AlphaStream 5.0! This system, with its precise analysis and real-time signals, gives us confidence in every trade. Through it, we're not just trading; we're building our path to financial freedom. The power of compounding acts like a magnifying glass, elevating these victories to an entirely new level of returns. In the "Battle of King" 1000% Profit Challenge, our

VIP1, VIP2, and VIP3 Partners achieved returns of 84.33%, 144.73%, and 308.72% , respectively, in less than two weeks! What does that mean? It's like hitting the jackpot at every turn!

Imagine this, if you started with \$100,000, you've now earned nearly \$80,000 in net profit. If you began with \$1.5 million, your net profit has skyrocketed to over \$4.6 million! What kind of concept is this? It's not just about profit growth, it's a leap in wealth. What's even more exciting is that we are steadily approaching the goal of the Millionaire Club.

Now, let me ask you: Can the stock market deliver these kinds of returns? The answer is clear, absolutely not! The stock market recently has been characterized more by volatility and pullbacks than by opportunities for this kind of geometric growth. This is precisely the unique allure of the crypto market, it's one of the most certain investment tracks available today, opening unprecedented doors to wealth for every investor bold enough to participate.

This isn't an ordinary investment, it's a meticulously orchestrated symphony. Every trade is a note, and every compounding gain is composing your personal wealth masterpiece. Guided by AlphaStream 5.0, we are precisely capturing

opportunities within market fluctuations, maximizing the potential of every dollar. This isn't just profit, it's the ultimate reward for our decisions and execution!

Friends, this is the true power of compounding unleashed in all its glory!

Why haven't some people reached this exciting level yet? The reason is simple: they missed the rhythm and hesitated. Some are still waiting for funds to arrive, while others are distracted by other matters, overlooking the opportunity right in front of them.

If you're not satisfied with your current returns, the "Battle of King" is your golden opportunity to change your situation.

This time, everyone has had ample time to prepare, and the Battle of King is now in its final countdown. Jumping in during this final sprint is your smartest choice and the only way to seize this opportunity.

As I often say, "Compounding is like planting a tree. What you lose is not just the day you didn't plant it, but the future of enjoying its abundant fruits."

Seizing the initiative isn't just a smart decision, it's the only way to truly take control of your destiny. The market moves fast, and opportunities won't wait for anyone. Don't hesitate any longer, folks, action is the key to victory!

Now is the perfect time to prepare your funds, lock in your targets, and go all-in on the "Battle of King." This moment is not just an opportunity to achieve greatness, it's your chance to turn your wealth dreams into reality. Don't let this opportunity slip through your fingers! Join us and sprint toward this iconic Battle of King. Together, let's use action and wisdom to write our own legendary story. This time, seize it, and you won't regret it!

Today's two major data releases have filled the stock market's outlook with uncertainty, with the three major indices continuing to fluctuate and adjust at high levels. As Helmsman often says, "Don't just listen to what people say; watch what they do." Some institutions are publicly claiming to be bullish on U.S. stocks in the near term, hyping how much higher they could climb, yet their actual actions show large-scale net selling. Ask yourself this: In a market where the majority of institutions are selling, how much higher can U.S. stocks really go?

The core of learning institutional thinking is understanding how to observe their actual actions rather than being misled by surface-level statements. This is precisely why we've consistently advised adjusting your strategy by allocating 90% of your funds to the crypto market while keeping 10% in the stock market. The current market performance has proven the accuracy and foresight of this strategy!

Everyone, adjusting your strategy is not just a tactical move, it's a reflection of a precise understanding of market trends. As the Helmsman says, we must find opportunities amidst change and discover certainty within uncertainty.

The future of the crypto market is filled with potential, and we've already achieved remarkable success on this track. Our decisions have not only helped everyone avoid risks in the stock market but also allowed us to seize countless opportunities in the crypto market. Now, the key is to maintain this momentum, leverage every fluctuation in the market, and work hard to achieve our goals and create even more wealth!

Folks, are you ready for the adrenaline rush? In the midst of the market's temporary calm, we may take a brief pause, but when a powerful trend sweeps

in like a tsunami, that's our moment to go all out and showcase the strength of our strategies! Just like sharks in the deep sea, as the market ebbs and flows, we use meticulously crafted strategies to capture our prey. This is the golden moment for the perfect hunt!

This is not an ordinary opportunity, it's a battle drum that ignites our drive and passion! I can feel it: next week, the return of the "Crypto President" will be the spark that sets the entire crypto market ablaze. The "Crypto Oscar" 300%-1000 % Profit Plan is rapidly approaching its final countdown, promising an explosive opportunity as spectacular as a volcanic eruption!

Folks, now is the time to seize this golden opportunity! Go all in and use our strength to create a brilliant future for yourself. What do you need to do? It's simple, dive into this wave of the crypto market without hesitation, upgrade to a higher-tier VIP partnership, and embrace the surge of profits that this crypto wave will bring!

Helmsman's strategic plan has already paved the way for us; now, it's up to our actions. Every trade is a building block for the future; every moment of

QTM COMMUNITY

perseverance is a bridge to success. Now is the time for us to showcase our strength and turn our dreams into reality!

Are you ready? Seize this opportunity and sprint with us! Embrace the dawn of victory that's ours to claim! Folks, take action now, let this wave of profits be the start of your legendary story!
