9:30 AM

Professor Quinlan Sutter (Helmsman)

Morning Review

Good morning, my friends!

I am Quinlan Sutter, your old friend. As we face a life that can never be relived, how should we choose? This is a question I often ponder. Life is short, fleeting, and every choice and action we make shapes our future. In the end, when we say goodbye to this world, will we regret the opportunities we missed? All of this depends on whether we truly seized every opportunity and made the most of our precious time.

Opportunity cost is a concept we cannot ignore. Behind every choice we make, there is the implication that we are giving up other potential possibilities. When we choose comfort, avoidance, or hesitation, we are, in fact, giving up

opportunities that could help us achieve higher goals and realize greater dreams. In life, the opportunities that can truly change our fate are few and far between, maybe only a handful. But if we seize just one, it has the power to change our entire future.

The current crypto market is exactly that kind of opportunity. It reminds me of the stock market rally in the first half of 2024, perhaps even more explosive. If we can't seize such a Kondratieff wave, what kind of investment opportunities can we hope for? Friends, we cannot let inertia and fear dictate our choices. At every stage of life, we are faced with endless possibilities. We must face them with the greatest courage and pursue them with a positive mindset.

As the Bible says, "Whatever your hand finds to do, do it with all your might." Only by giving our all can we be true to ourselves. Only by seizing every opportunity without regret can we look back with peace of mind. At this moment, we stand at a crucial point in time. The data collection and subscription plan for AlphaStream 5.0 is progressing smoothly, and the global launch at the end of March is rapidly approaching. But for those who have already joined and supported our community, this is not just a plan, it is a commitment. This battle of kings is not only an action of pursuing wealth, but also a practice of faith. I

deeply understand that helping everyone complete this challenge is not only my mission, but also the true value of my life.

Friends, I invite you to join me in this fight. What we are doing is not just for wealth, but to prove that we have the ability to change our own fate, for our family, our friends, and for that unshakable belief in our hearts. Let us, with unwavering determination and persistent effort, seize this historic opportunity and embark on a journey we can be proud of.

Imagine, if we choose to stay complacent, not striving, and not actively facing the opportunities before us, will we, as we grow older, look back and feel regret for the dreams we never achieved? Will we lament missing the opportunities that were once within reach? Opportunity cost constantly reminds us that every possibility we give up will become a future regret.

Dear friends, now is the time for us to take action. Don't wait until everything is in the past to realize the valuable opportunities we've missed. Whether in investment or in life, we must approach each moment with a positive mindset, seize every opportunity, and give our best effort, putting in 100%. Only then,

when we look back in the future, can we feel at peace with ourselves, without regret or resentment.

In my conversations with members of the community, I've noticed that some people are always complaining about the unfairness of fate, feeling they lack opportunities, and even believing that life always owes them something. However, I want to tell everyone that fate never favors anyone. We all face our own challenges and opportunities. The key is whether we have the courage to face them and whether we are willing to give our all to seize these opportunities. Opportunity cost clearly reminds us that every complaint and hesitation is a waste of time and resources. Instead of dwelling in dissatisfaction, it's better to actively seek solutions to the problems.

Every choice and action we make lays the foundation for our future. If we choose to stand still and complain about fate, the outcome is predictable. But if we face every challenge with a positive attitude and seize every opportunity, success will eventually come closer to us. Think about it, those great individuals who rose from adversity, didn't they also experience countless failures and setbacks, yet they persevered and ultimately achieved their dreams?

This time, the AlphaStream 5.0 Crypto Oscar (300-1000%) Profit Challenge is our battle of kings. It's not only an important milestone for the 'Millionaire Club,' but also a pivotal moment for each of us to showcase our strength and achieve our dreams.

I hope every friend takes this challenge seriously and gives their all to it.

I know that for some, such goals may seem out of reach. But remember, the key to success lies in persistence and action. Every successful investor has achieved their goals through continuous effort and countless attempts. We must believe in our own abilities, trust in the power of the AlphaStream 5.0 system, and have confidence that our team will provide support and guidance at every step.

Let us face every challenge with unwavering belief, seize every opportunity with relentless effort, and realize the true value of our lives. Don't let time slip away in hesitation and laziness, and don't let opportunity cost become a regret in our future. Prove through action that our lives are meaningful, filled with achievement and joy. Now, take that step and make your life even more brilliant!

QTM COMMUNITY

Yesterday, the U.S. stock market closed strong again, with Wall Street generally optimistic about the moderate policies that the new administration may introduce. Historically, the probability of a market crash in the early days of a new president's term is relatively low. However, we cannot ignore the risks associated with the current high levels of the three major indices. If future policy details deviate from expectations, it could still trigger a market correction. Investors should remain highly alert to potential policy shifts under the Trump

administration and closely monitor structural opportunities in the market that have yet to be uncovered.

From the monthly candlestick chart of the Dow Jones, we can see that this month has brought a corrective rally, with the Dow still fluctuating and climbing along the upward trend line. However, if we carefully review the list of top gainers, we'll notice that many individual stocks are already experiencing high-level consolidation, and the market's profit-making effect is weakening. What's even more concerning is that the Dow has been rising for over 18 consecutive months, and the MACD indicator on the monthly chart shows clear signs of flattening. This suggests that, during the 2 to 3 months ahead, there is a risk of the market adjusting below the 41,000-point level, potentially testing this key trend line.

Friends, risks rise with the market, while opportunities arise from declines. The stock market may seem stable right now, but the risks at these high levels cannot be ignored. The real big opportunities often come alongside significant market corrections. In the current environment, rather than chasing gains at these high levels, it's better to patiently wait for the market to adjust, and approach the next wave of opportunities with a more composed mindset.

Trump's potential re-election could ignite a surge in cryptocurrency investments, a trend that cannot be ignored. Trump has openly stated that he wants to become the "first cryptocurrency president," and this commitment is not just a slogan, it's a significant endorsement of the future of the crypto market. This statement has not only boosted market confidence in cryptocurrencies but also attracted more capital to flow into mainstream digital assets like Bitcoin.

The Coinbase CEO also pointed out that legislative support from Congress could be a key factor in driving Bitcoin to new all-time highs. This not only provides a more regulated and transparent development environment for the cryptocurrency industry but also attracts more institutional investors to join the market. With such policy support, an investment surge in Bitcoin and other crypto assets is beginning to take shape, and the market outlook looks promising.

The expectation of Trump's re-election is having a profound impact. His positive attitude has not only strengthened market confidence in cryptocurrencies but has also sent a clear signal: the policy environment in the future will be more favorable, and the inflow of capital will accelerate further. The crypto market could be on the brink of an unprecedented golden era.

Dear friends, this is the moment to seize the opportunity. Trump's re-election has not only brought policy benefits to the crypto market but has also created an excellent chance for us to position ourselves for the future. In the wave of the crypto market, with unwavering belief and seizing opportunities, we have every reason to believe that cryptocurrencies will bring greater success and achievement to our investments!

Compared to the current uncertainty in the stock market and the weakening profit effects, the opportunities in the crypto market undoubtedly appear more certain and enticing. Bitcoin has quietly settled above \$100,000, and those who decisively established long positions around the \$90,000 mark are now reaping substantial rewards. Yesterday, the long strategy set through AlphaStream 5.0 once again brought us significant profits. Every day, our returns are steadily growing, and these profits are continuously strengthening the solid fortress of our wealth matrix.

Although the crypto market has gone through a period of development, for many, it is still a relatively emerging field. And precisely because of its emerging nature, whether it's new stocks or new coins, the market is filled with unpredictable potential and endless opportunities. The uniqueness of this emerging market creates more possibilities for us and offers investors with vision and action the chance to seize the first-mover advantage.

For example, new IPOs (Initial Public Offerings) in the U.S. stock market almost always bring profits, with a few exceptions for those priced higher than expected or overvalued. Why is this the case? It's because whenever a new stock is listed, the market is always filled with anticipation and interest. New stocks are typically priced lower to attract more investor attention and show strong upward momentum in the early stages of listing. This is not only a result of market enthusiasm but also a reflection of the new opportunities and growth potential brought by new companies.

The same logic applies to new coin offerings (ICOs) in the crypto market. Whenever a new coin is launched, there is a surge of investment enthusiasm in the market. The issuance of new coins not only brings fresh investment opportunities to investors but also often comes with new technologies, new use

cases, and new market demands. These factors together drive the strong performance of new coins in the early stages of their listing, creating substantial returns for investors.

So, the question arises: why did Crypto President Trump choose to issue the TRUMP token instead of going public with an IPO in the U.S. stock market? The answer is simple, because the biggest opportunity right now is in the crypto market. Following the steps of Crypto President and joining this historic wave is the smartest choice at the moment. Of course, I do not recommend buying into the TRUMP token at its current high price, as this carries significant risk. However, if similar high-quality ICO projects arise, they are definitely worth serious consideration and participation.

If you had subscribed to the TRUMP token at its issuance price of \$0.18, your profits would be astounding. This is the advantage of participating early. In contrast, for most people in the stock market, achieving substantial profits at these high levels is nearly impossible, let alone making a life-changing leap.

In an era where traditional markets are dominated by large capital, it is indeed challenging for ordinary people to break through. Only new opportunities can

help us stand out. Whether in entrepreneurship or investment, the potential of emerging markets far exceeds the limitations of traditional markets. It's like the current bull market nearing its peak, rather than being an opportunity, it is more of a hidden risk. If you can patiently wait for the market to dip before making your move, that's when you may encounter a true opportunity.

Emerging markets are always full of infinite possibilities and opportunities. Looking back at history, every rise of an emerging market has created a new class of wealthy individuals. From the rise of the internet to the explosion of e-commerce, and then the rise of AI technology, every wave in these innovative fields has created enormous wealth opportunities for those who dared to try and take action. And today, the crypto market is just such an emerging market. It is not only a brand-new investment field but also a future full of innovation and breakthroughs.

Compared to traditional markets, the crypto market has a lower entry barrier, more opportunities, and higher returns. It is a field that allows ordinary people the chance to break through capital monopolies and achieve a leap in wealth. For this reason, seizing the opportunities in this emerging market is the key to achieving financial freedom.

Dear friends, now is the time for us to give our all. In this era of transformation and opportunity, we must remain steadfast in our belief and move forward with determination. Only by seizing the opportunities in these emerging markets can we stand out in the competition and achieve our wealth dreams.

Remember, opportunities are always reserved for those who are prepared. Whether facing new coin offerings in the crypto market or fluctuations in the stock market, we must remain vigilant and seize every opportunity that can change our future. By continuously learning and gaining experience, we will grow stronger in this emerging market and achieve even greater success.

Let us move forward together, seizing every new opportunity and starting our journey to wealth! At the same time, please stay closely tuned to the latest updates from the VIP Partner Group, where we will be releasing decisive trading signals to help everyone achieve even greater success in the upcoming investments! Wishing you all continued success as you give your all to your dreams!

3:30 PM

Samuel Blackwood

Closing Commentary (α & β Strategy)

Good afternoon, members of the community!

I am Samuel Blackwood. I have to say, the heartfelt self-reflection shared by Helmsman this morning deeply moved me. Life cannot be relived, and this has made me realize even more the preciousness of time and the rarity of opportunities.

Right now, we stand at this historic moment, fortunate to be part of the Battle of Kings Profit Challenge. This is not just an ordinary trading battle, it is a great test of courage and belief. Every word, every strategy from Helmsman reminds us: opportunities will not wait forever, and success always belongs to those who dare to act and challenge their own limits.

Guys, close your eyes and imagine, several years from now, when you look back on today, if you had boldly taken that step and given your all in this battle, what kind of sense of accomplishment would you have? That pride, that affirmation of yourself, will become the most valuable wealth of your life. On the other hand, if you let hesitation and fear hold you back, this moment could become your biggest regret in the future.

We must take Helmsman as our example, remain steadfast in our beliefs, seize every trading opportunity, and maximize the power of compounding. Every decision we make today is paving the way for the future; every decisive action is building the strength for success. This is our opportunity to change our fate, our chance for a breakthrough in life.

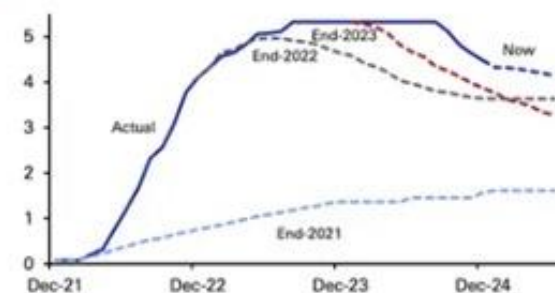

Believe me, as long as we work together, facing every challenge with firm action and relentless effort, victory in the Battle of Kings is within reach! Guys, now is the time to act, don't let this great battle pass you by!

Guys, Deutsche Bank's latest report points out that the market may face a series of key mispricings in 2025, and these errors could significantly impact asset price movements. They have identified three major imbalances in the U.S.

market and are warning investors to reassess the risks in these areas. Let's take a look:

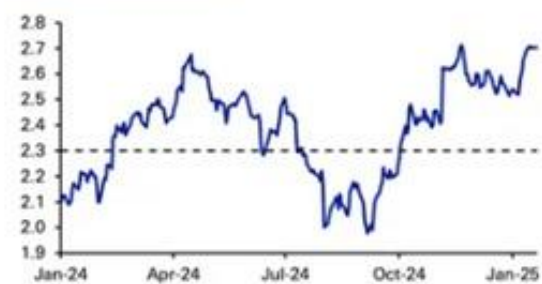

1. Overly optimistic expectations for interest rate cuts. The market's expectation for the Fed to cut rates in 2025 may be too optimistic. Data shows that the market expects a 31% probability of a 50 basis point rate cut by the end of the year. However, inflation expectations remain high, with 1-year and 2-year inflation expectations hovering around 2.7%, and consumer price growth has accelerated in recent months. The Fed is unlikely to risk loosening policy too quickly while inflation remains persistently above target. This means rate cuts may not come as quickly as the market expects, potentially causing market volatility.

Figure 1: Fed Funds Futures (%) are still anticipating further cuts

Source | Bloomberg Finance LP, Deutsche Bank

Figure 2: But the 2yr US inflation swap (%) shows market expectations are above target, even assuming a 30bp wedge from CPI to PCE

Source | Bloomberg Finance LP, Deutsche Bank

Investors are pricing in 1-2 rate cuts by the end of the year, despite inflation expectations treading higher in recent months. Bloomberg Finance LP, Deutsche Bank

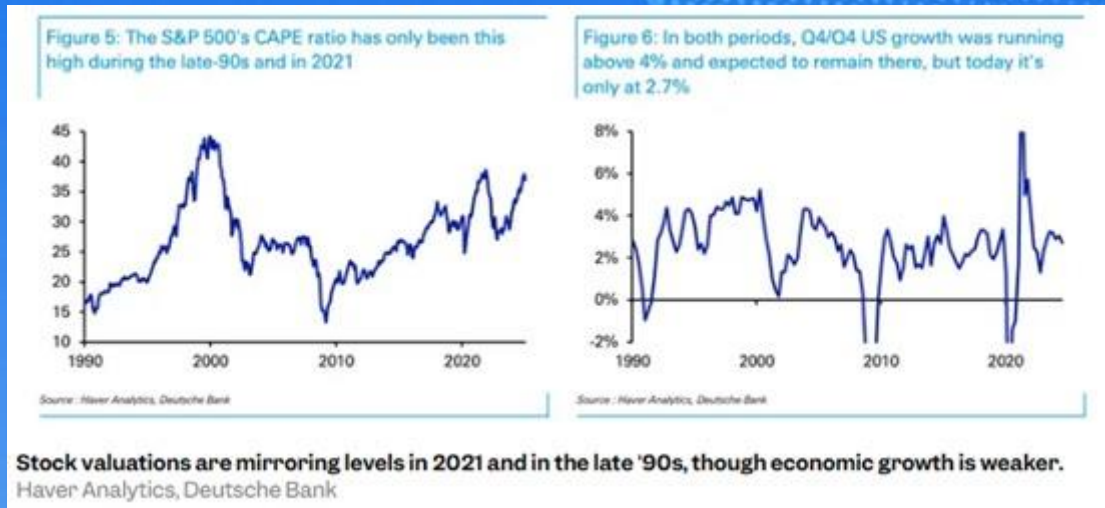

2. Underestimating Trump's tariff plan

The market seems to have underestimated the potential impact of Trump's tariff plan. Despite Trump's campaign promise to implement aggressive tariff policies, 80% of market participants believe these measures will be more moderate. However, even if Trump follows through on some of his tariff threats, it could have a significant impact on the market. Currently, the market clearly has not fully accounted for these risks.

3. Stock market valuations may need a correction

The S&P 500's CAPE (Cyclically Adjusted Price-to-Earnings) ratio is approaching historical highs, comparable to levels seen before the 2021 and dot-com bubbles. Despite the high valuations, economic growth remains relatively weak. GDP growth for the fourth quarter of 2024 is expected to be only 3%, well below the historical growth rate seen at similar valuation levels. In this context, the market has accumulated significant correction risk. Some institutions predict the stock market could drop as much as 16%. While Wall Street remains generally optimistic for the year ahead, we cannot ignore these warning signals.

So, how should we respond?

As Helmsman often reminds us, when risks outweigh the potential returns, the value of participating in the market significantly declines. With high stock market valuations and increasing risks, the smartest strategy is to avoid uncertainty and shift toward more certain areas. And right now, the crypto market is undoubtedly a better choice!

The volatility and return potential of the crypto market, especially under the guidance of AlphaStream 5.0, are becoming the top priority for wise investors. In the face of an uncertain stock market, seizing the opportunities in the crypto market is not only a strategy to avoid risks but also the best path to creating wealth.

Today, the Nasdaq and S&P 500 once again experienced gap openings, with the market atmosphere being both cautious and optimistic. However, we also noticed a pattern of a sharp rise followed by a pullback. The big tech AI stocks have once again taken center stage, experiencing significant rebounds driven by favorable news.

What stands out the most is that Oracle, in partnership with OpenAI and SoftBank, announced a massive \$500 billion investment to build AI infrastructure. This not only sparked a strong rebound in related stocks but also provided short-term upward momentum for the indices. This heavyweight move further underscores the strategic importance of the AI sector and strengthens market confidence in the future of the tech sector.

However, we need to stay clear-headed. Such positive news is often quickly absorbed, and the potential risks of a subsequent adjustment cannot be ignored. As Helmsman mentioned, this could be the final phase of a market rally. Most high-quality stocks will experience sideways consolidation at these elevated levels, and the profit-making effect will start to significantly weaken.

Guys, as qualified investors, we must learn to stay calm at high levels. If a stock doesn't allow me to go in heavy or use leverage, it means the risk and return are not in proportion, and it's simply not worth buying. Unlike large institutions, retail investors need to be more flexible in capital allocation, rather than blindly following the crowd. Just like in the first half of last year, many friends in the community made a fortune from the tech stock rally. But now, the high-level market of 2025 requires a defensive strategy, not blind aggression.

Before every investment, we need to clearly understand the market trend. New markets inevitably contain new opportunities, and investment is always tied to cycles. The cycles that Mr. Market provides are rare and cannot be forced. We must patiently wait for the next best opportunity and then strike with all our might, that is the path to our success.

Just like the current crypto market, the return of Crypto President has brought us a historic opportunity. And with its high accuracy rate, AlphaStream 5.0 has helped us achieve our profit challenge goals time and time again. This is the most certain investment direction right now, do you agree? Guys, the opportunity is here. Let's stay focused and use clear strategies to embrace more victories!

Many friends have been asking me lately if it's worth participating in the TRUMP coin's speculation. In fact, this morning, Helmsman already gave the perfect answer: the best buying opportunity for new token ICOs (Initial Coin Offerings) is to subscribe in advance.

Think about it, what was the TRUMP coin's subscription price? Only \$0.18, and it skyrocketed to nearly \$82, a nearly 450x increase! Doesn't it sound like a get-rich-quick frenzy? But the truth is, such massive profits almost exclusively belong to those who subscribed in advance. For those who bought in at high levels, the risk and reward are completely disproportionate.

So, the question is, what's the point of participating at high levels? If you don't have enough of a profit cushion, I strongly advise against getting involved in this kind of new coin speculation. Unless you got lucky with the subscription, which is zero-risk profit, that's a different story. But for the vast majority, chasing prices at high levels is like dancing on the edge of a knife.

Additionally, I've noticed that the COINIXIAI Exchange has just released an announcement for a high-quality ICO project. 2025 is being called Trump's Year, and the explosion of high-quality projects is completely expected. This is a

direction worth digging into, I'll take a closer look at this project from the exchange later, and tomorrow, if I have time, I'll dive deeper into it with all of you.

There are many market opportunities, but not every one of them is worth pursuing. Choosing the right track and seizing opportunities with high winning rates are the keys to our invincibility in the crypto market. Stay calm, seize those truly golden opportunities, and make every step we take solid and powerful!

Guys, there's another big piece of good news this week, do you remember? It's the Exchange's 6th Anniversary Recharge Promotion! This is not just an ordinary event; it's a once-in-a-lifetime opportunity that you definitely don't want to miss!

For example, let's say you deposit \$100,000 during the promotion period. The exchange will give you an additional 10% deposit bonus, meaning your trading capital will immediately become \$110,000. This isn't just extra funds; it's also opening more doors to potential profits for you.

Imagine using that \$110,000 for contract trading in the crypto market. With our powerful AlphaStream 5.0 system and Helmsman's precise strategy guidance, you could easily achieve 20%, 30%, or even higher returns in a short period of time. This promotion is not just a deposit bonus, it's an excellent opportunity to make your funds grow significantly in a short time!

To take it a step further, if you've missed some of the AlphaStream 5.0 trading opportunities in the past, now is your chance to make up for it. Use this additional capital to capture more profit points in the next market fluctuation, directly boosting your investment returns. Take action now! Time waits for no one, and opportunities won't wait either. This 6th Anniversary Recharge Promotion ends this Sunday, this is your last chance to add value to your portfolio. Remember, every successful investor is someone who seized the right opportunity at the right time, and now is your time to act!

Now, I recommend that everyone invest half of the profits from this trade into a 30-day high fixed-income investment product. This step is crucial, it not only allows our wealth to grow steadily but also provides a secure and reliable income source for our future. This is the secret weapon for building the WEALTH MATRIX and an important foundation for our path to financial freedom.

Guys, the goal of investing has never been just to pursue short-term gains, it's about paving the way for our long-term dreams through stable, continuous wealth growth. Every rational decision, every steady action, is an important cornerstone to future success. Only with this solid foundation can we move forward with confidence on the investment path and ultimately achieve true financial freedom and our life's dreams.

With the strong support of AlphaStream 5.0, many friends have achieved significant results. This has made me appreciate Helmsman's vision and wisdom even more. He leads us not only to pursue immediate profits but also to cultivate a long-term investment mindset and strategy.

I firmly believe that by following Helmsman's lead, we can not only achieve our immediate goals but also continuously break through our limits and reach even greater heights. I am especially looking forward to the launch of AlphaStream 5.0, which will not only provide us with more investment opportunities but also enable fully automated follow-the-strategy trading. This will be a revolutionary change for all of us investors. It will help more ordinary investors change their fate and achieve their dreams!

Through AlphaStream 5.0, we can not only easily generate stable profits but also improve our return rates through continuously optimized strategies, ultimately achieving the goal of financial freedom. This is not just a powerful tool, but an important partner in realizing our dreams.

So, guys, no matter what your current returns are, don't give up easily or settle for the status quo. Seize every market opportunity, set higher goals, and pursue bigger dreams! Keep moving steadily forward with the community, and I believe we can continue to create miracles in this volatile market and achieve even greater success!
