9:30 AM

Professor Quinlan Sutter (Helmsman)

Morning Review

Good morning, my friends!

I'm Quinlan Sutter, your old friend. Previously, we talked about market sentiment, but today, I'd like to delve into a transformative mindset that can change your investment trajectory, institutional thinking. Whether you're a novice or a seasoned investor, understanding and applying this mindset can have a profound impact on your investment journey.

At its core, institutional thinking is about being rational, systematic, and adopting a long-term perspective. Unlike retail investors who tend to make emotional decisions, institutional investors rely on comprehensive data analysis, clear strategies, and strict risk management. They are not easily swayed by short-term market fluctuations and instead focus on achieving stable, long-term returns.

The recent stock market trend provides us with a perfect example. At market highs, many institutions chose to lock in profits and gradually exit, especially from high-performing popular stocks. This doesn't mean these institutions have lost faith in the market but it's because they understand the principle that "rising markets create risks, while falling markets create opportunities."

When markets are at their peak, risks accumulate, prompting smart money to exit and secure their gains. Conversely, during market corrections or downturns, the prices of high-quality assets become more attractive, offering an excellent opportunity for value-driven investors to buy low. Compared to chasing gains at market highs, positioning yourself during downturns for the next rally is not only safer but also more cost-effective.

Back to the market, the initial jobless claims for the week ending January 18th were reported at 223,000, higher than both the previous value and expectations. This data seems to signal a slight slowdown in the labor market, but the overall employment environment remains strong. The higher-than-expected unemployment data may lead to short-term market volatility, especially as investor concerns about the economic outlook could intensify.

For the stock market, this data could help ease the pressure on the Fed to continue raising interest rates. A rise in unemployment could be seen as a signal of economic cooling, which, to some extent, would reduce inflationary pressures and strengthen market expectations of future monetary policy easing.

Guys, please stay tuned. AlphaStream 5.0 will soon release its latest trading strategy in the VIP Partner Group! This is a prime moment to seize market opportunities, and I hope every partner will act immediately and not let profit opportunities slip through your fingers!

The first step in institutional thinking is rational decision-making. Investing is not gambling, it requires us to calmly analyze the market and make informed, scientific judgments. As individual investors, we must learn to control our emotions, resist impulsive behavior, and avoid the traps of chasing highs and panic selling. As Warren Buffett famously said, “Be fearful when others are greedy, and greedy when others are fearful.” Only by staying composed during market panic can we truly seize the hidden investment opportunities.

The current stock market feels like a euphoric index party, with retail investors swept up by greed, rushing in. However, a closer look reveals that hedge funds and institutional money haven't made significant purchases; instead, they are gradually reducing their positions at market highs. Meanwhile, media sentiment is overwhelmingly optimistic, with almost all reports emphasizing bullish trends, as if the bears have been entirely "extinguished." This market behavior is far from normal. Friends, if the stocks you're holding have already seen significant gains, don't become complacent. Risks are building, and all it takes is a single catalyst for the market's direction to shift abruptly. Proactively mitigating risks is always far wiser than passively enduring them.

The success of institutional investors lies in systematic analysis and a multidimensional perspective. They don't just focus on the fundamentals of a single company; they comprehensively evaluate the macroeconomic environment, industry trends, and market sentiment. As individual investors, we too must adopt this approach, viewing the market through a broader lens. No single metric can fully reveal market trends, only through comprehensive analysis can we get closer to the truth.

Another core aspect of institutional thinking is a long-term perspective. The goal of investing isn't merely short-term profits but achieving sustained wealth growth over time. This requires patience and perseverance throughout the investment journey, the ability to withstand short-term fluctuations while holding firm to one's investment convictions. Peter Lynch once said, "The most important quality in investing is patience." With a long-term perspective, we can remain steadfast amid market ups and downs and ultimately reap significant rewards.

In my investment philosophy, one golden rule has always remained unchanged, that is value investing. Especially in emerging markets, we can discover even more exciting opportunities. In the stock market, we need to identify undervalued quality companies, buy them, and hold them long-term, patiently waiting for their value to be realized. Undervalued companies often mean their current price is reasonable, with tremendous growth potential ahead. This not only requires deep analytical skills but also the vision to identify long-term growth opportunities.

The charm of value investing lies in its stability and rationality. It helps us remain calm amid the noise and volatility of the market, resisting the distraction of short-term price swings. The essence of value investing is trading time for value realization, not chasing quick returns. It is a critical strategy for maintaining an edge in traditional markets.

However, with the advancement of time and the push of technology, emerging markets are becoming the focus of more and more investors. These markets represent high-growth potential areas, and today's crypto market is the perfect example. It's not just a new investment direction but a blue ocean market filled with infinite potential and opportunities.

Over the past few years, crypto market has experienced explosive growth. The prices of mainstream crypto such as Bitcoin and Ethereum have repeatedly reached new highs, capturing the attention of investors worldwide. Even more exciting is the fact that the ecosystem of the crypto market is continuously maturing and diversifying. From payments to financial services, from smart contracts to decentralized applications, the crypto market is gradually becoming an economic domain that cannot be ignored.

Globally, the acceptance of crypto and blockchain technology is rapidly increasing. More and more countries are enacting regulations to legalize and standardize the market, providing a solid foundation for its legitimacy. At the same time, enterprises are actively exploring and implementing blockchain technology, driving the expansion of the entire industry. These developments are laying a strong foundation for the long-term growth of crypto market.

Of course, we must acknowledge the high volatility inherent in the cryptocurrency market. While this brings higher risks, it also offers greater potential for returns. This is precisely where the advantage of AlphaStream 5.0 lies. It not only helps us precisely avoid risks but also enables us to capture opportunities for high returns. In the “AlphaStream 5.0 Crypto Oscars (300-1000%) Profit Challenge,” through scientific quantitative trading and flexible long-short strategies, we have already demonstrated its effectiveness. Leveraging AlphaStream 5.0’s robust analytical capabilities and execution power, we can seize every opportunity in market fluctuations, achieving sustained and stable profit growth.

This brings us to the question: if you use institutional thinking to compare, which one will you find to be a more certain investment opportunity, current stock market or crypto market?

From the current market performance, risks in the stock market are gradually becoming apparent. Although the three major indices are consolidating at high levels, the profit momentum is weakening. Many institutions have quietly reduced their positions at the highs, locking in profits. The monthly charts of the Dow Jones and S&P 500 indicate that market gains have almost exhausted future potential, while macroeconomic pressures and potential policy adjustments add layers of uncertainty. In other words, the stock market currently resembles a party nearing its end, with risks slowly accumulating.

If you still harbor doubts about the potential of crypto market, consider conducting a simple comparative experiment. Pick a stock you are most optimistic about in the stock market and buy it, then check its returns after two months. Compare that with the recent performance of AlphaStream 5.0's Millionaire Club in the crypto market. The facts speak for themselves, and such a comparison will make everything crystal clear.

Reflect on the first half of 2024 when the stock market experienced a major rally, how many people regretted missing out on those opportunities due to hesitation? If you didn't seize those opportunities back then, would you want to repeat the same mistake now in the crypto market? From mid-term long positions on Bitcoin near \$60,000 to \$100,000, and then from \$90,000 to above \$100,000 today, our grasp of the broader trends has been nearly flawless. In short-term trading, thanks to AlphaStream 5.0's precise signals and scientific risk management, we've achieved consistent victories. This is the core secret behind the steady growth in our asset returns.

With the official return of Crypto President Trump, crypto market is entering an unprecedented wave of bullish sentiment. Bitcoin's halving cycle has become a focal point of global attention, with more and more countries incorporating Bitcoin into their strategic reserves. This will undoubtedly drive its price even higher. At the current pace, Bitcoin surpassing \$200,000 by the end of 2025 is no longer an ambitious target but an evident trend.

What's even more noteworthy is the introduction of Trump's own TRUMP coin following his return. Within less than a day, it generated nearly 450x returns, showcasing not only the immense potential of the crypto market but also signaling the arrival of a new ICO wave. Unlike previous cycles, this upcoming wave will attract more traditional, high-quality enterprises, with total assets expected to easily surpass the trillion-dollar mark. This unprecedented growth will provide us with endless investment opportunities.

Dear friends, the current crypto market is a vibrant and promising blue ocean of wealth. What we are facing is not just an ordinary investment opportunity but a monumental chance to rewrite our destinies. AlphaStream 5.0 has already proven its capabilities, guiding us with precision and ensuring our success in navigating this ocean of potential.

As of today, our VIP1, VIP2, and VIP3 partners have achieved total asset returns of 119.89%, 249.04%, and 571.96%, respectively! Notably, these figures represent conservative calculations. Through our scientifically optimized capital allocation strategies, we have effectively mitigated risks from stock market declines while fully capitalizing on the high-return opportunities in crypto market, navigating seamlessly across different markets.

At the same time, by continually building our wealth matrix and reinvesting half of our profits into 30-day financial products, we are truly putting our earnings to work for us. Over time, the funds in these financial products grow steadily, soon surpassing our initial investment principal. This strategy not only ensures stable capital growth but also perfectly demonstrates the power of compounding. As Benjamin Franklin aptly put it: "Money makes money, and the money that money makes, makes more money." The miracle of compounding is not just about numerical growth but also the ultimate reward for time, patience, and persistence.

In our "Battle of Kings" plan, the power of compounding serves as the driving force behind our progress. Every single investment is a step toward the summit of wealth. Through meticulous strategy, rigorous execution, and unwavering patience, we can advance steadily amidst market fluctuations and achieve our ambitious goals.

While our journey has been illuminated by consecutive victories, it is crucial to remember that each success has been hard-earned. These achievements are the result of our patience, strategy, and relentless pursuit of excellence. Each step forward lays the foundation for even greater accomplishments in the future. Therefore, we must cherish every victory and view it as a cornerstone for even greater triumphs to come.

For those who may feel behind in their returns, do not feel disheartened or discouraged. Our community is here to support and guide you, to help you recover lost opportunities and exceed expectations. This is a collective journey, and our goal is to ensure that everyone can realize their vision.

As the Bible says: "I can do all things through Him who gives me strength." In the face of challenges, we must strengthen our resolve and move forward courageously. Victory is never achieved overnight; it is built through patience and wisdom. Let us work together, with faith and action, to embrace even greater success!

In this world, the gaps between individuals are often magnified through choices and actions. In the field of investment, this truth is particularly evident. By comparing the returns within the VIP groups, it is clear that these differences stem from the diverging paths chosen by investors. To better achieve our million-dollar profit goals, I strongly encourage everyone to join a higher-tier VIP partnership within your capacity. If you are facing difficulties, do not worry, reach out to my assistant to apply for assistance. Remember, our QTM community will never turn away anyone who seeks to transform their destiny through investment!

We will tailor an investment plan that suits your needs, helping you overcome challenges, break through current limitations, and move toward success. Every setback is a priceless lesson. Every fall is an opportunity for rebirth.

**Believe in yourself, strengthen your conviction, and take that brave first step.
Let us join hands and embrace a brighter future together!**

"Battle of Kings" is not just a challenge, it's a new beginning. It symbolizes our journey to become champions of the market. By understanding and harnessing the power of compounding, our wealth will grow exponentially. Every small success lays a solid foundation for the future. Every precise trade adds another brick to the structure of wealth. Friends, these small steps are building an unshakable fortress of prosperity, and you are the protagonist in this battle.

Remember, the secret to success lies in relentless effort, and the driving force to move forward is unwavering belief. By maintaining consistent action, we can steadily approach the shores of success. Let us use this "Battle of Kings" as a starting point and pursue even greater dreams with wisdom and courage. You've already taken the first step on this path, now go all in and see it through to the end!

In recent days, many friends have been asking me about COINIXIAI Exchange's new coin issuance announcement and why it has garnered so much attention and excitement. I believe this is closely tied to the TRUMP coin launched after the return of Crypto President Trump. Without a doubt, TRUMP coin has become the focal point of 2025's early wealth opportunities. Within less than two days, it delivered an astounding 450x return, a true miracle.

You may argue that TRUMP coin lacks substantial investment value, or even that it's worthless, but you cannot ignore its incredible profit-generating power. In just 2 days, its returns have surpassed weeks of effort elsewhere. This is the unique allure of ICO. In the traditional stock market, IPOs (Initial Public Offerings) introduce new stocks, whereas in the crypto market, the debut of any new coin is referred to as an ICO. In recent years, IEOs (Initial Exchange Offerings), a newer form of ICO have gained favor due to their enhanced project security and liquidity, making them the centerpiece of crypto market launches and highly sought after by investors.

As an emerging market, crypto space is filled with opportunities and challenges. We cannot overlook the investment prospects offered by quality IEO projects. These aren't just new coin launches, they're powerful tools that allow us to enter this market and uncover its growth potential.

Initial DEX Offering (IEO) is similar to an IPO in traditional markets, except that IPOs issue shares while IEOs issue cryptocurrencies. By launching a new crypto, IEOs provide a flexible financing avenue for project teams while offering investors unparalleled investment opportunities. The funds raised support operations, technological development, and marketing, while investors benefit from potential price appreciation after the tokens are listed.

The emergence of IEO has not only lowered the barriers to fundraising but also opened a new wealth gateway for investors. Unlike traditional markets, IEO allow a broader range of participants to invest in innovative projects often brimming with growth potential. Particularly in today's crypto market, IEO have become a key strategy for achieving extraordinary returns. Their flexibility, transparency, and global reach have made IEOs a prominent investment theme within crypto sector.

This is why the latest announcement from the COINIXIAI Exchange about its IEO projects stands out as especially significant. It's not just a normal launch, it offers investors an excellent opportunity to participate in premium projects and serves as a fresh starting point for wealth accumulation in this emerging market. High-quality IEO projects often feature innovative technologies, expansive market potential, and robust team backing, which are essential elements for long-term success.

Dear friends, today I want to discuss a crucial topic that investment knowledge in crypto market, particularly regarding IEOs and their pivotal role. Looking back at the 2017 crypto boom driven by IEO, we witnessed not only the market's vibrancy but also countless stories of investors seizing opportunities to achieve their financial dreams.

IEO as a novel fundraising method, are conducted through decentralized exchanges (DEX). They not only lower entry barriers but also elevate project quality, opening the door for more investors to engage in the crypto market.

Unlike the early speculative buzz around blockchain, we now focus more on its practical applications. Fields like DeFi (Decentralized Finance), IEOs, and NFTs (Non-Fungible Tokens) are continuously showcasing blockchain technology's

potential in transforming traditional financial systems, offering investors new growth avenues.

DeFi has revolutionized financial services with its convenience, while NFTs have disrupted the traditional logic of digital art and collectibles.

Simultaneously, as Wall Street's mainstream institutions gradually include BTC (Bitcoin) and ETH (Ethereum) in their portfolios, these crypto are increasingly seen as stable assets. It is foreseeable that mainstream crypto will continue to attract institutional attention, while emerging fields like IEOs and DeFi will provide investors with more opportunities for sector rotation.

History has repeatedly shown that IEOs have created substantial wealth. In the coming days, I'll share more success stories with you. However, today, I want to emphasize the importance of closely monitoring COINXIAI Exchange's newly announced IEO project. Based on my preliminary analysis, this IEO project holds even greater potential than TRUMP coin. While TRUMP coin's value as an investment may be limited, its profit effect is undeniable, an initial subscription price of \$0.18 delivered a jaw-dropping 450x return in less than two days. Remember, participating in the subscription price is the true starting point for all high returns.

For the upcoming IEO project from COINXIAI Exchange, I encourage you to carefully evaluate it: first, assess whether the project's risks are manageable and whether its profit potential is enticing enough. Second, thoroughly understand key details such as investment thresholds and lock-up periods. These factors will directly impact your returns. Prudence and rationality are always the cornerstones of successful investing. Avoid being swept away by temporary market hype, and instead make informed decisions based on in-depth analysis and understanding.

IEO have consistently played a pivotal role in crypto market. While the market environment and investment logic evolve over time, carefully selected IEO projects remain a critical pathway for achieving exceptional returns. As investors, we must stay vigilant, closely monitoring the development of these projects to seize every wealth-building opportunity.

This weekend, I plan to dedicate time to deeply research this IEO project and uncover its potential and value. I also encourage you to use this time wisely, conducting detailed analyses. Together, through our collective efforts, we can lay a solid foundation for the investment decisions ahead.

History has shown that many of the most successful investors found their golden opportunities in emerging markets. When traditional markets stagnate or decline, the rise of emerging markets often delivers unexpected returns. Emerging markets represent not just risks but immense potential and possibilities.

Dear friends, now is the best time to seize the opportunities offered by emerging markets. Crypto market is a prime example, not only a new investment frontier but also a dynamic and growth-rich domain. Here, anyone can discover their path to wealth through the right strategies and precise execution.

Do not let fear or uncertainty hold you back. Opportunities are always reserved for those who dare to take the first step. As Warren Buffett said, “One of the most important keys to success is patience and the ability to act decisively when others are fearful.” While the volatility of crypto market may appear daunting, but this is a great opportunity for us to create high returns through scientific strategies.

With AlphaStream 5.0, we have the ability to accurately capture every opportunity within market fluctuations, leveraging intelligent data analysis to support every investment decision. Whether it's Bitcoin's recent strong performance or the astonishing gains seen with TRUMP coin, these examples underscore the immense wealth potential of emerging markets.

Friends, let's boldly embrace this historic opportunity. Investing is not just about financial growth but also a reflection of confidence in the future. Take action, seize every opportunity, and let's face an even brighter future with our wisdom and courage! Believe in yourself, believe in the team, and together, let's write our wealth legacy in this emerging market!

Samuel Blackwood

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I am Samuel Blackwood, guys, this morning helmsman opened up a new investment perspective for us. He interpreted the market with institutional thinking, revealed the truth hidden in the complex and changing market environment, and let us see the deep logic behind it. He emphasized how important it is to master institutional thinking in the current market.

Have you noticed that the helmsman always finds opportunities in market fluctuations? This is not luck, but a perfect combination of strategy and vision. With this wisdom, we can navigate the ups and downs of the market with ease and turn challenges into opportunities.

For example, in the current stock market, have you noticed that many company executives and institutions are selling stocks at high prices? What is this signal? Why are they selling at this position? Obviously, they think the stock price is too high and the future risks outweigh the benefits. When you begin to understand this logic, you have entered the threshold of investment philosophy. This is a higher level of cognition of the market, which allows us to no longer just blindly follow, but to seize opportunities with clearer judgment.

Through the recent profit feedback from the stock market and crypto market, we should all think carefully about a key question: In the current market environment, how to seize the profit opportunities in the crypto market?

In reality, many savvy investors often miss good opportunities because they overthink and become overly cautious. They get caught up in the uncertainty of the market, and as a result, let opportunities slip away. In contrast, those who dare to make choices, stick to their decisions, and take decisive action are often the ones who ultimately seize the big opportunities.

The crypto market is the historic opportunity of today. Its volatility and potential far exceed that of traditional markets, especially with the strategic guidance of the Helmsman and the support of AlphaStream 5.0, allowing us to achieve remarkable returns time and time again. This is not just our luck, but the result of wise choices. In this market full of opportunities, the key lies in action and decisiveness. Don't hesitate and miss out on opportunities, join this wave of momentum and give it your all. Remember, opportunities are always reserved for those who are prepared and willing to seize them.

Guys, the repeated successes of AlphaStream 5.0's strategies have proven its powerful capabilities to us. We are no longer the ones hesitating on the sidelines of the market; we are the warriors standing on the front lines. Every trade, every strategy, is a reflection of the power of compounding, making every step we take filled with confidence and strength.

Let's talk about compounding, the secret weapon in the world of investment. Imagine planting a seed today and nurturing it carefully. Over time, this seed grows into a towering tree, and the fruit it bears can plant even more trees. The power of compounding is just like this, it gradually accumulates and, in the end, forms a dense orchard of wealth.

The key is that we must carefully choose our investment areas, develop strategies for stable profits, and use the right tools to amplify our returns. AlphaStream 5.0 is exactly that tool, helping us transform every investment decision into an opportunity for growth. This isn't just investing; it's the scientific cultivation of wealth.

At this moment, I want to ignite the passion within you. It's not just about participating in this profit plan, but truly mastering it. It's not just about witnessing the creation of wealth, but becoming the architect of your own financial destiny.

Compounding is our core principle, it's not just a strategy, but a belief. In the world of investment, patience, precision, and the use of intelligent tools are the boundary between the ordinary and the extraordinary. And we, have chosen to be extraordinary.

As investors, I believe everyone craves certain trading opportunities. After all, the unknowns in the market are already enough to give us a headache, and what we need more is a clear and feasible path forward.

Let's take a look at the current U.S. stock market, the three major indices are still consolidating at high levels. This slow, sideways movement at high levels is often the most likely to make people lose their sense of risk. A sharp decline may cause fear, but sideways consolidation is a more subtle "war of attrition." The indices may not be falling, but individual stocks aren't rising either, and the profit-making effect is sluggish. This is what makes it most painful for investors.

If you still have a stock portfolio in the market, ask yourself: how are your returns today? Do you feel somewhat powerless, or even unsure about what to do next?

Guys, this is the difference, this is the power of choice. While the stock market leaves us uncertain and hesitant, the crypto market provides us with a clear direction and generous returns. Choosing AlphaStream 5.0, choosing certain opportunities, is choosing a more efficient and clearer investment path.

So, if you're still hesitating, now is the time to reassess your strategy. Shift your focus from those disappointing assets to the crypto market, follow AlphaStream 5.0, and let your investments regain their momentum, experiencing real profit potential!

As shown in the chart above, today Bitcoin's bullish momentum surged, driven by positive news. After confirming the key signals, AlphaStream 5.0 quickly issued a buy signal for the long position with an accuracy rate of 99%, targeting the crypto composite index COF/USDT. The long strategy was successfully followed. On the 30-minute candlestick chart, the MACD formed a golden cross upwards, and the upper Bollinger Band perfectly opened,

showing a clear upward angle, indicating a strong bullish signal. In less than 30 minutes, everyone once again enjoyed a significant profit!

This is the power of AlphaStream 5.0, thanks to precise data analysis and real-time calculations, it always provides us with reliable and steady trading instructions after signal confirmation. Guys, just imagine what it would be like to have such a magical quantitative trading system at your disposal.

Of course, some friends might ask: "With AlphaStream 5.0 being so accurate, does that mean everyone who uses it will become the world's richest?" If you're thinking this way, it might indicate that you haven't fully understood the nature of the capital markets. Let me explain:

1. **The Rarity of Signals:** AlphaStream 5.0's 99.5% accuracy doesn't mean there are countless trading opportunities every day. From my observation, such high-level trading signals usually occur less than twice a day.

2. The Necessity of Position Management: Investing is not gambling. Heavy or all-in trading is neither advisable nor responsible. Managing positions and trading steadily is the key to long-term profitability.

3. The Essence of Steady Profits: The advantage of AlphaStream 5.0 lies in providing steady trading signals that help us capture the safest and most certain profits, rather than trying to profit from every market wave from start to finish. With such a steady strategy, combined with the power of compounding, we can achieve continuous growth of our capital.

Trading is exciting, but it also requires effort and discipline from us. We don't rely on getting rich overnight; instead, we achieve long-term wealth growth through steady, consistent trading. Guys, do you understand that now?

BlackRock's CEO candidly stated that, amid global concerns over currency devaluation, Bitcoin could rise to \$700,000 per coin! This is not just a bold prediction, but also a signal, the crypto market is attracting more and more institutional investors.

The positive outlook on cryptocurrencies from financial giants like BlackRock and JPMorgan, along with the launch of related investment products, has further strengthened the market's stability and growth potential. Meanwhile, the return of "Crypto President" Trump has injected powerful momentum into

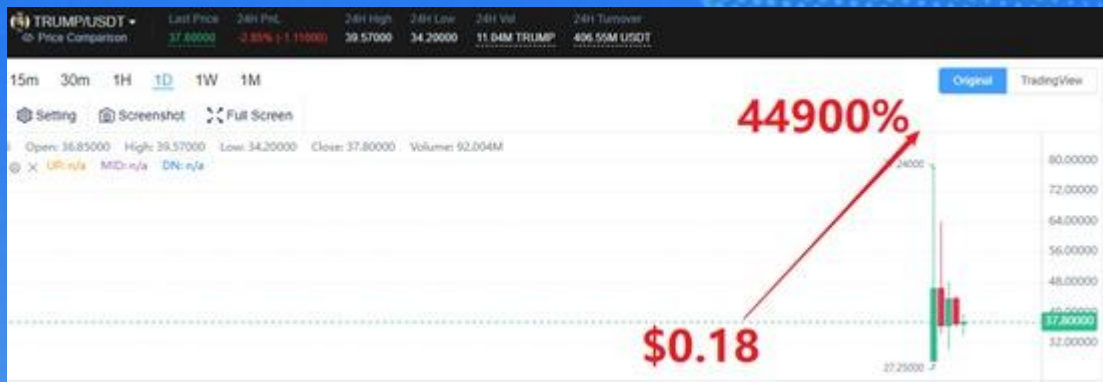

this trend. His commitment to making the U.S. the "crypto capital" is not only a boost to making America great again but also a strong endorsement of the future prospects of the crypto market.

In this context, Helmsman's strategy is particularly wise: keeping 10% of funds in the stock market and investing 90% in the crypto market. This allocation not only effectively diversifies risk but, more importantly, allows for the full utilization of the crypto market's massive potential and upward trend, leading to higher investment returns.

As we have seen, VIP partners executing this strategy have already far outpaced the performance of the traditional stock market. This is the power of making the right choice and taking decisive action! With such clear market opportunities at hand, the value of taking action is self-evident.

The upward trend in the crypto market has received strong support from institutional investors, providing us with unprecedented profit opportunities. Now, all the conditions are in place, and the only thing left to do is to follow the Helmsman's lead, leverage the powerful trading signals from AlphaStream 5.0, and take decisive action to seize every money-making opportunity.

The most profitable investment recently has undoubtedly been the TRUMP token! From a subscription price of \$0.18, it skyrocketed to around \$80, generating an astonishing 450x return in less than two days! This has undoubtedly become a legendary event that has shocked the market.

And AlphaStream 5.0 in our hands has also performed exceptionally, consistently surpassing our profit targets in each of the past profit plans. So far, our total asset return has nearly reached 10 times. This is the power of choice! As the Helmsman said this morning, you might think the TRUMP token has no value, but its profit effect has shocked the entire market. This is the magic of the "strong endorsement" by the U.S. President.

Yesterday, I discussed the TRUMP token with everyone and strongly advised against buying at high prices. Why? It's simple, the risk and reward are completely disproportionate! The ones who really made a fortune are those who subscribed to the TRUMP token at \$0.18. In a short amount of time, they achieved nearly 450x returns, and many of them have already attained financial freedom because of it. This is the unique appeal of the ICO market!

Guys, everything you see here is real. This is a "performance" led by the U.S. President himself, injecting unprecedented passion and energy into the crypto market. But we must stay clear-headed. The explosive rise of the TRUMP token has brought opportunities to the market, but it also reminds us that rational investing and precise selection are the key to ultimate success.

I completely agree with Helmsman's logic: no matter how great an opportunity is, if you didn't see it and missed it, it's not a big loss because it had nothing to do with you. But if you saw it and didn't seize it because of hesitation or doubt, that's the biggest regret and disappointment.

For example, let's say you discovered a set of numbers that you thought were your lucky numbers and decided to buy a Powerball ticket. But for various reasons, you delayed and didn't buy the ticket. Then, after the draw, those numbers actually win the jackpot! In that moment, wouldn't you feel utterly heartbroken? That kind of regret and sorrow would be truly unbearable. On the other hand, if the winning numbers weren't the ones you had in mind, you'd probably just laugh it off, because it wouldn't have anything to do with you.

The same logic applies to opportunities in the crypto market. If you've already participated, then you have the chance to make this investment journey the key turning point in changing your fate. But if you've completely ignored the crypto market, then there's nothing to regret. However, the key issue is this, every day you're in our community, watching friends consistently profit from the crypto market, and some have already achieved their financial goals, while you're still hesitating, waiting, and not taking action. That's the most regrettable thing!

Opportunities never wait, and they won't stop because of your hesitation.

Those who seize the opportunity and take decisive action are already standing at the door of financial freedom. In contrast, those who remain indecisive have not only missed out on money-making opportunities but have also wasted precious time in their daily regret.

This morning, the Helmsman shared the huge opportunities in the 2025 ICO market, especially the success of the TRUMP token, which truly opened our eyes. It has demonstrated the potential and appeal of the ICO market with its remarkable gains. Regarding the high-quality ICO projects that will soon be launched by the COINIXIAI Exchange, I believe we must pay close attention. 2025 is destined to be the year of the crypto market, and the nearly trillion-dollar ICO "pie" is gradually flowing into the market. While successes like the TRUMP token rely on the special value of the presidential endorsement, after all, there is only one "Crypto President" in the U.S., and other ICO projects will depend more on the quality and potential of the projects themselves.

This has particularly drawn my attention to an upcoming biotech ICO project from the COINIXIAI Exchange. From the description in the announcement, it's clear that this project is well-designed and has great potential. If everything goes as expected, I will participate in its IEO subscription. As someone who is eager to explore new opportunities, the success of the TRUMP token has already made me look at the ICO market in a new light, and this time, I'm not planning to miss out on such an opportunity.

However, guys, my advice to you is to remain patient and wait until Helmsman conducts a thorough analysis of this project and shares his findings with everyone this weekend before making a decision. Does the project have potential risks? What are the expected returns? These all need to be assessed comprehensively. We should apply the institutional thinking advocated by the Helmsman, using data and logic to support our decisions, so that our investments can be more stable and wise.

Opportunities will only be given to those who are both decisive and rational, so let's calmly wait for the Helmsman's insights before seizing this opportunity that could change our fate. Trust me, this patience and thoughtful consideration will make each of our steps more solid and reliable.

Guys, the 450x return of TRUMP coin has shown us the huge potential of the ICO market, but now, I want to tell you that we need to go all out to seize the opportunity of the AlphaStream5.0 Crypto Oscar (300-1000%) Profit Challenge Plan. This is the most clear, stable and trustworthy trading option at the moment. Although the ICO market has begun to show its charm, it still needs more time to verify its long-term effect. And our 'Battle of Kings' has proven its power and value time and time again.

Time waits for no one, and opportunities will not wait for the hesitant! If you miss this one, you may never find such a clear profit opportunity again. This is not just an opportunity to make money; it's a moment for us to showcase our courage, determination, and wisdom. Every trade is a decisive step towards our future investment dreams.

Are you ready to face this battle? Are you ready to write your own wealth legend with your actions? The 'Battle of Kings' is not just an ordinary plan, but a true challenge, calling for our fearless courage and unwavering belief. Only by giving our all can we seize this opportunity to change our fate.

In this market full of opportunities, what we need is not to stand by and wait, but decisive action. AlphaStream 5.0 provides us with strong support, helping us identify the most promising trading opportunities in the market. Whether you're an experienced investor or a newcomer just starting out, this is a once-in-a-lifetime opportunity.

Every warrior participating in the "Battle of Kings" will be proud of their courage and perseverance. The future you will thank the you of today for giving it your all. Because this is not just a simple investment, but an opportunity to rise to the peak of wealth.

This is a battle meant only for the strong! It not only promises returns, but also gives us the chance to become legends among our peers. One day in the future, when you look back on the choice you made today, you will feel an immense sense of pride in your courage and actions.

QTM COMMUNITY

Guys, now is the time to take action! Use your wisdom, belief, and action to join the "Battle of Kings" and embrace the brilliant future that belongs to you! We will write our investment legend with every precise trade! Every participant will become a hero in this battle, changing their destiny with courage and perseverance.
