**Professor Quinlan Sutter (Helmsman)** 

**Morning Review** 

Good morning, my friends!

I'm Quinlan Sutter, your old friend. It is in adversity that one's spirit and character are truly forged. Looking back on my life, during my lowest and most helpless moments, I always remember Churchill's famous quote: "To stumble from failure to failure without losing enthusiasm, that is the secret to success!" This quote has inspired me countless times in difficult situations, helping me regain my strength and keep moving forward. Optimism has always been the pillar of belief in achieving success. Without hope and confidence, there's no motivation to act, and no possibility to change one's fate.

Dear QTM community members,

Each of us encounters difficulties and setbacks in the pursuit of our dreams.

But as the Bible says, "Do not fear, for I am with you; do not be dismayed, for I am your God. I will strengthen you and help you." As long as we keep hope in

our hearts and remain steadfast in our beliefs, no obstacle can truly stop us from moving forward.

In this "AlphaStream 5.0 Crypto Oscars (300-1000%) Profit Challenge," we face not only market volatility but also a test of our self-belief. Every failure is accumulating strength for future success. As long as we don't give up and persist relentlessly, the light of victory will surely arrive as promised.

The road to investment is never smooth; it is filled with the unknown and challenges. But as Einstein once said, "In the midst of a crisis, never lose faith, for at the end of the crisis lies opportunity." If we can face challenges with unwavering confidence and seize every opportunity with wisdom and courage, we will ultimately turn adversity into advantage and reap substantial rewards.

The power of unity should not be underestimated. Let us join hands and work together. Every market fluctuation is an opportunity for us to accumulate experience and wealth; every decision can become a turning point in rewriting our destiny. Success is not just a matter of luck; it is the result of every effort and persistence accumulated over time.

Friends, no matter how great the challenges ahead, trust in yourself, trust in the team, and believe that our efforts will eventually lead to abundant results. In this Battle of Kings, each one of us can find our own brilliance. Let us fight with passion and faith, striving for our dreams and working hard for the future!

May you create your own glorious chapter in this battle! Let's keep pushing forward, ready to embrace even greater success!

Yesterday, the three major U.S. stock indices continued to edge higher, maintaining an overall pattern of high-level consolidation. The market's attention was drawn to the remote speech by Crypto President Trump at the World Economic Forum in Davos. He clearly stated that he would demand Saudi Arabia and other OPEC member countries lower oil prices, while also urging the Federal Reserve to take immediate action to cut interest rates. This statement helped ease concerns about inflation to some extent, driving the stock market higher, while oil prices fell as a result.

Although Trump mentioned the possibility of imposing tariffs on goods produced overseas during his speech, he did not provide further details, and the market reacted relatively optimistically. Investors initially recognized the potential benefits of Trump's policies, but they are still waiting to see how they will be implemented in practice. Going forward, the market's focus will shift to next week's Federal Reserve meeting and the upcoming earnings reports from major tech companies, which could trigger greater market volatility.

It's worth noting that, despite a decline in inflation expectations, signs of economic recovery have provided short-term support for the stock market's consolidation at high levels. However, this pattern of high-level consolidation is gradually accumulating risks. Over time, bearish forces may begin to gather, while the weakening buying momentum has increased market uncertainty. If next week's earnings reports fail to meet expectations, the market could face a downward correction.

Dear friends, this moment reminds us that the market's high-level consolidation is not only a reflection of short-term benefits but also a signal that requires cautious handling. Proper position management and flexible strategy adjustments are key to maintaining an advantage in the current market environment. Remember, opportunities often come with risks, and only through correct judgment and timely action can we remain undefeated!

In our investment journey, identifying and managing risk has always been the key to success. When the market signals risk, we need to act decisively, not simply go with the flow. Short-term market sentiment often obscures the true trend, but calm analysis and rational decision-making are the core of protecting our portfolios and achieving steady returns.

Taking the current market environment as an example, the gap below the three major indices will eventually be filled, and a downward adjustment is only a matter of time. When it comes to risk signals, we cannot turn a blind eye, nor should we fall into blind optimism like most people in the market. Instead, we need to calm ourselves during periods of market euphoria, review our investment portfolios, and take necessary protective measures in a timely

manner. This is not only the art of risk management but also the safeguard for achieving long-term returns.

After launching the "King's Plan," I decisively recommended that everyone reduce their stock market exposure to 10% and allocate 90% of their funds to the crypto market. This strategy was not made hastily but was based on a deep understanding of market trends. The current high-level tech stocks carry clear risks, while the crypto market, as an emerging sector, is unlocking unprecedented profit potential. In hindsight, this decision proved to be wise, as the opportunities in the crypto market have delivered significant returns for us.

The unique allure of the crypto market lies in its immense volatility and potential. It is not only an emerging investment space but also a dynamic and opportunity-filled market. In this crypto bull market wave, only the sharpest and most astute investors can achieve a true leap in wealth.

From a technical perspective, the bullish trend in the crypto market remains strong, with technical indicators for Bitcoin and other major crypto assets continuing to improve, signaling the potential for the upcoming wave of price increases. As we mentioned in our previous analysis, Bitcoin's daily candlestick chart shows a MACD golden cross and support from the middle Bollinger Band, all of which reinforce our confidence. Even more noteworthy is that, compared to BTC, the COF/USDT currency composite index shows greater volatility potential, which also implies greater profit potential, making it highly exciting to look forward to.

With the return of Crypto President Trump, the stance of the U.S. and other major economies toward cryptocurrency policies is gradually becoming more relaxed. The process of legalizing and mainstreaming cryptocurrency is accelerating, injecting new vitality into the market and attracting more capital inflows into the crypto market, further driving up asset prices. In particular, Trump's strong support for cryptocurrency, along with the backing from the Republican Party, has undoubtedly provided a significant boost to the crypto market through these favorable policies.

As global economic uncertainty increases, more and more investors and institutions are turning their attention to the crypto market, viewing it as a key choice for a safe-haven asset. This shift is not limited to individual investors; many institutional investors are also entering the market on a large scale. The continued growth in market demand has not only solidified the value of crypto assets but also provided strong momentum for future price increases.

In recent years, new projects in the crypto market have been emerging constantly, particularly innovative applications based on blockchain technology, such as DeFi (Decentralized Finance) and NFTs (Non-Fungible Tokens). The explosive growth in these areas has provided more opportunities for investors.

By selecting high-quality projects to invest in, not only can one profit from the market's momentum, but also participate in the transformation of emerging technologies.

Looking back in history, every presidential election has brought significant investment opportunities. This time, the return of Crypto President marks the arrival of a historic big opportunity in the crypto market. In every Kondratieff wave, there are moments when wealth legends are born. In the crypto market, such moments of wealth redistribution occur particularly frequently. Just like Bitcoin's halving events, each of them has triggered a strong surge in the market.

TRUMP Coin has created a 450x return in less than two days, completely igniting the crypto market. This not only proves the potential of the crypto market but also highlights that a new era is accelerating its arrival. Trump has clearly stated his intention to make America great again, and the crypto market is a key driving force in achieving this goal. U.S. policy support, market enthusiasm, and technological innovation will position America to lead the global crypto market.

Dear friends, this is not just an investment opportunity, but a moment to be part of a historic transformation. Every fluctuation in the crypto market is a chance for wealth redistribution. Let's leverage the powerful tools of AlphaStream 5.0 to accurately capture every opportunity, stay firm in our beliefs, and embrace the brilliant future that awaits us! Don't let opportunities slip through your fingers, now is the best time to act!

Compared to the stock market, the profit opportunities in the crypto market are truly astonishing. Through the data, we can clearly see that since the launch of the "Battle of Kings," VIP1, VIP2, and VIP3 partners have achieved total asset returns of 119.89%, 249.04%, and 571.96%, respectively. This is not just growth in returns, but a powerful testament to our ability to conquer the market and continuously surpass ourselves.

However, if your returns have not reached this average level, it's time to take a step back and reflect. Did you fail to follow the trading strategy? Did you hesitate in the face of opportunity? It's important to understand that, in the same market, the size of the capital will impact the final returns, but more importantly, it's about whether we seized every opportunity.

Let me share the story of Samuel Blackwood with you. He is a highly respected investor in the QTM community, and his remarkable achievements are a result of always giving his best when facing opportunities. He never procrastinates or hesitates; instead, he firmly seizes every trading signal and approaches each challenge with decisive action and a positive mindset. This spirit of giving his all is the key to his success in standing out in the competitive crypto market.

Dear friends, opportunities won't wait for us forever. Fleeting opportunities, if not firmly seized, will only turn into regrets in the future. The "Battle of Kings" is not only the most important profit challenge in our "Millionaire Club," but also an excellent opportunity to help us grow and improve. It is not just a journey to achieve wealth, but also a journey of self-transcendence.

If you feel that your returns are currently lagging behind the average, don't lose heart or get discouraged. The key to success lies in continuous learning and practice, constant reflection and adjustment. Now is the best time for you to catch up and surpass. As we often emphasize, investing is not a sprint, but a marathon. Every successful investor has grown through long-term persistence and effort.

You need to ask yourself a few key questions:

1. Have you strictly followed the trading strategy?

The market is always full of volatility, and fear or greed can often lead us off course. Have you truly traded according to the signals provided by AlphaStream 5.0? Following the strategy is the foundation for ensuring stable returns. Remember, the secret to successful trading lies in discipline, not in temporary luck.

# 2. Do you have enough capital support?

The size of the returns depends on the capital invested. If you want higher returns, it's necessary to increase your investment appropriately. Don't let short-term difficulties hold you back; long-term goals require a solid capital base to support them.

## 3. Do you have enough drive to take action?

Investing requires not just wisdom, but also decisive action. When an opportunity arises, can you make quick decisions and take bold action? Success often belongs to those with the courage to seize opportunities, not to those who hesitate and wait.

This "Battle of Kings" is an unprecedented opportunity, and I sincerely hope that each of you can seize it and achieve your investment goals. Remember, opportunities are fleeting. Once the goal is achieved, I may end this profit plan at any time, and such opportunities may not come again. Just like the current COINIXIAI Trading Center's recharge promotion, which will end next Sunday, once it's gone, it won't return. Smart investors always know how to go all in at the right moment, seizing every opportunity that can be leveraged, rather than letting it slip through their fingers.

As the Bible says, "Whatever your hand finds to do, do it with all your might." This verse reminds us that, whether in investing or other areas of life, giving our all is the only path to success. In the face of market challenges, this is not only a test of your investment skills but also a trial of your willpower and determination.

Dear friends, let's join hands and go all in to seize this unprecedented opportunity! Time will not wait, and opportunities won't be given to those who hesitate. This is our critical moment, and we must act decisively to pave the way for a brilliant future.

Believe in yourself, and also in our team. We already have a clear goal and the powerful AlphaStream 5.0 as the engine driving us forward, now all that's left is your action! Whether it's a 300%, 600%, or 1000% target, these aren't just numbers, they are a testament to our determination and effort.

Are you ready? Let's prove ourselves through action, leaving no regrets! This is our opportunity to achieve our dreams and the best time to break through our limits. Let's take this crucial step together and embrace the brilliant moment that belongs to us!

I'd like to say a few words about the recent hot topic, the COINIXIAI Trading Center's new ICO project launch. This weekend, I'll take some time to conduct in-depth research and aim to provide a comprehensive strategy recommendation for everyone next week. TRUMP Coin achieved an astonishing 450x return in less than two days, shaking the entire crypto market and creating a new profit miracle. Now, the ICO market has become the focal point for all investors. Friends, you must pay close attention to this!

Our profit plan has already helped many achieve significant success, but so far, the returns have not reached 15x. A high-quality ICO project, however, can generate a 450x return in just two days through the subscription and issuance process. Imagine if you subscribed to \$100,000 and got fully allocated, this would mean instant financial freedom! This is the unique allure of ICOs in the crypto market, and it's why they attract the attention of investors worldwide.

The opportunity is right in front of us, and as mature investors, we will not let it slip by easily. I want to remind everyone that this is a chance to change our fate, and now is the time for us to make calm judgments and go all in.

Finally, I wish you all a wonderful weekend! May you spend it filled with joy and happiness, enjoying the time spent with family and friends. Take this opportunity to relax and recharge, preparing for the work and investments ahead next week. I hope this weekend brings you happiness and hope, and that we will embrace even more success together in the days to come!

Eastern Time, January 24, 2025

3:00 PM

Samuel Blackwood

**Closing Commentary (α&β Strategy)** 

Good afternoon, community members!

I'm Samuel Blackwood, this morning, Helmsman once again used his institutional mindset to clearly reveal the historic opportunity currently in the crypto market. This isn't hard to understand, and it's easy to feel. Facing the growing risks in the stock market and the immense opportunities in the crypto market, the Helmsman's advice is truly to the point.

What is the biggest difference between retail investors and institutions? Ultimately, it's the mindset. This difference in thinking often determines the final investment results. The importance of institutional thinking in the investment market is self-evident. Only by learning to think like institutions and structure our investments from their perspective can we truly make our investments stand out. Helmsman has always emphasized: Don't just listen to what these institutions are saying; pay attention to what they are doing. When all the media

is bullish and spreading optimism, the institutions with real market control, along with executives from tech companies, are quietly cashing out at high levels, and that speaks volumes.

This is the key skill we need to learn: observation, judgment, and action. When the market is rising and the media is bullish, the actions of institutions and executives tell us that the market may already be in a high-risk phase. What is the core of institutional thinking? It's calm analysis and rational action. Retail investors, on the other hand, tend to be emotional, blindly following market sentiment, which often leads to being trapped at high levels. Institutions, however, are different. They decisively sell at highs, patiently buy at lows, and strictly follow their investment strategies and risk control principles.

So, when you see the market thriving, don't be easily swept away by market sentiment. Learn to stay calm like institutions and observe what the large funds, which truly dominate the market, are doing. Only by doing this can you avoid acting blindly and make rational investment decisions.

Just like Helmsman's decision, when he identified a clear opportunity in the crypto market, he decisively proposed a 10%-90% asset allocation strategy: 10% of the funds stay in the stock market, while 90% are invested in the crypto market. This strategy not only avoided the potential risks of the stock market but also firmly captured the substantial returns offered by the crypto market. This precise asset allocation is worlds apart from the behavior of retail investors who blindly follow trends and go all-in.

Looking at the current stock market, although the three major indices continue to consolidate at high levels and the U.S. Magnificent Seven are trading sideways, a large number of individual stocks have been experiencing downward adjustments. Especially those with poor performance, which have already fallen to low levels and are stuck in a sideways pattern. Even so, this week the market saw a rebound of around 10%, but frankly, the profit potential here is nowhere near as substantial as the massive returns in the crypto market.

What is the essence of investing? It's understanding the flow of capital. Where the hotspots are, money will flow; the places closest to money are where profits run. Truly exceptional investors know how to let go of small opportunities and focus on big ones. Only by doing this can they concentrate their energy and capital to fight a truly profitable battle.

Now, looking back at the "Battle of Kings," if you had fully committed from the start like us, where would your returns be now? If your returns have reached the average, then congratulations, buddy, you're a master of execution! But if your returns are below average, it's time to reflect. Where did you fall short? What went wrong? Was it a lack of execution, or hesitation on some key decisions?

Helmsman is right: action is always more important than waiting! Let's continue to arm ourselves with institutional thinking, stay calm in our analysis, and act rationally in the market, seizing the most certain opportunities in the crypto market right now. Focus your attention on the points where the big opportunities are gathering and go all in. Trust me, only by doing this can your investment results truly change and even create miracles!

After consecutive rebounds, today the three major indices continued to consolidate at high levels with slight adjustments. Without the push from consistently strong sectors, finding stocks among nearly 10,000 that can continue to rise is indeed a huge challenge. I believe, guys, if you look at your own account profit and loss records, this feeling should be the most direct reflection of the situation.

However, the dullness and difficulty of the stock market stand in stark contrast to the booming crypto market! Whether it's the TRUMP Coin achieving an incredible 450x return in less than two days, or our ongoing Battle of Kings 900% profit challenge, these returns are not only exciting but also progressing steadily, far outpacing the returns from traditional assets like stocks and bonds. This is the most attractive and hottest investment opportunity right now, a historic opportunity that cannot be ignored.

You may have a different opinion about Crypto President Trump, but as a discerning investor, you absolutely cannot ignore the immense potential and influence he has brought to the crypto market. Just like today's stock market consolidation, many people may find it difficult to identify profit opportunities in such an environment. But we are different! This morning, through a long

position in the COF/USDT strategy, our VIP partners once again earned substantial profits. This is the power of choice, choosing the right market, the right tools, and taking proactive action is the key to success.

AlphaStream 5.0 has once again proven its outstanding strength. As the king of quantitative trading, it leads us to complete profit challenges one after another with precise trading signals and scientific data analysis, placing us in an absolutely advantageous position in the waves of the crypto market. Choice is greater than effort! By choosing the right market, combined with decisive execution and professional strategies, profits naturally follow.

Guys, if you're still hesitating or feel like your investment capital is too small, now is the time to reassess and make a choice! In the world of investing, the biggest enemy isn't risk, but your hesitation and procrastination. Too many investors focus too much on risk and uncertainty, ultimately missing out on potential huge gains. It's those who take decisive action who are the true winners.

Successful investors not only know how to assess risk, but more importantly, they can spot opportunities within that risk and take swift action. Just think about it, do you want to be the person who waits for opportunities to slip away and regrets it afterward, or the one who dares to make decisions and goes all in as a winner? The answer is clear. Every opportunity that arises has its time frame, and if you miss it, you really miss it. We've repeatedly verified the accuracy of AlphaStream 5.0 in our past trades, as it has consistently led us to achieve exciting profits with its reliable trading signals. This is a system that has stood the test of time, and all we need to do is trust in its power and follow it decisively.

Guys, now is the best time for you to seize the opportunity. If you're still hesitating, ask yourself: can you truly be at peace with missing this historic opportunity? Let's treat risk as a stepping stone to growth and action as the starting point for success. Every decisive choice we make today could become the cornerstone of tomorrow's remarkable achievements.

Be brave, be decisive, take action! With your wisdom and courage, take that crucial step forward. This is not just about growing wealth; it's about taking control of your future. Let's seize this opportunity together and create our own success story!

Guys, AlphaStream 5.0 has proven its strength time and time again through real actions. We're not discussing theory or making empty claims; we're showcasing its extraordinary power with real profit data to the world. From the initial 80% profit challenge to the current Crypto Oscars (300-1000%) profit challenge, AlphaStream 5.0 has consistently exceeded our expectations, leading us to rise steadily and reach the peak of wealth.

It's worth mentioning that the construction of the wealth matrix is making our financial fortress even more solid. This combination strategy not only makes our investments more stable but also gives us a decisive advantage in the market. Have you noticed that when you look back at those profit data, everything feels incredibly real and inspiring? This isn't about luck; it's a carefully designed and continuously optimized system that's at work.

The power of AlphaStream 5.0 lies in its ability to quickly seize opportunities amid market fluctuations and provide timely, accurate trading signals. No matter how the market changes, it always offers us the most reliable guidance, ensuring that each step we take is grounded and full of confidence. You can imagine, when the market is volatile, having such a powerful tool supporting you and guiding your direction. This is not just the power of technology, but a strong guarantee of your success.

More importantly, every profit from a trade further strengthens our confidence and solidifies our support for our strategy. AlphaStream 5.0 not only allows us to navigate the complex market with ease but also helps us seize every potential profit opportunity. This is where its true value lies.

Honestly, guys, seeing these data and results, I'm filled with confidence about the future. I can't wait to further embrace this system, because it's not just an investment tool, it's a powerful weapon for achieving financial freedom. If we keep up this momentum and make the most of this strong tool, we will see even more surprises and returns.

This beautiful weekend, we are not only celebrating the magnificent achievements of the COINIXIAI Trading Center, but also feeling genuinely proud of the growth and progress of every investor. Guys, this recharge promotion is undoubtedly a fantastic opportunity to boost assets and lay a solid foundation for future investments. For those who haven't participated yet, don't miss out!

Next week, the market may see a highly promising IEO project. I'm already prepared to take action, just waiting for the Helmsman to complete his deep analysis of the project and share his professional insights with everyone at the first opportunity. This kind of opportunity is the key to breakthroughs for those of us who take action. Make sure you stay tuned and don't let this historic opportunity slip through your fingers.

Meanwhile, the Battle of Kings 300-1000% profit challenge is still in full swing, and I feel that the market fluctuations next week will bring us even more big opportunities. The powerful signals from AlphaStream 5.0 have repeatedly proven its accuracy and reliability. Now, it's time for you to take action!

If you need a more personalized investment plan or support with capital allocation, don't hesitate, direct message the assistant. Make sure you approach each trading day with confidence and seize every opportunity. We're here, not just to make profits, but to write our own wealth legend with wisdom and action!

Guys, have a great weekend! But don't forget to stay alert and be fully prepared for the market opportunities next week. Let's continue to work together, seize every moment, and embrace even greater victories. Next week, our story continues, will you be the next hero of our wealth legend?
