9:30 AM

Professor Quinlan Sutter (Helmsman)

Morning Review

Good morning, team!

I'm Quinlan Sutter, your old friend. Have you ever noticed that good things always seem to happen to optimistic people? They always find light in the darkness and strength to move forward in difficult times. This isn't luck instead it's a success mindset.

Bible says, "Whatever your hand finds to do, do it with all your might." Optimistic people understand this principle. They don't let fear hold them back. Instead, they go all in and seize every opportunity. Looking back at our "Trading Practice Boots Camp," countless friends achieved a leap in wealth through wisdom and effort. This is not just about financial growth but also a

breakthrough in mindset and an elevation in life. And it all starts with their optimism and decisiveness!

When facing the market, you can choose to see risks or opportunities. The real winners will never stagnate because of fear. Too many people are always hesitant, afraid, worried about this and that, and what is the result? They just staying where they are, watching others take off while they are "poor and stable"! But optimists are different. They see hope in every decision. They believe that opportunities outweigh risks, so they always win.

This era is full of opportunities, but only a few can truly seize them. When an opportunity is right in front of you, will you take a step forward, or will you stand still and wait? Opportunities never wait. If you miss one, you may never get it again. Now is the time for you to choose, be held back by fear or move forward boldly and change your destiny?

Friends, market favors those who take action, and optimists are often the luckiest. Let's stay confident, embrace opportunities, and create our own brilliance in the investment journey.

Howard Schultz once said, “When you passionately pursue something, it’s not just a job, it’s your mission.” In the investment journey, this sense of mission is what drives us forward.

The AlphaStream 5.0 system is about to launch, and at the same time, our QTM Community Charity Fund will be released. This is not just the result of our wisdom and technology but also a firm commitment to giving back to society with kindness. Through the charity fund, we will help those who truly need assistance, spreading love and giving more people a chance to stand up again.

In our QTM community, some friends once faced difficulties in life due to investment losses. But they never gave up. They believed in the future, seized opportunities, and went all in. In the “Trading Practice Bootcamp,” they achieved a turnaround, rising from the millionaire club to the multimillionaire club! They not only regained their confidence but also completely changed their lives. This tells us that past failures do not define you, the only thing that determines your future is the choices you make today.

The greater the challenge, the greater the glory of overcoming it. Those who remain optimistic and choose to move forward in adversity will ultimately turn crises into opportunities and see the light at the end of the tunnel. We should not be discouraged by past failures but should see every setback as a stepping stone to success! True strength is not about never falling but about rising higher after each fall!

No matter what you have experienced in the past, as long as you are willing to seize opportunities, the future is still full of infinite possibilities. In our community, everyone has the chance to regain confidence and achieve their dreams. Now, let's move forward with courage, optimism, and firm belief to welcome our brilliant future.

Yesterday's exploration took us through a series of key topics, from how to select top-tier IEO to QTPT subscription strategies and BTC market sentiment, as well as the unique advantages of IEO. These discussions not only helped us clarify market logic but also positioned us at the forefront of the next wealth wave.

Did you gain new insights and start thinking about how to apply them? I have one goal, that is every friend here to at least double their initial investment through this plan. This is not just a test of your knowledge but a once-in-a-lifetime opportunity for wealth. The opportunity is right in front of you, action is the key.

Today, I am excited to reveal three critical topics:

First, we will conduct an in-depth analysis of stock index trends to identify the next market turning point. You will learn how to anticipate macro trends, avoid market risks, and pinpoint investment opportunities.

Second, we will discuss the three crucial phases of IEOs and how to develop precise investment strategies for each stage. This is a battle, and your strategy determines your ultimate return.

Third, I will share three practical strategies to increase QTPT IEO success rates. These strategies will help you take control of this wealth opportunity and maximize your capital's efficiency!

QTM COMMUNITY

Friends, the market always belongs to those who dare to learn and take action. Let's move forward together with clear strategies and strong conviction to embark on this exciting journey to wealth!

From the current market trend, Nasdaq and S&P 500 remain in a high-level oscillation. Although hedge funds are continuously reducing holdings and shorting indices, there are no clear signs of a market crash. This indicates that large institutions are still injecting support funds, keeping the structure of the U.S. stock market stable as long as tech giants remain relatively steady.

From a national perspective, a significant decline in the U.S. stock market is almost unacceptable. With the country's external debt already at high levels, a sharp drop in the stock market would severely impact global investor confidence, potentially triggering a chain reaction and panic selling. Although the indices appear stable, individual stock profitability is noticeably weak, indicating a shift in market sentiment. To see another rally like the one in January 2024, the market needs to wait for a more suitable time window. Specifically, when truly high-quality stocks present outstanding buying opportunities, which would be the best time for large-scale entry.

The Trump administration's tariff policies are intensifying global trade tensions, making high-risk assets less favorable in the current market. Bearish sentiment continues to accumulate, and the market is waiting for a key event to trigger a directional move. Later this week, indices and stocks may see a rebound, but

be cautious, this is likely a short-covering rally, not the start of a new uptrend. For those holding stocks, this could be an ideal opportunity to reduce holdings, optimize costs, and lock in profits.

So where are the real opportunities? They are in our Battle of King Profit Challenge! Heavyweight economic data will be released on Thursday and Friday, increasing market volatility, just as a wave of premium IEOs is set to launch. This presents a near-zero-risk golden profit opportunity. Capital flows have already provided the answer, smart money is exiting traditional markets and shifting into crypto.

Friends, for the next phase, stay focused. I will provide you with a detailed breakdown of key topics. This is not just a knowledge upgrade but a chance to transform your wealth. Study carefully, take decisive action, and you will master ICO/IDO/IEO investments, standing at the forefront of the market to seize your fortune!

Dear QTM family, have you witnessed GEBT's stunning performance since its listing? It surged to a high of \$43, skyrocketing 1333% from its initial \$3 USDT offering price. From its opening price of \$15.06 USDT, it achieved a

tenfold gain within days. This not only demonstrates the immense potential of wise investments but also validates our investment strategy.

By comparison, although the Battle of King Profit Challenge performed well, with V3 partners achieving over 10x returns, but it seems modest compared to GEBT's explosive surge. This investment journey has not only allowed us to experience IEO's exceptional potential firsthand but has also paved the way for our next high-quality IEO opportunity—QTPT!!!

Maybe you've heard of ICO, but as Samuel Blackwood mentioned yesterday, GEBT and QTPT fall under IEO, which have unparalleled advantages over ICO. First, IEO undergo rigorous exchange audits, filtering out low-quality projects and providing higher investment security. Second, the visible subscription progress bar of IEO enhances transparency, helping investors predict opening prices and determine precise entry points. Most importantly, IEO projects have high liquidity post-launch, allowing investors to buy and sell at any time to secure profits.! This is why more and more smart money is shifting towards IEO instead of ICOs.

Now, the real opportunity is right in front of us. Let's embrace new investment knowledge and dive into the golden opportunities ahead. The market has proven the explosive power of IEO. Are you ready to seize the next 10x or even 100x opportunity? Opportunities belong only to those who are always prepared and willing to take action!

As we are still amazed by GEBT's outstanding performance, a new golden opportunity is already shining on the horizon. QTPT's IEO is about to begin. This is not just an ordinary IEO but a once-in-a-lifetime chance that could change our investment destiny. On this journey, I will take you through the three key stages of QTPT's IEO and reveal the core investment strategies that will put us in control.

The first stage: Pre-issuance announcement, where it all begins, and smart money gets in early

When an exchange releases an IEO pre-issuance announcement, smart investors know it's time to start positioning. QTPT's announcement is the first guiding light in the market. Now, our task is to seize the opportunity before the market fully reacts and take the lead!

1. Project concept and application: Quantum technology + blockchain, the real hotspot!

The core of investment lies in the future value of a concept, and QTPT is at the forefront of the fusion between quantum computing and blockchain. This is not just a temporary market hype but the leader of a new technological revolution. Any visionary investor can see that quantum technology is accelerating its adoption, and QTPT is not only a pioneer of this trend but may also become the next-generation foundation of Web3 security architecture! This is not an ordinary crypto project but a transformation that will reshape the entire market.

2. Market sentiment: Bull market frenzy, the golden age of IEO!

Market sentiment determines capital flows, and this year, crypto market is entering a new phase of excitement.

- Bitcoin breaking through \$100,000 is just the beginning. Trump's return has reignited global investor confidence, driving another boom in crypto market!
- TRUMP token skyrocketed 450x in just two days, sparking a market-wide frenzy, and investors' demand for high-quality IEOs is at an all-time high!

- In the stock market, new stocks are typically in high demand during bull markets. Similarly, in the crypto market, QTPT is likely to become the brightest star in the IEO sector, fueling widespread market enthusiasm!

3. Entry threshold: Low barrier, high growth, a real wealth opportunity for everyone

QTPT's low entry threshold means that more investors can participate easily, this will undoubtedly push the subscription stage beyond 100% rapidly, creating an overwhelming buying frenzy! High subscription demand = higher listing price = stronger early profits. For those looking to seize a real wealth opportunity, QTPT's IEO is undoubtedly the most certain investment chance of the year!

A screenshot of a web interface showing the details for the QTPT Initial Exchange Offering (IEO). The interface has a navigation menu at the top with 'Subscription' (highlighted with a blue line), 'Allocation', 'Upcoming', 'Offering', 'Pending', and 'Winnings'. Below the menu, the QTPT logo is displayed. A table lists the offering details: Offering Price (2.8 USDT), Issue Quantity (8000000), Starting Time (02/06/2025 12:00:00 AM ET), and Closing Time (02/15/2025 12:00:00 AM ET). The 'Upcoming' tab and the 'Closing Time' value are highlighted with green boxes.

| Subscription | | Allocation | | |
|----------------|---------------------------|------------|----------|--|
| Upcoming | Offering | Pending | Winnings | |
| QTPT | | | | |
| Offering Price | 2.8 USDT | | | |
| Issue Quantity | 8000000 | | | |
| Starting Time | 02/06/2025 12:00:00 AM ET | | | |
| Closing Time | 02/15/2025 12:00:00 AM ET | | | |

The second stage: Online subscription—securing a spot, locking in the opportunity!

QTPT's online subscription will officially start at 12:00 AM EST on February 6, marking a golden window where investors must compete for speed and allocation. What's the key to this stage? The subscription progress bar.

The subscription progress bar determines the supply-demand relationship, directly affecting the opening price. Take GEBT as an example: it had an issue price of only 3 USDT, but with the progress bar ultimately soaring to 498%, market sentiment pushed the opening price directly to 15.05 USDT. This means that when the subscription progress bar exceeds 100%, investors enter the “zero-risk profit zone” because the market has already formed an undersupply scenario, making profits upon listing inevitable.

Smart investors know that the more intense the subscription, the higher the opening price and the greater the profit potential. QTPT's market enthusiasm has already surpassed GEBT's, and we are likely to witness another phenomenal IEO event. Now, the question is. Are you READY????

The third stage: Allocation results—determining returns and reaping rewards!

Once the subscription ends, we will enter the most exciting phase, the allocation announcement, scheduled for 12:00 PM EST on February 15 (Saturday). The key focus during this stage is:

1. Allocation ratio: How to maximize your allocation?

Our goal is not only to replicate GEBT's 498% subscription success but to surpass it entirely! Maximizing allocation strategies is the key to ensuring the highest possible profits. Later, I will explain in detail how to increase your allocation to secure more QTPT tokens during the IEO and amplify your returns!

2. Unallocated funds refund: Capital is never wasted, and opportunities always exist

Any unallocated funds will be refunded immediately after the allocation results are announced, meaning your funds won't be locked, and you can instantly prepare for the next investment opportunity. Allocated funds will be held until listing, leading to the next wealth explosion.

Now, we are at the threshold of the QTPT IEO, with an unprecedented investment opportunity right before us. But opportunities wait for no one. How can we maximize our allocation and ensure that we are positioned at the forefront of this investment storm? The key lies in precise strategy! Let me reveal three must-win strategies to help you lock in maximum returns and seize the advantage!

Strategy 1: Act early and participate at the first moment

In IEO battlefield, TIMING is everything! The earlier you participate, the more priority the system gives you in allocation, ensuring a larger share. The moment the subscription starts is your signal to act! If the progress bar hits 100%, you must join the subscription immediately. Hesitating for even a second could mean missing the best entry point, and the market won't give you a second chance!

Strategy 2: Increase investment capital to boost winning odds

The more you invest, the greater the return! This isn't theory, it's a rule proven countless times in the market. In an IEO, the amount of capital you allocate directly determines your final allocation ratio. It's like an exclusive banquet with limited seats. Whoever bids higher gets the main course! Willing to maximize

your profit? Then you must decisively increase your stake and secure an absolute advantage!

Strategy 3: Take a steady approach and precisely target the low-risk zone

For investors who prefer a more stable strategy, the smartest move is to wait until the progress bar exceeds 100% before joining. This means the subscription is already in a “zero-risk” zone. You won’t miss out on the opportunity while ensuring your capital’s safety, achieving a perfect balance between ambition and caution! In such a demand-exceeding market, every calculated investment is a high-probability golden opportunity!

QTPT IEO’s golden opportunity is now open to us. This is not just an investment event but a once-in-a-lifetime wealth-building moment. Now, let me tell you why QTPT’s issuance is an investment opportunity we absolutely cannot afford to miss!

1. A unique market trend, a once-in-a-generation wealth opportunity

Crypto market is on the verge of a new breakout phase. Trump’s return has already pushed Bitcoin past its historical high of \$110,000, while TRUMP token’s

450x surge in just two days has ignited market frenzy! 2025 will be the year of crypto, with a trillion-dollar ICO market forming, and top-tier IEO projects on major exchanges are becoming the rarest investment assets.

QTPT's IEO launch on COINIXIAI Exchange not only gives us exclusive access but also means this will be one of the few places to secure QTPT early. You don't want to be the one watching the price skyrocket without having gotten in, do you?

2. Rising market heat and massive future expansion potential

QTPT's partnership with COINIXIAI Exchange is just the beginning. As the market's interest in quantum technology keeps growing, the project team is highly likely to expand QTPT onto more exchanges for broader exposure. This means that participating in QTPT's IEO now is not just a high-return investment for today but also a strategic move for its future large-scale expansion!

The most important thing is that we are doing risk-free arbitrage of the current IEO, and we will get high profits as soon as it go public! As for contract trading?

That is the main battlefield of AlphaStream 5.0. What we need to do is to accurately plan IEO and lock in the opportunity to make a steady profit!

3. Scarcity gives it immeasurable value

QTPT's IEO is exclusively launched on COINXIAI Exchange, making it even rarer. High-quality IEOs are becoming scarce, and every successful IEO ultimately becomes a valuable asset in the market. This is not just an investment, it's a wealth-building opportunity that will go down in history.

4. Quantum technology + blockchain: A market-disrupting revolution

QTPT is not just a normal token. It is pioneering quantum technology and blockchain integration, creating the foundation for the Fourth Industrial Revolution! Quantum computing breakthroughs will reshape information processing, communication, and security, and QTPT is at the forefront of this revolution. Investing in QTPT is not just investing in a token, it's investing in the future of technology!

5. Low entry barrier, high returns, stable zero-risk arbitrage

QTPT's issue price is only 2.8 USDT, with an extremely low entry threshold, yet market attention is incredibly high. This means it is highly likely to become the next GEBT or even surpass it! We have all witnessed GEBT's performance, it surged from 3 USDT to 43 USDT in just a few days, achieving a 1333% increase! QTPT's market hype is at least as strong as GEBT's, if not higher. Are you really willing to miss out on this opportunity?

The art of investing lies in the combination of learning and practice, and true wealth always belongs to those who take action! IEO investing is not complicated. If you are willing to spend time mastering the fundamentals and refining your skills over just one week, you can become a leader in this field. Opportunities only favor those who actively seize them, and QTPT IEO is the golden key to wealth that lies right in front of us.

Now is the time to take action! With the mindset of an explorer, use the key strategies we shared today, position yourself strategically, and embrace the limitless potential that QTPT brings. Don't wait for the storm to pass, learn to ride it and surge toward the peak!

The market does not wait for hesitant people, every detail determines the final outcome! The opportunity is right in front of you, and time will not pause for you to think. If you already understand the trend, don't hesitate, take action immediately and secure your wealth advantage! By the time you decide, the subscription quota may already be gone, and you might even lose the chance to participate!

This is not just an ordinary IEO, it is the most explosive investment opportunity in the crypto market of 2025! The market trend has already opened up, and the real winners are those who dare to take the first step. Now, the choice is yours. Will you stand by and watch from the sidelines, or will you act decisively and claim your share of this golden opportunity? This time, don't let yourself be the one who regrets missing a historic wealth opportunity!

Get ready now and embrace this upcoming IEO storm! 🚀💰

Stay tuned for Samuel Blackwood session this afternoon, he will provide deeper market insights and key strategies. If you have any questions or want to discuss investment strategies further, feel free to message me or consult experienced

Eastern Time, February 5, 2025

3:00 PM

Samuel Blackwood

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I'm Samuel Blackwood, and this morning, Helmsman shared his unique investment philosophy, revealing one of life's most important truths, your choices determine your destiny! Friends, take a moment to look back at your life, how many times has fate extended an opportunity to you, only for hesitation, caution, or even doubt to make you let it slip away? The cost of missed opportunities will always be far greater than the cost of trial and error!

Only optimists can see opportunities and take bold action, only those who embrace the future can break free from financial limitations and shatter their personal ceilings! If you're stuck in financial stagnation, it's time to change. If

you've already built a multi-million-dollar portfolio, then it's time to seize high-certainty opportunities and aim for the billionaires' club!

Do you remember the tech stock explosion in January 2024? Did you participate? If you missed that rally, you absolutely cannot afford to miss the historic opportunity of 2025, the Crypto Boom Year! If you didn't join the AlphaStream 5.0 Trading Bootcamp. If you weren't part of the Millionaire or Multi-Millionaire Profit Challenge, Then right now, the most high-certainty IEO opportunity in the crypto market is your last shot at redemption!

The IEO market's potential this year is unmatched, GEPT has already proven its power, and QTPT is on track to become the next legend! This isn't just an investment, it's a life-changing opportunity! Will you stand on the sidelines, stuck in a cycle of missed opportunities and regret, or will you take decisive action and claim your spot at the forefront of wealth creation? Don't let your future become the sacrifice of today's hesitation!

Folks, this morning, Helmsman unveiled some truly invaluable investment secrets, specifically, the three key phases of an IEO and three strategic methods to maximize allocation ratios. This isn't just general market knowledge, these

are precision tactics for winning big! Have you mastered them yet? If you missed out, catch up now, because tonight's QTPT IEO subscription is set to be a golden feast where capital is destined to double! 🚀

Why am I so confident about this opportunity? Because I've already mapped out the market trend for QTPT's IEO subscription. Optimists always see opportunities and they take action! That's exactly who I am. It's why I positioned myself early in GEBT and made a massive profit. Now, QTPT is following the same path to success, and tonight is your best chance to enter the battlefield and lock in your gains!

This isn't just a subscription, it's a conquest of the market! Only those who position early and act decisively will emerge as the true winners in this explosive wave, claiming their rightful trophy of wealth! 🏆 We are not passive spectators waiting on the sidelines, we are precision hunters seizing the prize!

Opportunities only favor those who are prepared! With QTPT's IEO approaching, we must apply the strategies the Helmsman taught us, execute with precision, and position ourselves at the top of the market. This isn't just a trade, it's a full-

scale wealth acceleration! This is the chance to double, even multiply your capital, and the only thing you need to do is take decisive action!

Folks, tonight is battle time! No hesitation. No second-guessing. Opportunities vanish in an instant. Let's step up with the confidence of true investors and go all-in toward financial victory! 🚀💰 Are you ready? Let's go! 🔥🔥🔥

Folks, let's face the real market signals together! 🇺🇸🔥

Today's January ADP employment data showed an increase of 183,000 jobs, far exceeding market expectations. This confirms that the U.S. job market remains strong. If the upcoming Non-Farm Payroll (NFP) data also comes in strong, the likelihood of rate cuts this year will drop significantly, shattering the market's illusion of a more dovish Fed policy.

🏠💥 This is a major bearish signal for high-flying AI tech stocks! Take NVIDIA (NVDA) as an example, it has already started declining ahead of the market, currently retracing to the 250-day moving average. After some consolidation, it could continue into a second wave of decline, potentially retesting the critical \$100 support level. The tech sector's leading indicator is shaking, and the market's profit momentum is rapidly shrinking!

💀🚫 A wise man does not stand under a crumbling wall, smart investors don't expose their capital to unnecessary risk! 🚩 This morning, Helmsman gave a clear signal: Every rebound in the current stock market is nothing more than a final exit opportunity for those still holding positions! Sell into strength, lock in profits, and exit high-risk zones! Right now, the market has entered a high-valuation, high-risk phase, where earnings season uncertainty could trigger a

deep correction in tech stocks at any moment. If earnings fall short of expectations, we could see a wave of panic selling, turning the market into a bloodbath. 🤖

Capital never sleeps, and smart money always flows to the most certain opportunities! The historic opportunity of the 2025 crypto market is unfolding, have you taken action yet? 💰 🚀 The profit potential in crypto far exceeds the stagnant stock market. Will you wait for a market crash and be forced to cut losses, or will you act decisively and move your capital into high-certainty opportunities ahead of time?

Winners don't wait, they take action! 🏆 Stop hesitating and seize this golden opportunity in the crypto market. Avoid the high-risk traps of the stock market, follow the Helmsman's strategy, and put your capital where it can truly grow! 🚀 Are you ready? Take action now, don't let this opportunity slip through your fingers! 🔥 🔥 🔥

🚀 Folks, pay attention! This is the turning point of our destiny!

If you truly understand what I'm about to say, I'd bet by mid-next month, you'll be sending me a thank-you message! Why? Because the QTPT IEO is coming, and tripling your investment isn't just possible, it's only the starting point of our "Battle of Kings" (300-1000%) profit challenge.

Our final destination? The next financial Mars! 🚀

I know you might be scratching your head, thinking, "Triple my investment? Really?" Yes, absolutely! And I've got real data to back up this bold prediction!

Let's break this opportunity down, as long as you follow the first two strategies laid out by Helmsman, you won't just be a participant, you'll be a winner! You'll secure a higher allocation ratio! Remember GEBT IEO? Many investors received allocations 12.24% higher than the average, leading to massive profits!

📌 Now, imagine this:

👉 You invest \$100,000 into the QTPT IEO.

👉 You secure a 12%+ higher allocation ratio.

👉 The result? Let's break down the numbers and see how much you're about to make! 🚀

💡 Why can QTPT outperform GEBT? Over the past few days, we've analyzed and debated whether QTPT can surpass GEBT. Now, let's compare the data directly, everything will become crystal clear!

📊 GEBT's IEO subscription rate skyrocketed to 500%, driving its opening price to surge significantly.

📊 QTPT has even greater market attention, and we anticipate its subscription rate will easily exceed 800%!

💰 What this means for QTPT's potential price movement:

🚀 Projected QTPT opening price: \$22.4 ($2.8 * 8$).

🚀 GEBT opened at \$15.06 and has already surged to \$40, with a future target of \$50+!

🚀 Applying the same growth ratio, QTPT is expected to break past \$74.42 soon!

$(22.4 * (50/15.06))$

💡 Profit Calculation:

If QTPT's price rises from \$2.8 to \$74.42, the gain will be:

$[(74.42 - 2.8) / 2.8] * 100\% = 2,557.86\%$ growth!

💰 If you invest \$100,000 and secure a 12%+ allocation ratio, you'll receive at least 12,000 QTPT tokens.

💰 With a 2,557.86% increase, the value of these tokens will skyrocket to:

$12,000 * 25.5786 = \$306,943.20!$

💰 In other words, your \$100,000 investment has a high probability of turning into a pure profit of \$306,943.20!

🔥 This is the opportunity QTPT IEO presents, it has the power to completely transform your financial future!

Remember this number, engrave it into your investment goals and take action now! The market has already given its answer, QTPT is the next big winner! Are you ready? Don't let hesitation be the reason you miss out on the most profitable opportunity of 2025!

Folks, listen up, here's the deal: Stocks can pull back at any time after major rallies. The price you buy at determines your holding confidence, and your profit cushion defines your risk exposure. But getting into QTPT's IEO is like striking gold with zero risk! Why? Because once the subscription phase begins, the progress bar will easily surpass 100%, signaling the birth of a risk-free investment opportunity!

Pay attention, this isn't just regular secondary market trading, this is a direct allocation of newly issued tokens, just like IPO subscriptions in the stock market! IEOs give you the chance to secure your position before listing, rather than fighting for entries in the secondary market after the price has already surged. Once QTPT officially launches, that's when AlphaStream 5.0's quant trading engine unleashes its full potential. AlphaStream 5.0's big data model is designed to track assets that have established stable trends post-listing, ensuring precision in execution. And our profit challenge programs have already proven

its accuracy when the success rate for platform tokens and crypto indices reaches 100%, it's undeniable proof of AlphaStream 5.0's power!

When a golden opportunity is right in front of you, why stay in the turbulence of the stock market? QTPT is expected to launch around February 16, and based on our projections, its price will skyrocket by the end of the month! Most importantly, participating in the IEO means securing risk-free profits, once listed, you can sell anytime to lock in gains, without the constant long-short battles of the secondary market. This is an entirely different kind of investment, guaranteed profits, zero risk, and essentially "free money" from the market!

Imagine this, if you follow my advice today, shift your investment into the QTPT IEO, and secure over 3x returns, how would you thank me? But more importantly, this opportunity is risk-free! Yes, contract trading offers high profits, but it requires waiting for signals and managing risk. IEO investing is far simpler subscribe, wait for listing, sell. Just two steps, and your profit potential could surpass even the "Battle of Kings" profit plan!

If you're holding a multi-million-dollar portfolio, the QTPT IEO is an opportunity you simply can't afford to miss! In terms of risk management and profit stability,

it far outperforms any short-term trading strategy in the market. Opportunities like this don't come every day, are you really willing to let it slip away? Don't wait until QTPT is already listed and regret not getting in during the IEO phase. This is your early advantage, your golden ticket, your pathway to exponential wealth. Take action now!

Folks, after these past two days of learning, if you're still unsure how to proceed, don't worry! We're on standby, ready to tailor the best QTPT IEO subscription plan based on your individual situation. The opportunity is right in front of you, don't let this historic investment moment slip away! Let's go all in, lock in QTPT's golden window, and get ready for an explosive wealth surge! 🌟

Wait, are we wrapping up already? Not so fast! Here's critical intel you absolutely don't want to miss! Are you ready to put my logic to the test? As these insights unfold one by one, you'll witness the true laws of the IEO market in action and you'll be the one holding the "key to the kingdom"! 🏰

Core Discussion: Trend Forecast for QTPT IEO Subscription Phase

First, let me be direct, QTPT's IEO subscription progress will undoubtedly surpass 100%! Remember yesterday's analysis from Helmsman? QTPT's investment concept, application potential, and market attention already outshine GEBT. This doesn't just mean QTPT has stronger fundamental support, it also signals that its explosive potential in the IEO market will far exceed expectations!

Now, let's take a closer look at the exchange's strategy

The GEBT token giveaway didn't just reduce market sell pressure; it ignited a powerful buying frenzy, successfully shifting the market's focus toward QTPT. This was a brilliant move! Not only did it send QTPT's market hype skyrocketing, but it also solidified its position as the "new benchmark" for IEOs. So, QTPT surpassing GEBT isn't just possible, it's practically inevitable!

Now comes the real question, how will you take action? From the three core strategies Helmsman shared this morning, which one will you choose? Lead the charge and secure a top-tier allocation? Take a steady approach, gradually increasing your position? This isn't just theory, it's a carefully designed, systematic strategy. We've already seen how market sentiment, investment logic, and real-world application are aligning to push QTPT toward record-

breaking success in the IEO market. This isn't just a short-term speculation opportunity, it's your bridge to financial freedom!

✦ The real question is, are you ready to seize this opportunity? This isn't just another IEO, it's a record-breaking wealth wave in the making! The next few days will determine who stands at the peak of this financial storm and who's left standing on the sidelines, watching the bold winners claim their rewards!

Folks, when the doors to QTPT's online subscription open, get ready for an unprecedented surge! This won't be a slow trickle, it'll be a massive flood of capital sweeping through the market! ✨🔥

What we're witnessing isn't just ordinary capital inflow, it's a full-scale market frenzy for the QTPT IEO! Think about it, those who made a fortune on GEBT are now sitting on massive profits. And what's their next move? They're eagerly searching for the next wealth-multiplying opportunity, QTPT is the answer! Any savvy investor won't hesitate to redeploy their GEBT winnings into QTPT. This isn't just capital rotation, it's an unstoppable force that will drive QTPT IEO's subscription progress to record-breaking levels! 🚀💰

And as all of this unfolds, GEBT will inevitably feel the immense market pressure, making its price fluctuations a focal point. I will closely monitor GEBT's market movements, every price shift, every sell-off will serve as a catalyst for the momentum building behind QTPT's IEO!

But listen up folks, we cannot overlook QTPT's ultimate trump card, the length of its online subscription period! Let's set aside everything we've discussed so far and focus on this game-changing reality: QTPT's subscription window is three times longer than GEBT's!

What does this mean?

- ✓ Missed the GEBT rocket? Now you have a second chance! 💎
- ✓ A longer subscription window means more capital inflows, driving the progress bar to unprecedented heights! 📈
- ✓ Investors have ample time to prepare funds and strategically position themselves, an advantage that GEBT's short window simply couldn't offer! ⌚

So, mark my words: QTPT isn't just here to replicate GEBT's success, it's here to break records and create a new legend! I'm not just confident, I'm certain that QTPT's online subscription progress bar will effortlessly surpass 500%, 800%, and even 1,000%! 🌟🚀 This will be a historic milestone in the crypto market, and the only question is, are you ready to be a part of it?

The stage is set, the spotlight is on, and QTPT is the star of this financial spectacle! Your role? Ride the wave of wealth and claim your place in history!

Folks, this is today's exclusive news, but without a doubt, our journey is far from over! 🚀🔥

The QTPT IEO online subscription is now in its final countdown! ⌚ Are you ready, or are you still hesitating? If you're unsure about how to proceed, don't worry, reach out to us immediately, and we'll help you craft the optimal subscription strategy! Opportunities wait for no one, and this IEO is a zero-risk wealth springboard, you don't want to miss it!

💰 As for Friday's Non-Farm Payroll (NFP) 900% single-trade profit challenge, it doesn't conflict at all with the QTPT IEO subscription! The smart strategy? Reserve a portion of your funds for Friday's NFP battle, seize the high-volatility profit opportunity in contract trading, and then, once the dust settles, go all-in on QTPT subscription to maximize your returns! 🎯 🔦

Are you ready to seize this golden opportunity? Now is the time to act, no more hesitation. Grab hold of this wealth storm and let your portfolio experience explosive growth! 📈💥

⚠️ Important Reminder! VIP partners, stay alert! AlphaStream 5.0 has detected key trading signals, and once confirmed, we will immediately issue the trading instructions! Please ensure your notifications are enabled so you don't miss the best opportunity to boost your profits! This isn't just an ordinary trade, it's an opportunity that can truly lead to a profit breakthrough! 🚀

Remember, winners are not those who wait for opportunities, but those who seize every moment! Let's take action together and reach new investment

heights! See you tomorrow, with your determination and ambition, as we take on the market again! 🔥 🔥 🔥

Dear QTM family, what a wonderful night! While the world sleeps, the online subscription for QTPT IEO has turned into a midnight wealth feast! The progress bar has surged to an astonishing 200%, and at this moment, we are not only witnessing history, but also witnessing the official launch of a zero-risk, high-return golden opportunity! For those who jumped into the battle early, the light of victory is already shining on you!

This is an unprecedented spectacular feast. QTPT's strong subscription momentum is driving it to new heights, and its future potential is already clear. I can almost see the fireworks of success blooming before us as we celebrate the birth of this wealth miracle together! Many friends have shared their excitement about joining this celebration in the group. This moment feels as lively as Christmas, with everyone full of anticipation, and every subscription makes the future even brighter! All our discussions, analysis, and strategic planning in the past few days have been to prepare for this exciting moment, and now, it's right before us!

The value of QTPT is destined for greatness! This is not just an ordinary IEO; its quantum technology background, market rarity, and exclusive release by COINIXIAI Trading Center make it the most eye-catching star project in the market! This is an unmissable zero-risk opportunity. Rarity determines its value, and value determines our returns!

Now, the question is, have you firmly secured your seat? Remember, the IEO's time-first and volume-first principles mean the earlier you participate and the more you invest, the higher your allocation ratio will be! This time, the QTPT subscription wave is unstoppable, and those who seized the opportunity early have already locked in substantial future returns!

Take action now! The QTPT subscription is writing a wealth legend for us, and you cannot afford to miss it! This is a guaranteed winning battle, an opportunity where not doubling is hard. If you miss this, you may never find such a perfect IEO again! Seize the opportunity, grab your golden chips, and join us as we create a brilliant chapter together on the QTPT stage!

A preemptive congratulations to those who have already secured their positions, you will witness the true magic of IEO! In this morning's class discussion, I'll

QTM COMMUNITY

continue to share more core strategies for IEO investments to ensure everyone maximizes their returns!
